A Compendium Of Armaments And Military Hardware Routledge Revivals:

A Compendium of Armaments and Military Hardware (Routledge Revivals) Christopher Chant, 2014-06-03 First published in 1987 The Compendium of Armaments and Military Hardware provides within a single volume the salient technical and operational details of the most important weapons The complete range of hardware used in land sea and air forces throughout the world at the time of publication is covered from tanks to rocket systems helicopters to cruise missiles alongside full details of size weight and operational range The book's main strength lies in the detail it gives of armament and associated ammunition capabilities and of the sensors and other electronics required for the weapons to be used effectively A key title amongst Routledge reference reissues Christopher Chant's important work will be of great value to students and professionals requiring a comprehensive and accessible reference guide as well as to weapons buffs

A Shot in the Dark: A History of the U.S. Army Asymmetric Warfare Group Paul J. Cook, 2024-05-14 This book presents the U S Army Asymmetric Warfare Group AWG as an example of successful change by the Army in wartime It argues that creating the AWG required senior leaders to create a vision differing from the Army's self conceptualization change bureaucratic processes to turn the vision into an actual unit and then place the new unit in the hands of uniquely qualified leaders to build and sustain it In doing this it considers the forces influencing change within the Army and argues the two most significant are its self conceptualization and institutional bureaucracy The work explores three major subject areas that provide historical context The first is the Army's institutional history from the early 1950s through 2001 This period begins with the Army seeking to validate its place in America's national security strategy and ends with the Army trying to chart a path into the post Cold War future The Army's history is largely one of asymmetric warfare The work thus examines several campaigns that offered lessons for subsequent wars Some lessons the Army took to heart others it ignored As the AWG was a direct outgrowth of the failures and frustrations the Army experienced in Afghanistan and Iraq the book examines these campaigns and identifies the specific problems that led senior Army leaders to create the AWG Finally the work chronicles the AWG's creation in 2006 growth and re assignment from the Army staff to a fully fledged organization subordinate to the U S Army Training and Doctrine Command in 2011 to its deactivation This action resulted not from the unit's failure to adapt to a post insurgency Army focusing on modernization Rather it resulted from the Army failing to realize that while the AWG was a product of counterinsurgency it provided the capability to support the Army during a period of great strategic and institutional uncertainty

Military Technology, Military Strategy and the Arms Race Marek Thee, 2025-03-03 First published in 1986 Military Technology Military Strategy and the Arms Race argues that a principal factor contributing to the arms race is the military research and development R and D sector It traces the arms race since World War II and explores the relationship between the emergence of new weapon technology the development of new weapon systems and their impact on strategic thinking It considers the positions for both the United States and its allies in NATO and for the erstwhile Soviet Union It argues that military R and D which consumes an increasing proportion of total funds spent on R and D has developed a self sustaining technological momentum which is baked by a powerful military industrial bureaucratic technological complex and is increasingly out of control of political leaders The book argues that negotiations to limit the numbers of weapons fail to address the main problem and that more emphasis should be given to considering ways of limiting and controlling military R and D It concludes by proposing a radical shift in policy to achieve this This historical reference work is important for scholars and researchers of military studies defence studies international relations diplomacy and international politics

Arms Control and Technological Innovation David Carlton, Carlo Schaerf, 2024-11-02
First published in 1977 *Arms Control and Technological Innovation* is primarily concerned with three subjects: the causes of the arms race, the consequences of the arms race to the world and the control of the arms race. Written by experts in the field it brings themes like new technologies and new weapon systems, new tactics to replace tactical nuclear weapons in Europe, the Anglo American nuclear relationship, strategic arms limitation and military strategic concepts and a new approach to strategic arms limitation and reduction. The book argues that the principal problem of the arms race according to several lectures is that weapons and delivery systems technology have developed so much as to threaten the survival of civilization itself. The pace of technological change is proceeding more rapidly than ever before and there is serious doubt whether political institutions are adapting to this change in time to avoid devastating consequences to the world. This book is a must read for scholars and researchers of military and strategic studies.

Original Sin Bleddyn E. Bowen, 2022-10-27
Space technology was developed to enhance the killing power of the state. The Moon landings and the launch of the Space Shuttle were mere sideshows drawing public attention away from the real goal: military and economic control of space as a source of power on Earth. Today as Bleddyn E. Bowen vividly recounts, thousands of satellites work silently in the background to provide essential military intelligence and economic capabilities. No major power can do without them. Beyond Washington Moscow and Beijing, truly global technologies have evolved from the ground floor of the nuclear missile revolution to today's orbital battlefield, shaping the wars to come. World powers including India Japan and Europe are fully realising the strategic benefits of

commanding Earth's cosmic coastline as a stage for war development and prestige Yet as new contenders spend more and more on outer space there is scope for cautious optimism about the future of the Space Age if we can recognise rather than hide its original sin

Russia's New Generation Urban Warfare Umer Khan, Muhammad Ali Baig, 2025-07-13 Since the end of the Cold War the Russian military approach has been developing alongside its evolving strategic challenges The period under study 1991-2020 is important for Russia as it witnessed its Western rivals transition from the Cold War to Global War on Terror and the one of Great Power Competition Western interference in Russia's neighbouring countries and the surfacing of colour revolution against autocratic states were concerning to the Russian Federation This study intends to probe the Russian approach to urban warfare in the context of new strategic challenges since the end of the cold war 1991-2020 In this research the Russian strategic challenges and threats and the evolution of Russian military doctrine and thinking pertinent to fighting in the urban areas will be explored The research will analyse the efficacy of the Russian Military's New Generation Approach in contemporary urban battlespace as demonstrated in recent conflicts

