Many fall and get injured or worse end up killed all over the world especially in their place of work. Why does it happen? Does it have to be so? Can it be managed better and if so how? This book addresses these questions in layman's language yet with sufficient technical detail to satisfy the more curious and challenge the more ambitious. It looks at the mechanics of falls, accidents in the workplace, and safeguards that can be put in place. Featuring exercises at the end of chapters to underpin learning, this title concludes with unusual fall situations. Through its pages, the reader will develop a good understanding of how to prevent falls across a variety of different real-life scenarios.
