 Questions and Case Studies is the collaborative effort that spanned a time period of 2 years and included 50 experts many
 whom are national leaders in their respected fields It also represents the passion and privilege we feel to teach the next
 generation of physicians in Transfusion Medicine and Apheresis The main goal for this book is to help the readers build a
 solid foundation of both basic and advanced conceptual knowledge to prepare for the American Board of Pathology ABP
 certification exam in Transfusion Medicine This book is not intended to be a substitute for textbooks original research or
 review articles and or clinical training Further since the field of medicine both from a scientific and regulatory perspective
 rapidly changes the readers are advised to continuously update their knowledge by attending national meetings and reading
 clinical journals To equip the readers with the basic knowledge in critical reading and data analysis which is an essential skill
 in daily medical practice a novel chapter titled Data Interpretation in Laboratory Medicine was included in this book In this
 chapter the readers are asked to make logical conclusions based on the given data and or statistical results Moreover there is
 also a chapter on Practical Calculations in Transfusion Medicine Apheresis and Hemostasis to help consolidate all the
 necessary formulas commonly used in daily practice for easy reference These chapters are unique to our book and will not be
 found in any other currently on the market All of the questions in this book were originally created by the authors of each
 chapter Each question can either be standalone or part of a case scenario representing challenge cases in Transfusion
 Medicine Apheresis and Hemostasis These questions often represent both rare and common clinical scenarios that the

authors have seen during their clinical practice Each question is then followed by 5 possible answers with only one being correct or the best answer After the question there is a conceptual explanation followed by a more factual explanation of the right and wrong answers We gave the individual authors the freedom to choose how they explained the wrong answer choices Some authors chose to be more direct e g Answer A is incorrect because while other authors chose a more conversational style e g Human resources answer A includes staffing selection orientation training and competency assessment of employees This format is designed to help the student linking the conceptual and factual knowledge together to form a solid foundation for use in clinical practice At the end of each chapter there is a list of articles and textbooks that will prove useful to the motivated student who wishes to become an expert in the field Another special feature to our textbook is the presence of a pre test and post test which are provided to help the readers with self assessment As stated above the main focus of this book is to help the readers preparing for the ABP certification exam in Transfusion Medicine However due to the interdisciplinary nature of the field of Transfusion Medicine Apheresis and Hemostasis we believe that this book is also beneficial to and can be used by all clinicians involved in the management of complex transfusion apheresis and hemostasis issues such as hematologists anesthesiologists surgeons and critical care physicians We further believe that it is a helpful guide for these specialists to prepare for their own specialty certification exam when the topics are related to Transfusion Medicine Apheresis and Hemostasis
