ICIE 2015 3rd International Conference on Innovation and Entrepreneurship Deresh Ramjugernath, 2015-02-24 These proceedings represent the work of researchers participating in the 3rd International Conference on Innovation and Entrepreneurship ICIE 2015 which is being co hosted by The University of KwaZulu Natal Durban and the Ethekwini Municipality Durban South Africa on the 19 20 March 2015 The ICIE Conference constitutes a valuable platform for individuals to present their research findings display their work in progress and discuss conceptual advances in many different branches of innovation and entrepreneurship in business and management At the same time it provides an important opportunity for researchers and managers to come together with peers share knowledge and exchange ideas ICIE builds on the now well established European Conference on Innovation and Entrepreneurship and allows universities outside the European Boundaries the opportunity to host an academic conference on these important topics In addition to the presentations of research the conference will feature a knowledge cafe led by Dr Shawren Singh looking at this topic How can academics focus research efforts to better serve the business and public sector communities The second day will open with a panel discussion looking at Smart cities Opportunities for Entrepreneurship and Economic growth Following an initial submission of 85 abstracts that have undergone a double blind peer review process 26 research papers 3 PhD research papers 2 work in progress papers are published in these Conference Proceedings representing research results from the Czech Republic Denmark Italy Kazakhstan Kenya Lithuania Nigeria Poland Saudi Arabia South Africa Sweden The Netherlands UK USA and Zambia

Advanced Surface Coating Techniques for Modern Industrial Applications Roy, Supriyo, Bose, Goutam Kumar, 2020-09-18 In engineering there are often situations in which the material of the main component is unable to sustain long life or protect itself from adverse operating environments Moreover in some cases different material properties such as anti friction and wear anti corrosive thermal resistive super hydrophobic etc are required as per the operating conditions If those bulk components are made of such materials and possess those properties the cost will be very high In such cases a practical solution is surface coating which serves as a protective barrier to the bulk material from the adverse environment In the last decade with enormous effort researchers and scientists have developed suitable materials to overcome those unfavorable operating conditions and they have used advanced deposition techniques to enhance the adhesion and surface texturing of the coatings Advanced Surface Coating Techniques for Modern Industrial Applications is a highly sought reference source that compiles the recent research trends in these new and emerging surface coating materials deposition techniques properties of coated materials and their applications in various engineering and industrial fields The book particularly focuses on 1 coating materials including anti corrosive materials and nanomaterials 2 coating methods including thermal spray and electroless disposition and 3 applications such as surface engineering and thin film application The book is ideal for engineers scientists researchers academicians and students working in fields like

material science mechanical engineering tribology chemical and corrosion science bio medical engineering biomaterials and aerospace engineering

Handbook of Research on Advancements in Manufacturing, Materials, and Mechanical Engineering Burstein, Leonid, 2020-09-18 Production new materials development and mechanics are the central subjects of modern industry and advanced science With a very broad reach across several different disciplines selecting the most forward thinking research to review can be a hefty task especially for study in niche applications that receive little coverage For those subjects collecting the research available is of utmost importance The Handbook of Research on Advancements in Manufacturing Materials and Mechanical Engineering is an essential reference source that examines emerging obstacles in these fields of engineering and the methods and tools used to find solutions Featuring coverage of a broad range of topics including fabricating procedures automated control and material selection this book is ideally designed for academics tribology and materials researchers mechanical physics and materials engineers professionals in related industries scientists and students

Handbook of Research on Advancements in the Processing, Characterization, and Application of Lightweight Materials Kumar, Kaushik, Babu, B. Sridhar, Davim, J. Paulo, 2021-11-19 In the automotive industry the need to reduce vehicle weight has given rise to extensive research efforts to develop aluminum and magnesium alloys for structural car body parts In aerospace the move toward composite airframe structures urged an increased use of formable titanium alloys In steel research there are ongoing efforts to design novel damage controlled forming processes for a new generation of efficient and reliable lightweight steel components All these materials and more constitute today's research mission for lightweight structures They provide a fertile materials science research field aiming to achieve a better understanding of the interplay between industrial processing microstructure development and the resulting material properties The Handbook of Research on Advancements in the Processing Characterization and Application of Lightweight Materials provides the recent advancements in the lightweight materials processing manufacturing and characterization This book identifies the need for modern tools and techniques for designing lightweight materials and addresses multidisciplinary approaches for applying their use Covering topics such as numerical optimization fatigue characterization and process evaluation this text is an essential resource for materials engineers manufacturers practitioners engineers academicians chief research officers researchers students and vice presidents of research in government industry and academia

