

Question 5

- (a) The diagram given below shows a section of a human kidney. Study the diagram carefully and answer the questions that follow:

- (i) Label the parts numbered 1 to 4.
- (ii) Why does part '2' have a striped appearance?
- (iii) What is the fluid that passes down part '4'? Name the main nitrogenous waste present in it.
- (iv) Mention the structural and functional units of kidneys.
- (v) Name the two major steps in the formation of the fluid mentioned in Q. 5(a) (iii) [5]
- (b) Draw neat and labelled diagrams of the following:
- (i) Malpighian Capsule.
- (ii) A Myelinated Neuron. [5]

Examiners' Comments

- (a) (i) The question was correctly answered by most candidates.
- (ii) Most candidates wrote the correct answer. Some were unsure of the parts of the kidney and hence could not explain the striped appearance of medulla.
- (iii) Answered correctly by all candidates.
- (iv) Most candidates wrote the correct answer. A few were careless and wrote neuron for nephron.
- (v) Most candidates answered correctly.
- (b) (i) Majority of candidates drew the diagram of the entire nephron instead of just the Malpighian capsule. Some were unaware of the difference in diameter of the Afferent and Efferent arteriole. It was evident that candidates were not trained to draw this diagram.

Suggestions for teachers

- Interactive boards may be used to explain the process of urine formation.
- Advise students not to draw the entire nephron for Malpighian capsule.
- Significance related to difference in diameter of Afferent and Efferent arteriole must be explained.
- While teaching the structure of nephron, the different parts lying in Renal Cortex and Renal medulla must be emphasized.