The Logic of Humanitarian Arms Control and Disarmament Nik Hynek, Anzhelika Solovyeva, 2020-11-10 This novel and original book examines and disaggregates theoretically and empirically operations of power in international security regimes These regimes varying in degree from regulatory to prohibitory are understood as sets of normative discourses political structures and dependencies anarchies hierarchies and heterarchies and agencies through which power operates within a given security issue area with a regulatory effect In International Relations regime analysis has been dominated by several generations of regime theory theorization As this book makes clear not only has the IR Regime Theory been of limited utility for security domain due to its heavy focus on economic and environmental regimes but it too heuristically suffered from its rigid pegging to general IR Theory It is not surprising then that the evolution of IR Regime Theory has largely been mirroring the evolution of IR Theory in general from the neo realist neo liberal institutionalist convergence regime theory through cognitivism to constructivist regime theory The commitment of this book is to remedy this situation by bringing together robust power analysis and international security regimes It provides the reader with a theoretically and empirically uncompromising and comprehensive analysis of the selected international security regimes which goes beyond one or another school of IR Regime Theory In doing so it completely abandons existing and piecemeal analysis of regimes within the intellectual field of IR based on conventional

grand mid range theorization *Nuclear Proliferation and International Security* Sverre Lodgaard, Bremer Maerli, 2007-06-11 The Nuclear Non Proliferation Treaty has long been key in non proliferation and disarmament activities The Treaty is the major international legal obstacle for states seeking nuclear weapon capabilities In retrospect and despite setbacks the overall impact of the Nuclear Non Proliferation Treaty has been significant and gratifying Its continued success is by no means guaranteed As old nuclear dangers persist and new ones evolve policies to halt nuclear proliferation are more disparate than at any other time Nuclear weapons remain an essential part of the security policies of leading states and many developmental states maintain strong nuclear weapon ambitions while terrorists have actively been seeking nuclear capabilities In search of an overarching strategy that recognizes both the flaws of the existing non proliferation regime and the value of some of the corrections proposed by regime critics this volume assesses contemporary efforts to stem nuclear proliferation In doing so Nuclear Proliferation and International Security examines a number of cases with a view to recommending better non proliferation tools and strategies The contributors comprise renowned international scholars who have been selected to obtain the best possible analyses of critically important issues related to international non proliferation dynamics and the future integrity of the Non Proliferation Treaty *American Book Publishing Record* ,2006 **Quest for Space: The Indian Connect** ,2014-02-15 Human endeavours in space over the past six decades have reached a stage that just about every facet of human life today has some complement of space capability contributing to it encompassing the entire spectrum from telecommunications navigation weather forecasting remote sensing broadcasting and disaster management Space exploration actually owes its origins to matters military with civil applications coming about as a by product Capability building in space thereafter has witnessed frenzied progress in the spheres of both the military and the civil commercial With an ever increasing number of countries joining the space bandwagon space is getting congested and competitive International legislation on space though well meaning is largely viewed to be inadequate to address the concerns of equitable access to space and more alarmingly is reticent on the issue of militarisation and weaponisation The Indian presence in the global space order is rather significant Ranking sixth globally in terms of space budget and technological capability India is capable of going beyond its calling Its multi dimensional space programme spans almost the entire spectrum from space launch to satellite construction and their employment in a large array of development centric applications and in recent years in missions beyond the Earth The Mangalyaan mission to Mars currently underway symbolises India s indigenous technological prowess and is a harbinger of its capability of cementing its status as a responsible space player at the global level India thus stands today technologically robust and self reliant well poised in the global space order to look beyond its domestic charter and address the concerns of the international global community Space legislation situational awareness and international cooperation in space security are some of the geostrategic options analysed in this book which could facilitate Indian positioning in the global space order *Middle of Diamond India*

Shashank Mani,2023-09-15 Middle of Diamond India proposes a revolutionary idea that India has long ignored its largest and most talented segment citizens in the Tier 2 and Tier 3 districts its Middle The book reveals the hidden stories of those in its Middle who have been ignored owing to their location and language By examining India s revolutionary past its culture its citizens its innovators and its spirit the book illuminates this Diamond shaped India Replete with characters anecdotes insights research and accounts of an annual pilgrimage on a special train Jagriti Yatra and an enterprise ecosystem established in Deoria district the book outlines a new vision of India focussed on its rising Middle It proposes a Banyan Revolution over the coming twenty five years of Amrit Kaal using the tool of enterprise or Udyamita that can ignite a national renaissance The book argues that by recognizing and awakening the entrepreneurial vitality of those in small towns and districts we can create meaning for millions of citizens and define a new modernity for India *Forthcoming Books* Rose

Arny,2003 **British Defence Policy in a Changing World** John Baylis,2024-11-01 First published in 1977 British Defence Policy in a Changing World provides an analysis of the changes which have taken place in Britain s security policies since the Second World War Domestic political economic and social factors are discussed as well as the range of international circumstances which have influenced policy The approach is essentially a thematic one isolating several key issues and examining them in detail The authors use their skills to study a comprehensive range of affairs relating to Britain s security policy since 1945 The book may be divided into four main sections The first looks at the relationship between foreign policy and defence policy in general and more specifically at the three circles of British policy East of Suez the special relationship and Europe The second section looks at the place of nuclear weapons in defence policy The third section is concerned with defence economics national priorities and the recurring dilemmas of decision making while the final section concentrates on issues of civil military relations and discuss public attitudes towards defence in terms of their political implications This is a must read for scholars and researchers of international politics British politics defence and strategic studies
