A large, stylized graphic of the letter 'Q' is formed by several concentric, thick black curved lines that sweep from the top left towards the bottom right. The lines are of uniform thickness and are separated by white space, creating a sense of depth and movement. The 'Q' is positioned in the center of the cover, with the title text placed within its central white space.

Agglomeration Economics Edward L. Glaeser, 2010-04-15 When firms and people are located near each other in cities and in industrial clusters they benefit in various ways including by reducing the costs of exchanging goods and ideas One might assume that these benefits would become less important as transportation and communication costs fall Paradoxically however cities have become increasingly important and even within cities industrial clusters remain vital Agglomeration Economics brings together a group of essays that examine the reasons why economic activity continues to cluster together despite the falling costs of moving goods and transmitting information The studies cover a wide range of topics and approach the economics of agglomeration from different angles Together they advance our understanding of agglomeration and its implications for a globalized world
