Suk, Kathleen M. Vogel, Amanda Jane Ozin, 2015-06-04 In September 2011 scientists announced new experimental findings that would not only threaten the conduct and publication of influenza research but would have significant policy and intelligence implications The findings presented a modified variant of the H5N1 avian influenza virus hereafter referred to as the H5N1 virus that was transmissible via aerosol between ferrets These results suggested a worrisome possibility the existence of a new airborne and highly lethal H5N1 virus that could cause a deadly global pandemic In response a series of international discussions on the nature of dual use life science arose These discussions addressed the complex social technical political security and ethical issues related to dual use research This Research Topic will be devoted to contributions that explore this matrix of issues from a variety of case study and international perspectives Handbook of Research on the Role of Human Factors in IT Project Management Misra, Sanjay, Adewumi, Adewole, 2019-09-27 The role humans play in the field of information technology continues to hold relevance even with the industry's rapid growth People contribute heavily to the physical cognitive and organizational domain of computing yet there is a lack of exploration into this phenomenon Humanoid aspects of technology require extensive research in order to avoid marginalization and insufficient data The Handbook of Research on the Role of Human Factors in IT Project Management is a collection of innovative research on the methods and applications of the task of human characteristics in the design and development of new technology While highlighting topics including digitalization risk management and task analysis this book is ideally designed for IT professionals managers support executives project managers managing directors academicians researchers and students seeking current research on the dynamics of human influence in technological projects *Sqa Specimen Paper 2014 Past Paper National 5 Biology and Hodder Gibson* Hodder, SQA, 2014-09-26 **Systems biology and ecology of microbial mat communities** Martin G. Klotz, Donald A. Bryant, Jim K. Fredrickson, William P. Inskeep, Michael Köhl, 2016-04-11 Microbial mat communities consist of dense populations of microorganisms embedded in exopolymers and or biomineralized solid phases and are often found in mm cm thick assemblages which can be stratified due to environmental gradients such as light oxygen or sulfide Microbial mat communities are commonly observed under extreme environmental conditions deriving energy primarily from light and or reduced chemicals to drive autotrophic fixation of carbon dioxide Microbial mat ecosystems are regarded as living analogues of primordial systems on Earth and they often form perennial structures with conspicuous stratifications of microbial populations that can be studied in situ under stable conditions for many years Consequently microbial mat communities are

ideal natural laboratories and represent excellent model systems for studying microbial community structure and function microbial dynamics and interactions and discovery of new microorganisms with novel metabolic pathways potentially useful in future industrial and or medical applications Due to their relative simplicity and organization microbial mat communities are often excellent testing grounds for new technologies in microbiology including micro sensor analysis stable isotope methodology and modern genomics Integrative studies of microbial mat communities that combine modern biogeochemical and molecular biological methods with traditional microbiology macro ecological approaches and community network modeling will provide new and detailed insights regarding the systems biology of microbial mats and the complex interplay among individual populations and their physicochemical environment These processes ultimately control the biogeochemical cycling of energy and or nutrients in microbial systems Similarities in microbial community function across different types of communities from highly disparate environments may provide a deeper basis for understanding microbial community dynamics and the ecological role of specific microbial populations Approaches and concepts developed in highly constrained relatively stable natural communities may also provide insights useful for studying and understanding more complex microbial communities

Chinese Students in UK Further Education Rosemary A. Reynolds, 2017-12-15 Chinese students in the UK have been increasing in number for many years yet competition from other Western educators and increasing investment in China's own education system has led to concern that UK institutions may soon see a decline in their market share Dr Reynolds addresses this issue in Chinese Students in UK Further Education by attempting to understand students' experiences from their perspective Beginning with an exploration of why these students choose to come and study in the UK and why they are coming at younger ages the book goes on to discuss topics such as risk technology and diversity in order to understand which factors have the greatest influence on where they choose to study and whether they choose to remain at an

institution Drawing on data from two different education institutions providers of GCSE A level programmes for students aged 16 18 years Dr Reynolds attempts to understand what these students experience during their studies how they manage new social relationships and whether upon course completion they achieved the results they desired at the outset Moreover the book aims to ascertain whether the students feel in hindsight that the decision to risk investing in UK further education was right and what they might communicate about UK study to contacts in China and elsewhere The book examines what further education institutions do well and where they might improve to help develop Chinese students educational experiences As such it will be essential reading for academics researchers and postgraduates in the fields of further education sociology of education international and intercultural education and mobility studies
