When Crime Waves is intended to be a supplementary text for undergraduate criminology and sociology courses including Introduction to Criminology and Criminal Justice Crime when and where crimes occur and what contributes to the views on crime held by the police lawmakers and members of the general public AUUGN ,1993-12 The Culture of Control: Crime and Social Order in Contemporary Society David Garland,2001-03-29 The Culture of Control charts the dramatic changes in crime control and criminal justice that have occurred in Britain and America over the last 25 years It explains these transformations by showing how the social organization of late modern society has prompted a series of political and cultural adaptations that alter how governments and citizens think and act in relation to crime The book presents an original and in depth analysis of contemporary crime control revealing its underlying logics and rationalities and identifying the social relations and cultural sensibilities that have produced this new culture of control **Theories of Crime** Ian Marsh,2007-01-24 The book adopts an interactive style that encourages students to react to the text and think for themselves It includes a range of pedagogical features including reflective question breaks case studies with questions chapter summaries annotated further reading suggestions including websites and a glossary of key terms The book is edited by an experienced and widely published author and is written by a team who teach on a range of Criminology courses at both under and postgraduate levels A clear accessible and comprehensive review of theoretical thinking about crime the book uses an interdisciplinary approach Sociology Psychology and Biology Technocrime Stéphane Leman-Langlois,2013-05-13 This book is concerned with the concept of technocrime The term encompasses crimes committed on or with computers the standard definition of cybercrime but it goes well beyond this to convey the idea that technology enables an entirely new way of committing combating and thinking about criminality criminals police courts victims and citizens Technology offers for example not only new ways of combating crime but also new ways to look for unveil and label crimes and new ways to know watch prosecute and punish criminals Technocrime differs from books concerned more narrowly with cybercrime in taking an approach and understanding of the scope of technology s impact on crime and crime control It uncovers mechanisms by which behaviours become crimes or cease to be called crimes It identifies a number of corporate government and individual actors who are instrumental in this construction And it looks at the beneficiaries of increased surveillance control and protection as well as the targets of it Chapters in the book cover specific technologies e g the use of CCTV in various settings computers hackers and security experts photo radar but have a wider objective to provide a comparative perspective and some broader theoretical foundations for thinking about crime and technology than have existed hitherto This is a pioneering book which advances our understanding of the relationship between crime and technology drawing upon the disciplines of criminology political science sociology psychology anthropology surveillance studies and cultural studies Criminal Justice Research National Institute of Justice (U.S.),1980 **Criminal Justice research solicitation** National Institute of Justice (U.S.),1982 Making Sense of Youth Crime Jacqueline E. Ross,Thierry Delpuech,2023-03-09 This comparative empirical

study of policing in the United States and France draws on the authors ten years of field work to contend that the police in both countries should be thought about as an amalgam of five distinct professional cultures or intelligence regimes each of which can be found in any given police department in both the United States and France In particular we contend that what police do as knowledge workers and how they make sense of the social problems such as collective offending by juveniles varies with the professional subcommunities or intelligence regimes in which their particular knowledge work is embedded The same problem can be looked at in fundamentally different ways even within a single police department depending on the intelligence regime through which the problem is refracted

Co-production and Criminal Justice Diana

Johns,Catherine Flynn,Maggie Hall,Claire Spivakovsky,Shelley Turner,2022-08-09 This book explores practical examples of co production in criminal justice research and practice Through a series of seven case studies the authors examine what people do when they co produce knowledge in criminal justice contexts in prisons and youth detention centres with criminalised women from practitioners perspectives and with First Nations communities Co production holds a promise that people whose lives are entangled in the criminal justice system can be valued as participants and partners helping to shape how the system works But how realistic is it to imagine criminal justice service users participating partnering and sharing genuine decision making power with those explicitly holding power over them Taking a sophisticated yet accessible theoretical approach the authors consider issues of power hierarchy and different ways of knowing to understand the perils and possibilities of co production under the shadow of justice In exploring these complexities this book brings cautious optimism to co production partners and project leaders The book provides a foundational text for scholars and practitioners seeking to apply co production principles in their research and practice With stories from Australia the United Kingdom and Ireland the text will appeal to the international community For students of criminology and social work the book s critical insights will enhance their work in the field

The Oxford Handbook of Environmental Criminology Gerben Bruinsma,Shane D. Johnson,2018 The study of how the environment local geography and physical locations influence crime has a long history that stretches across many research traditions These include the neighborhood effects approach developed in the 1920s the criminology of place and a newer approach that attends to the perception of crime in communities Aided by new technologies and improved data reporting in recent decades research in environmental criminology has developed rapidly within each of these approaches Yet research in the subfield remains fragmented and competing theories are rarely examined together The Oxford Handbook of Environmental Criminology takes a unique approach and synthesizes the contributions of existing methods to better integrate the subfield as a whole Gerben J N Bruinsma and Shane D Johnson have assembled a cast of top scholars to provide an in depth source for understanding how and why physical setting can influence the emergence of crime affect the environment and impact individual or group behavior The contributors address how changes in the environment global connectivity and technology provide more criminal opportunities and new ways of committing old crimes They also

explore how crimes committed in countries with distinct cultural practices like China and West Africa might lead to different spatial patterns of crime This is a state of the art compendium on environmental criminology that reflects the diverse research and theory developed across the western world **Year in Review** National Institute of Justice (U.S.),2000
