Biology Introduction

Biology is the scientific study of living organisms and their interactions with the environment. It encompasses a wide range of topics, from the molecular and cellular level to entire ecosystems and the biosphere. Let's explore some key areas of biology:

1. Cell Structure:

- Cells are the basic units of life and can be classified into two types: prokaryotic and eukaryotic cells.
- Prokaryotic cells lack a nucleus and other membrane-bound organelles, while eukaryotic cells have a distinct nucleus and various organelles.
- The three main regions of a eukaryotic cell are the nucleus, cytoplasm, and plasma membrane.
