of restoring natural capital The book focuses on developing strategies that can achieve the best outcomes in the shortest amount of time as it considers conceptual and theoretical issues from both an economic and ecological perspective examines specific strategies to foster the restoration of natural capital and offers a synthesis and a vision of the way forward Nineteen case studies from around the world illustrate challenges and achievements in setting targets refining approaches to finding and implementing restoration projects and using restoration of natural capital as an economic opportunity Throughout contributors make the case that the restoration of natural capital requires close collaboration among scientists from across disciplines as well as local people and when successfully executed represents a practical realistic and essential tool for achieving lasting sustainable development [Book Chat](#) William George Jordan,Adr Schade van Westrum,1889
