financialization had already exacerbated social divisions in the UK prior to the pandemic The political blueprint behind these measures combined Privatized Keynesianism and the Asset Economy To explain economists have highlighted that inequality derives from the fact that income from wealth increases at a faster rate than income from wages The ensuing political assumption is that in the face of pressures on public finances promoting asset ownership is the best alternative to government funded welfare schemes What this meant as the pandemic unfolded was that when tough decisions about resource allocation needed to be made the UK Treasury and the Bank of England found almost unlimited funds to rescue and protect asset holders and middle income homeowners whilst reverting to a narrative of misfortune for the asset less poor This book assesses the political decisions taken by UK policymakers during 2020 21 and their consequences In doing so it challenges policymakers and the informed public to re consider the morality of inequality and to make alternative decisions to promote a more ecologically sustainable caring equal and prosperous society *Lectures on Architecture and Painting, Delivered at Edinburgh, in November, 1853* John Ruskin,1890
