

- the most accessible - world-mapping.com/world
- When you are satisfied with a combination of continents to move, click the map "Map of the world continents"

3. Study world's super map of Pangaea

- How will do the continents fit together?

They fit perfectly well - but is it true that they fit as a whole? Pangaea existed but was there any gap in the map?

- Is it perfect fit?

No, this is a perfect fit because all of the continents fit perfectly well and there is no gap in the map - but is there some other?

- How about how the continents got there where they are now or where they were today. There is some evidence that the continents could have moved the way they fit.

No, they could have moved the way they moved all the time and they fit together. This is possible when the continents could have moved hundreds of the miles during 100s of millions.

- Compare Pangaea's present super map of Pangaea to your observations and theories - with a different map, and with other maps.
