Ageism And Mistreatment Of Older Workers Current Reality Future Solutions:

Ageism and Mistreatment of Older Workers Patricia Brownell, James J. Kelly, 2012-12-11 This book promotes an understanding of ageism discrimination and mistreatment of older adult workers incorporating an international human rights perspective The impact of ageism on the mistreatment of older adult workers has not to date been examined in depth through the lens of international human rights instruments nor has discrimination against older adults in the workplace been framed as a form of elder abuse for research and policy making purposes This book presents a multi disciplinary exploration of these themes as they affect work and retirement of older adults It reflects the view that older people who choose to work into old age should be able to do so in enabling work environments that promote dignity and are free of abuse The contributing authors come from many disciplines including law psychology social work business and international affairs Many are members of the International Network for the Prevention of Elder Abuse INPEA a non governmental organization with consultative status at the United Nations and have devoted their professional careers to increase awareness and understanding of elder abuse in order to prevent it The editors hope that broadening the framework within which elder abuse in the workplace is understood will stimulate further research policy and program development to address this troubling social problem

ENDORSEMENTS

I am delighted to recommend this volume which uncovers two important truths to the success of the UN

- 1 The critical role of civil society that makes the UN more humane
- 2 The important role of behavioral sciences in shaping UN policies to produce successful outcomes

Because of the UN we've not had a third world war yet Human Rights have expanded beyond belief of anyone who founded the UN 75 years ago

Bruce Knotts U S diplomat author and Chair of the U N DPI NGO Executive Committee

As this new volume describes the world is a better place because of the United Nations where most of the world comes together with diverse and lofty goals such as protecting the environment promoting health supporting equality and maintaining peace

All of these major goals require interventions that sometimes maintain and sometimes change human behavior

National and international policies need to be informed by the best available research in the behavioral sciences

Our future depends on it

Diane F Halpern PhD Former President American Psychological Association

Attaining the United Nations 17 Sustainable Development Goals SDGs by 2030 is a formidable challenge that can be furthered by a foundation of solid evidence

This book provides a base of relevant psychological knowledge that can inform policy and interventions in the achievement of those goals

Judith A Gibbons PhD Past President Interamerican Society of Psychology

The authors make a convincing case for the relevance of behavioral sciences to the work of the United Nations

Progress on women's rights preparing for and recovering from natural disasters adapting to climate change improving child well being and more all have behavioral dimensions

These must be addressed for the UN to make progress on its goals

By chronicling the involvements of psychology and social work in the United Nations this volume will inspire students and practitioners to engage further in global work and advocacy

Lynne Healy PhD International Association of Schools of Social Work

Behavioral Science in the Global Arena a timely and significant volume about the role of psychologists at the UN addressing our contemporary social problems i.e. human rights social justice climate and environmental change

As Congress Takooshian and Asper demonstrate it is time for psychologists to move from their individual focus toward social change at a macro diverse and global focus following the UN's 17 sustainable development goals for 2030

We need to acknowledge changing population demographics growing mobility and aging in our population and recognize the continued gender inequities and disparities among migrants salient today

No longer can we simply consider psychology's role in the aftermath of disaster but to be proactive and on the forefront about counterterrorism climate change etc to promote global action so that we think and act together toward shared social change

Jean Lau Chin EdD ABPP Past President International Division American Psychological Association

As the UN celebrates its diamond anniversary it is fitting that thinkers in psychology provide critical insights into psychology's engagement with the UN SDG Agenda

The authors have carefully considered the UN from many vantage points especially behavioural

This important volume posits fresh ideas for psychology's role and future impact in the only global body that brings all governments together to tackle the social economic political and security factors that are essential for peace and collective human development in
