After Method Mess In Social Science Research:

After Method John Law, 2004 John Law argues that methods don't just describe social realities but are also involved in creating them. The implications of this argument are highly significant. If this is the case, methods are always political and it raises the question of what kinds of social realities we want to create. Most current methods look for clarity and precision. It is usually said that only poor research produces messy findings and the idea that things in the world might be fluid, elusive or multiple is unthinkable. Law's startling argument is that this is wrong and it is time for a new approach. Many realities, he says, are vague and ephemeral. If methods want to know and help to shape the world, then they need to reinvent themselves and their politics to deal with mess. That is the challenge. Nothing less will do. After Method John Law, 2004 **Good Victims**

Roxani Krystalli, 2024-04-23 In *Good Victims* Roxani Krystalli investigates the politics of victimhood as a feminist question. Based on in-depth engagement in Colombia over the course of a decade, Krystalli shows how victimhood becomes a pillar of reimagining the state in the wake of war and of bringing a vision of that state into being through bureaucratic encounters. The book also sheds light on the ethical and methodological dilemmas that arise when contemplating the legacies of transitional justice mechanisms. **Affected** Rick Iedema, 2020-11-30 This book's main message is to advocate for a collaborative, affective, visualised and future-oriented research agenda. The book finds its inspiration in the chasm that separates philosophising about being shattered and thinking that is shattered.

Heidegger 1946 Letter on Humanism. To explore this chasm, the book journeys through a range of psychological and posthuman perspectives on affect and becoming. The aim of this journey is to reconcile shattered thinking/feeling with Spinoza's ethics according to which our capacity to be affected determines our capacity to act. The book elaborates this capacity to become in terms of our uniquely human propensity to experiment with counter-intuitive inversions in this case to call to account that which is affected rather than that which affects. The book will appeal to students and academics working in the fields of alternative research methods, the social sciences and organisation studies. Messy Ethnographies in Action Alexandra Plows, 2019-02-04 This edited collection of chapters showcases original and interdisciplinary ethnographic fieldwork in a range of international settings including studies of underground pub life in North East England, Finnish hotels and bio-scientific institutions in the Amazonian rainforest.

Informed by John Law's concept of ethnographic mess, this book makes a unique empirically informed contribution to an understanding of the social construction of knowledge and the role that ethnography can and does play. Law 2004 It provides a range of colourful snapshots from the field showing how different researchers from multiple research environments and disciplines are negotiating the practicalities and epistemological and ethical implications of messy ethnographic practice as a means of researching messy social realities. Law notes that social science investigations interfere with the world; things change as a result. The issue then is not to seek disengagement but rather with how to engage. *ibid* p14 Drawing on their own situated experiences, the book's contributors address the messy implications of this and also explore

the equally messy issue of why engage They reflect on the process of undertaking research and their role in the research process as they negotiate their own position in the field What is ethnography for What impact should or do we have in the field and after we leave the research site What about unintended consequences When if ever are we off duty What does informed consent mean in a constantly shifting dynamic ethnographic context Is ethnography by its very nature a form of action research By providing a wide range of situated explorations of messy ethnographies the book presents a unique hands on guide to the challenges of negotiating ethnography in practice which will be of use to all researchers and practitioners who use ethnography as a method

social cultural economic and political factors play in determining or influencing the health of individuals communities and the larger society and nation This handbook is comprehensive in its nature and contents which range from a more disciplinary based approach and theoretical and methodological frameworks to different aspects of global public health It covers Discussions of the social science disciplines and their essence concepts and theories relating to global public health Theoretical frameworks in social sciences that can be used to explain health and illness in populations Methodological inquiries that social science researchers can use to examine global public health issues and understand social issues relating to health in different population groups and regions Examples of social science research in global public health areas and concerns as well as population groups The Handbook of Social Sciences and Global Public Health is a useful reference for students researchers lecturers practitioners and policymakers in global health public health and social science disciplines and libraries in universities and health and social care institutions It offers readers a good understanding of the issues that can impact the health and well being of people in society which may lead to culturally sensitive health and social care for people that ultimately will lead to a more equitable society worldwide Routledge Handbook on Consumption Margit Keller,Bente Halkier, Terhi-Anna Wilska, Monica Truninger, 2017-02-10 Consumption research is burgeoning across a wide range of disciplines The Routledge Handbook on Consumption gathers experts from around the world to provide a nuanced overview of the latest scholarship in this expanding field At once ambitious and timely the volume provides an ideal map for those looking to position their work find new analytic insights and identify research gaps With an intuitive thematic structure and resolutely international outlook it engages with theory and methodology markets and businesses policies politics and the state and culture and everyday life It will be essential reading for students and scholars across the social and economic sciences *The Entrepreneurial University* Y. Taylor, 2014-05-05 The entrepreneurial university has been tasked with making an impact This collection presents professional personal reflections on research experience and interpretative accounts of navigating fieldwork and broader publics politics and practices of dis engagement primarily through a feminist queer and gender studies lens *One Health, Environmental Health, Global Health, and Inclusive Governance: What can we do?* Ulrich Laaser, Vesna Bjegovic-Mikanovic, Richard Seifman, Flavia Senkubuge, Zeljka Stamenkovic, 2022-09-19 **The Curatorial** Jean-Paul Martinon, 2013-10-24 Stop curating And think what curating is all about This book starts from this simple premise thinking the activity of curating To do that it distinguishes between curating and the curatorial If curating is a gamut of professional practices for setting up exhibitions then the curatorial explores what takes place on the stage set up both intentionally and unintentionally by the curator It therefore refers not to the staging of an event but to the event of knowledge itself In order to start thinking about curating this book takes a new approach to the topic Instead of relying on conventional art historical narratives for example identifying the moments when artistic and curatorial practices merged or when the global curator author was first identified this book puts forward a multiplicity of perspectives that go from the

anecdotal to the theoretical and from the personal to the philosophical These perspectives allow for a fresh reflection on curating one in which suddenly curating becomes an activity that implicates us all artists curators and viewers not just as passive recipients but as active members As such the Curatorial is a book without compromise it asks us to think again fight against sweeping art historical generalizations the sedimentation of ideas and the draw of the sound bite Curating will not stop but at least with this book it can begin to allow itself to be challenged by some of the most complex and ethics driven thought of our times
