Biust Application Online Undergraduates:

Information Services for a Sustainable Society Madeleine C. Fombad, Collence Takaingenhamo Chisita, Omwoyo Bosire Onyancha, Mabel K. Minishi-Majanja, 2023-07-24 The publication seeks to establish how information professionals are providing information services in a sustainable society in an era of information disorder. It also provides the strategic direction to strengthen the global voice of libraries inspiring and enhancing professional practice as well as enhancing international cooperation and collaboration among LIS educators and practitioners. The contents are divided according to the following key sub themes that resonate with the title as outlined below: Library and information services in the information age; Data and records in an era of information disorder; Archives data curation and preservation in the digital era; Data science analytics and visualization; Information ethics in the digital era; Information deluge in the digital era; Information and knowledge management; Fourth Industrial revolution. The highlighted themes explore critical issues relating to how libraries, archives and related institutions are responding to the seismic shifts in the information landscape amidst a myriad of challenges and opportunities. The sub themes bring together a tapestry of articles that explore the status, experiences and future prospects of the dynamic library and information science practice. *New Media and the Mediatization of Religion* Gabriel Faimau, William O. Lesitaokana, 2018-10-01 New media including digital and social media play a central role in producing and reproducing socio cultural and religious practices. Its presence has not only resulted in changes to the ways in which religious beliefs are practiced but has also altered the way religious meanings are expressed. How has new media technology informed and influenced religious engagement and participation? In what ways has new media technology enabled religious groups to practice and preach their religious beliefs to a broader audience? To what extent has the emergence of social media and social networking sites shaped religious discourses and religious practices? This volume offers a unique Africa centred perspective in response to these questions. While presenting new scholarly developments in the fields of media, religion and culture in Africa, this book also provides empirical and theoretical insights into the intersection between new media and religion.
