Aftershock Artists Respond To Disaster In Japan:

Aftershock Adam Pasion, 2011 **Women's Manga in Asia and Beyond** Fusami Ogi, Rebecca Suter, Kazumi Nagaike, John A. Lent, 2019-03-14 Women's Manga in Asia and Beyond offers a variety of perspectives on women's manga and the nature scope and significance of the relationship between women and comics manga both globally as well as locally Based on the activities since 2009 of the Women's MANGA Research Project in Asia WMRPA the edited volume elucidates social and historical aspects of the Asian wave of manga from ever broader perspectives of transnationalization and glocalization With a specific focus on women's direct roles in manga creation it illustrates how the globalization of manga has united different cultures and identities focusing on networks of women creators and readerships Taking an Asian regional approach combined with investigations of non Asian cultures which have felt manga's impact the book details manga's shift to a global medium developing uniting and involving increasing numbers of participants worldwide Unveiling diverse Asian identities and showing ways to unite them the contributors to this volume recognize the overlaps and unique trends that emerge as a result *A Brief History of Manga* Helen McCarthy, 2014-06-16 Manga is more than a genre in the comics field it is a vital creative medium in its own right with hundreds of millions of readers worldwide a host of graphic styles and a rich history now spanning seven decades Now for the first time that history is told by an award winning expert in the field Covering topics from Akira to Mazinger Z this book is fully illustrated throughout and photos of key creators accompany accessible sidebars and timelines Answering the key questions of any fan where did my favourite manga come from and what should I read next this book will open doors to neophytes and experts alike *Dealing with Disasters from Early Modern to Modern Times* Hanneke Asperen, Lotte Jensen, 2025-10-01 Disasters are as much cultural as natural phenomena For centuries news about catastrophic events has been disseminated through media such as chronicles pamphlets newspapers poems drawings and prints Nowadays we are overwhelmed with news about the cataclysmic effects of recent forest fires floods and storms Due to the ongoing climate crisis extreme weather events will likely have ever greater impacts on our lives This volume addresses cultural representations of catastrophes such as floods epidemics and earthquakes over the centuries In the past as now artists and authors try to make sense of disasters grasp their impact and communicate moral religious or political messages These creations reflect and shape how people learn and think about disasters that occur nearby or far away both in time and space The parallels between past and present underline how this book contributes to modern debates about cultural and creative strategies in response to disasters **Consuming Life in Post-Bubble Japan** Katarzyna J. Cwiertka, Ewa Machotka, 2025-10-01 This multidisciplinary book analyses the contradictory coexistence of consumerism and environmentalism in contemporary Japan It focuses on the dilemma that the diffusion of the concepts of sustainability and recycling has posed for everyday consumption practices and on how these concepts have affected and were affected by the production and consumption of art Special attention is paid to the changes in consumption practices and environmental

consciousness among the Japanese public that have occurred since the 1990s and in the aftermath of the earthquake tsunami and nuclear disasters of March 2011

The Post-Earthquake City Paul Cloke, David Conradson, Eric Pawson, Harvey C. Perkins, 2023-02-15 This book critically assesses Christchurch New Zealand as an evolving post earthquake city It examines the impact of the 2010 13 Canterbury earthquake sequence employing a chronological structure to consider damage and displacement recovery and renewal and the city in

transition It offers a framework for understanding the multiple experiences and realities of post earthquake recovery It details how the rebuilding of the city has occurred and examines what has arisen in the context of an unprecedented opportunity to refashion land uses and social experience from the ground up A recurring tension is observed between the desire and tendency of some to reproduce previous urban orthodoxies and the experimental efforts of others to fashion new cultures of progressive place making and attention to the more than human city The book offers several lessons for understanding disaster recovery in cities It illuminates the opportunities disasters create for both the reassertion of the familiar and the emergence of the new highlights the divergence of lived experience during recovery and considers the extent to which a post disaster city is prepared for likely climate futures The book will be valuable reading for critical disaster researchers as well as geographers sociologists urban planners and policy makers interested in disaster recovery

Abstract Journal in Earthquake Engineering ,1995 **Enabling People-Centered Risk Communication for Geohazards** Alessandro Amato,Sally H. Potter,Anna Scolobig,Eric M. Thompson,2024-07-18 In the field of natural hazards communicating science with the public and stakeholders involves entering the challenging and complex world of hazard and risk communication the ultimate purpose of which is to reduce the impact of impending hazards on people at risk According to the Sendai Framework 2015 2030 it is important to strengthen the utilization of media including social media traditional media big data and mobile phone networks to support national measures for successful disaster risk communication Sometimes risk communication has collateral and unexpected side effects that may lead to the adoption of inadequate behaviors In some instances this can even result in legal actions being taken against scientists and or emergency managers The role of the media should be to facilitate the accurate communication of hazard and risk information but such communication is often hampered by the fact that journalists have different agendas and priorities than scientists risk communicators and emergency managers This does not always support people in their decision making Accurate communication of hazard and risk is especially important when decisions have to be made within contexts where uncertainty is very high This is often the case with geohazards such as earthquakes tsunamis volcanic eruptions and landslides
