Argument Realization Research Surveys In Linguistics:

Argument Realization Beth Levin, 2005 **The End of Argument Structure?** Maria Cristina Cuervo, Yves Roberge, 2012 Includes papers that explore the issues and re assess generally accepted premises on the relationship between lexical meaning and the morphosyntax of sentences by confronting two competing approaches to this issue *The Syntax of Argument Structure* Artemis Alexiadou, Elisabeth Sophia Maria Verhoeven, 2021-11-08 Bridging theoretical modelling and advanced empirical techniques is a central aim of current linguistic research The progress in empirical methods contributes to the precise estimation of the properties of linguistic data and promises new ways for justifying theoretical models and testing their implications The contributions to the present collective volume take up this challenge and focus on the relevance of empirical results achieved through up to date methodology for the theoretical analysis and modelling of argument structure They tackle issues of argument structure from different perspectives addressing questions related to diverse verb types unaccusatives unergatives di transitives psych verbs morpho syntactic operations prefixation simple vs particle verbs case distinctions dative vs accusative case vs prepositions argument and voice alternations dative vs benefactive alternation active vs passive word order alternations and the impact of animacy agentivity and eventivity on argument structure The volume will be of interest to theoretical linguists psycholinguists and corpus linguists interested in the syntax of argument structure and its modelling using precise empirical methods Case, Argument Structure, and Word Order Shigeru Miyagawa, 2012 Over the years a major strand of Miyagawa s research has been to study how syntax case marking and argument structure interact In particular Miyagawa s work addresses the nature of the relationship between syntax and argument structure and how case marking and other phenomena help to elucidate this relationship In this collection of new and revised pieces Miyagawa expands and develops new analyses for numeral quantifier stranding ditransitive constructions nominative genitive alternation syntactic analysis of lexical and syntactic causatives and historical change in the accusative case marking from Old Japanese to Modern Japanese All of these analyses demonstrate an intimate relation among case marking argument structure and word order Investigations of the Syntax-semantics-pragmatics Interface Robert D. Van Valin, 2008 *Investigations of the Syntax Semantics Pragmatics Interface* presents on going research in Role and Reference Grammar in a number of critical areas of linguistic theory verb semantics and argument structure the nature of syntactic categories and syntactic representation prosody and syntax information structure and syntax and the syntax and semantics of complex sentences In each of these areas there are important results which not only advance the development of the theory but also contribute to the broader theoretical discussion In particular there are analyses of grammatical phenomena such as transitivity in Kabardian the verb less numeral quantifier construction in Japanese and an unusual kind of complex sentence in Wari Chapakuran Brazil which not only illustrate the descriptive and explanatory power of the theory but also present interesting challenges to other approaches In addition there are papers looking at the

implications and applications of Role and Reference Grammar for neurolinguistic research parsing and automated text analysis

Theoretical and Crosslinguistic Approaches to the Semantics of Aspect Susan Deborah Rothstein, 2008 The papers in this volume investigate the semantics of aspect from both a theoretical and cross linguistic point of view in a wide range of languages from a number of different language families The papers are all informed by the belief that a thorough exposure to the expression of aspect cross linguistically is crucial for progress in understanding how the semantics of aspect and what the semantic basis of aspectual distinctions is The languages discussed include Russian English Dutch Hebrew Mandarin Japanese and Kalaallisut The issues discussed in this volume include the centrality of measuring and counting in an understanding of telicity the importance of the singular plural distinction in the study of aspect the importance of homogeneity as a property of event types the flexibility of lexical classes and the interaction between expressions of aspect and the particular morphosyntactic structure of a language

Productivity in Argument Selection Amir Zeldes, 2012-12-06 This book centers on the idea that some verbs and other argument structure constructions have an inherently different propensity to realize lexically unfamiliar arguments independently of lexical semantic meaning This notion is explored both qualitatively using selected examples and quantitatively using large amounts of corpus data in both cases primarily from English and German

The Cambridge Handbook of Generative Syntax Marcel den Dikken, 2013-07-25 Syntax the study of sentence structure has been at the centre of generative linguistics from its inception and has developed rapidly and in various directions The Cambridge Handbook of Generative Syntax provides a historical context for what is happening in the field of generative syntax today a survey of the various generative approaches to syntactic structure available in the literature and an overview of the state of the art in the principal modules of the theory and the interfaces with semantics phonology information structure and sentence processing as well as linguistic variation and language acquisition This indispensable resource for advanced students professional linguists generative and non generative alike and scholars in related fields of inquiry presents a comprehensive survey of the field of generative syntactic research in all its variety written by leading experts and providing a proper sense of the range of syntactic theories calling themselves generative