Handbook of Research on Nurturing Industrial Economy for Africa's Development Nafukho, Frederick Muyia, Boniface Makulilo, Alexander, 2021-03-19 A robust manufacturing sector is a necessity and a sufficient condition for any country's human and economic development as it creates employment and alleviates poverty During this Fourth Industrial Revolution era there is an urgent need in Africa to optimally utilize the existing resources to support manufacturing or else risk allowing the continent to fall behind in the industrial economy Innovative strategies are needed that can unlock Africa's manufacturing potential by exploring key areas that may help Africa mature and launch modernized economies that will benefit the developed world's industrial economy

The Handbook of Research on Nurturing Industrial Economy for Africa's Development examines various innovations necessary for Africa's economic development including drivers of the manufacturing economy such as education agriculture human capital science and technological innovations language politics and business environments The book explores strategies to increase Africa's economic diversity complexity productivity and ultimately competitiveness and for the continent to realize its manufacturing industrial potential Further chapters focus on African countries industrial economies in the African context and facilitating the fulfillment of the Sustainable Development Goals SDGs and the African Union's Agenda 2063 This book is a valuable reference tool for government officials economists industrialists practitioners stakeholders researchers academicians and students interested in the industrial economic development of Africa

Fused Deposition Modeling Fredrick Madaraka Mwema, Esther Titilayo Akinlabi, 2020-05-29 In this book fused deposition modeling FDM is described with focus on product quality control and enhancement The book begins by introducing the basics of FDM and its associated process parameters Then strategies for quality control and enhancement are described using case studies of both original results by the authors and from published literature Resolution and print orientation multi objective optimizations and surface engineering are identified and discussed as the strategies for enhancing the quality of FDM products in this book

Thin Film Coatings Fredrick Madaraka Mwema, Tien-Chien Jen, Lin Zhu, 2022-06-19 Thin Film Coatings Properties Deposition and Applications discusses the holistic subject of conventional and emerging thin film technologies without bias to a specific technology based on the existing literature It covers properties and delves into the various methods of thin film deposition including the most recent techniques and a direction for future developments It also discusses the cutting edge applications of thin film coatings such as self healing and smart coatings biomedical hybrid and scalable thin films Finally the concept of Industry 4.0 in thin film coating technology is examined This book Explores a wide range and is not specific to material and method of deposition Demonstrates the application of thin film coatings in nearly all sectors such as energy and anti microbial applications Details the preparation and properties of hybrid and scalable ultra thin materials for advanced applications Provides detailed bibliometric analyses on applications of thin film coatings Discusses Industry 4.0 and 3D printing in thin film technology With its broad coverage this comprehensive reference will appeal to a wide audience of materials scientists and engineers and others studying and developing advanced thin film technologies

Polymer-Silica Based Composites in Sustainable Construction Harrison Shagwira, Fredrick Madaraka Mwema, Thomas Ochuku Mbuya, 2021-12-26 This book presents the application of Polymer Silica Based Composites in the Construction Industry providing the fundamental framework and knowledge needed for the sustainable and efficient use of these composites as building and structural materials It also includes characterization of prepared materials to ascertain mechanical chemical and physical properties and analyses results obtained using similar methods

Topics such as life cycle analysis of plastics application of plastics in construction and elimination of plastic wastes are also discussed The book also provides information on the outlook and competitiveness of emerging composites materials Covers theory preparation and characterizations of polymer silica based composites for green construction Discusses technology reliability manufacturing cost and environmental impact Reviews the classification application and processing of polymer silica composites Gives a deeper analysis on the various tests carried out on polymer silica composite Highlights role of such composites in the Industry 4 0 and emerging technologies This book is aimed at graduate students and researchers in civil engineering built environment construction materials and materials science