Head-Driven Phrase Structure Grammar Stefan Müller, Anne Abeillé, Robert D. Borsley, Jean-Pierre Koenig, 2024-11-07 Head Driven Phrase Structure Grammar HPSG is a constraint based or declarative approach to linguistic knowledge which analyses all descriptive levels phonology morphology syntax semantics pragmatics with feature value pairs structure sharing and relational constraints In syntax it assumes that expressions have a single relatively simple constituent structure This volume provides a state of the art introduction to the framework Various chapters discuss basic assumptions and formal foundations describe the evolution of the framework and go into the details of the main syntactic phenomena Further chapters are devoted to non syntactic levels of description The book also considers related fields and research areas gesture sign languages computational linguistics and includes chapters comparing HPSG with

other frameworks Lexical Functional Grammar Categorical Grammar Construction Grammar Dependency Grammar and Minimalism

Approaches to Complex Predicates Léa Nash, Pollet Samvelian, 2016-04-26 Complex predicates can be loosely defined as a sequence of items that behave as a single predicate projecting a single argument structure within a clause Each of the members of the predicate contributes part of the information ordinarily associated with a single head The present volume presents a collection of theoretical linguistic results on the study of complex predicates in different perspectives and with a variety of approaches Important empirical and theoretical issues cutting across various subfields of linguistics are being addressed in this book such as Syntactic and semantic modeling of complex predicate formation compositionality argument structure event structure Differences between syntactic and morphological processes of lexeme formation Typological and diachronic issues in complex predicate formation Neo Davidsonian analyses of abstract predicate decomposition and its morphological correlates Contributors are Ane Berro Denis Creissels Hannah Gibson Adele Goldberg Lutz Marten Annie Montaut L a Nash Pooja Paul Pollet Samvelian Peter Svenonius and Susanne Wurmbrand

Metadata and Semantic Research Elena García-Barriocanal, Zeynel Cebeci, Aydin Öztürk, Mehmet C. Okur, 2011-09-29 This volume constitutes the selected papers of the 5th International Conference on Metadata and Semantic Research MTSR 2011 held in Izmir Turkey in October 2011 The 36 full papers presented together with 16 short papers and project reports were carefully reviewed and selected from 118 submissions The papers are organized in topical sections on Tracks on Metadata and Semantics for Open Access Repositories and Infrastructures Metadata and Semantics for Learning Infrastructures Metadata and Semantics for Cultural Collections and Applications Metadata and Semantics for Agriculture Food and Environment

Competing Motivations in Grammar and Usage Brian MacWhinney, Andrei L'vovich Mal'chukov, Edith A. Moravcsik, 2014 This volume examines the conflicting factors that shape the content and form of grammatical rules in language usage Speakers and addressees need to contend with these rules when expressing themselves and when trying to comprehend messages For example there are on going competitions between the speaker's interests and the addressee's needs or between constraints imposed by grammar and those imposed by online processing These competitions influence a wide variety of systems including case marking agreement and word order politeness forms lexical choices and the position of relative clauses Chapters in the book analyse grammar and usage in adult language as well as first and second language acquisition and the motivations that drive historical change Several of the chapters seek explanations for the competitions involved based on earlier accounts including the Competition Model Natural Morphology the functional typological tradition and Optimality Theory The book will be of interest to linguists from a wide variety of backgrounds particularly those interested in psycholinguistics historical linguistics philosophy of language and language acquisition from advanced undergraduate level upwards

Comparative Germanic Syntax Peter Ackema, 2012 The present volume contains a selection of papers presented at the 23rd and 24th Comparative Germanic Syntax Workshop held at the University of

Edinburgh and the Hogeschool Universiteit Brussels The contributions provide new perspectives on several topics of current interest for syntactic theory on the basis of comparative data from a wide range of Germanic languages Among the theoretical and empirical issues explored are various ellipsis phenomena the internal structure of the DP the syntax morphology interface the syntax semantics interface Binding Theory various diachronic developments and do support type phenomena This book is of interest to syntacticians with an interest in theoretical comparative and or diachronic work as well as to morphologists and semanticists interested in the connections their fields have with syntax It will also be of interest to graduate and advanced undergraduate students in linguistic disciplines *The evolution of case grammar* Remi van Trijp,2016 There are few linguistic phenomena that have seduced linguists so skillfully as grammatical case has done Ever since Panini 4th Century BC case has claimed a central role in linguistic theory and continues to do so today However despite centuries worth of research case has yet to reveal its most important secrets This book offers breakthrough explanations for the understanding of case through agent based experiments in cultural language evolution The experiments demonstrate that case systems may emerge because they have a selective advantage for communication they reduce the cognitive effort that listeners need for semantic interpretation while at the same time limiting the cognitive resources required for doing so

Cognitive Aspects of Computational Language Acquisition Aline Villavicencio,Thierry Poibeau,Anna Korhonen,Afra Alishahi,2013-01-11 Questions related to language acquisition have been of interest for many centuries as children seem to acquire a sophisticated capacity for processing language with apparent ease in the face of ambiguity noise and uncertainty However with recent advances in technology and cognitive related research it is now possible to conduct large scale computational investigations of these issues The book discusses some of the latest theoretical and practical developments in the areas involved including computational models for language tasks tools and resources that help to approximate the linguistic environment available to children during acquisition and discussions of challenging aspects of language that children have to master This is a much needed collection that provides a cross section of recent multidisciplinary research on the computational modeling of language acquisition It is targeted at anyone interested in the relevance of computational techniques for understanding language acquisition Readers of this book will be introduced to some of the latest approaches to these tasks including Models of acquisition of various types of linguistic information from words to syntax and semantics and their relevance to research on human language acquisition Analysis of linguistic and contextual factors that influence acquisition Resources and tools for investigating these tasks Each chapter is presented in a self contained manner providing a detailed description of the relevant aspects related to research on language acquisition and includes illustrations and tables to complement these in depth discussions Though there are no formal prerequisites some familiarity with the basic concepts of human and computational language acquisition is beneficial **The Architecture of Cognition** Paco Calvo,John Symons,2014-04-18 In 1988 Jerry Fodor and Zenon Pylyshyn challenged connectionist theorists to explain the systematicity

of cognition In a highly influential critical analysis of connectionism they argued that connectionist explanations at best can only inform us about details of the neural substrate explanations at the cognitive level must be classical insofar as adult human cognition is essentially systematic This volume reassesses Fodor and Pylyshyn's systematicity challenge for a post connectionist era covering the most important recent developments in the systematicity debate **Design Patterns in Fluid Construction Grammar** Luc Steels, 2011 Construction Grammar is enthusiastically embraced by a growing group of linguists who find it a natural way to formulate their analyses But so far there is no widespread formalization of construction grammar with a solid computational implementation Fluid Construction Grammar attempts to fill this gap It is a fully operational computational framework capturing many key concepts in construction grammar The present book is the first extensive publication describing this framework In addition to general introductions it gives a number of concrete examples through a series of linguistically challenging case studies including phrase structure case grammar and modality The book is suited both for linguists who want to know what Fluid Construction Grammar looks like and for computational linguists who may want to use this computational framework for their own experiments or applications **Case, Animacy and Semantic Roles** Seppo Kittilä, Katja Västi, Jussi Ylikoski, 2011 The chapters of this volume scrutinize the interplay of different combinations of case animacy and semantic roles thus contributing to our understanding of these notions in a novel way The focus of the chapters lies on showing how animacy affects argument marking Unlike previous studies these chapters primarily deal with lesser studied phenomena such as animacy effects on spatial cases and the differences between cases and adpositions in the coding of spatial relations In addition theoretical and diachronic issues related to case and semantic roles are also discussed for example what is case how do cases develop and what are the functional differences between cases and adpositions The chapters deal with a variety of different languages including Uralic languages Indo European languages Basque Korean and Vaeakau-Taumako The book is appealing to anyone interested in case animacy and or semantic roles

Sign Language Roland Pfau, Markus Steinbach, Bencie Woll, 2012-08-31 Sign language linguists show here that all questions relevant to the linguistic investigation of spoken languages can be asked about sign languages Conversely questions that sign language linguists consider even if spoken language researchers have not asked them yet should also be asked of spoken languages The HSK handbook Sign Language aims to provide a concise and comprehensive overview of the state of the art in sign language linguistics It includes 44 chapters written by leading researchers in the field that address issues in language typology sign language grammar psycholinguistics neurolinguistics sociolinguistics and language documentation and transcription Crucially all topics are presented in a way that makes them accessible to linguists who are not familiar with sign language linguistics **Transitivity and Object Marking in Biblical Hebrew** Peter Bekins, 2018-08-14 Based on author's dissertation doctoral Hebrew Union College Jewish Institute of Religion 2012