Building the Future: Innovation, Sustainability, and Collaboration in Construction Ramabodu Molusiwa Stephan, Clinton Aigbavboa, Samuel Herald Chikafalimani, 2025-09-26 This conference proceedings present cutting edge research that is shaping the future of the construction industry It has a strong emphasis on sustainability digital transformation and emerging technologies It contains contributions from experts in academia industry and policy who engage in critical discussions on how artificial intelligence digitalisation and innovation can drive efficiency enhance project outcomes and modernise the sector The proceedings address key challenges including skills shortages infrastructure limitations and adoption barriers to help foster industry wide transformation The cidb conference attracted researchers industry professionals policymakers and stakeholders from across the construction sector and its proceedings offer valuable insights into emerging trends and best practices The conference proceedings are designed for those seeking to explore the intersection of technology sustainability and construction management in an evolving global landscape

African Handbook of Climate Change Adaptation Nicholas Ogue, Desalegn Ayale, Lydia Adeleke, Izael da Silva, 2021-05-20 This open access book discusses current thinking and presents the main issues and challenges associated with climate change in Africa It introduces evidences from studies and projects which show how climate change adaptation is being and may continue to be successfully implemented in African countries Thanks to its scope and wide range of themes surrounding climate change the ambition is that this book will be a lead publication on the topic which may be regularly updated and hence capture further works Climate change is a major global challenge However some geographical regions are more severely affected than others One of these regions is the African continent Due to a combination of unfavourable socio economic and meteorological conditions African countries are particularly vulnerable to climate change and its impacts The recently released IPCC special report Global Warming of 1 5o C outlines the fact that keeping global warming by the level of 1 5o C is possible but also suggested that an increase by 2o C could lead to crises with crops agriculture fed by rain could drop by 50% in some African countries by 2020 and livestock production could damage water supplies and pose an additonal threat to coastal areas The 5th Assessment Report produced by IPCC predicts that wheat may disappear from Africa by 2080 and that maize a staple will fall significantly in southern Africa Also arid and semi arid lands are likely to increase by up to 8% with severe ramifications for livelihoods poverty

eradication and meeting the SDGs Pursuing appropriate adaptation strategies is thus vital in order to address the current and future challenges posed by a changing climate It is against this background that the African Handbook of Climate Change Adaptation is being published It contains papers prepared by scholars representatives from social movements practitioners and members of governmental agencies undertaking research and or executing climate change projects in Africa and working with communities across the African continent Encompassing over 100 contributions from across Africa it is the most comprehensive publication on climate change adaptation in Africa ever produced

Regionalization of African Higher Education Jane Knight,Emnet Tadesse Woldegiorgis,2017-04-17 Growth in the scope scale and importance of higher education regionalization should not be underestimated or ignored Africa like Asia Europe and Latin America is promoting deeper cooperation among higher education bodies and institutions across the continent and focusing more attention on Pan African and sub regional harmonization of policies and programmes This is the first book which brings together diverse scholars and policy experts to examine key aspects and challenges of African higher education regionalization Chapters examine the progress and prospects of core regionalization issues and strategies such as academic mobility quality assurance recognition of qualifications research centres and networks curriculum and competencies and regional academic programmes Other chapters discuss important themes such as the relationship between regionalization internationalization and Africanization historical antecedents and perspectives an analytical model to understand functional organizational and political approaches to Africa s higher education regionalization and the influence of the Bologna process on the African Union s Strategy for the Harmonization of Higher Education Programmes Together these chapters provide a comprehensive overview of efforts by the African Union sub regional higher education associations such as IUCEA SARUA and CAMES Pan African organizations and actors key research networks and centres of excellence and the involvement or dependence on external actors and funders especially from Europe Fundamentally the book asks the question whether higher education regionalization in Africa is more rhetoric than reality It discusses the progress to date on specific themes identifies historical political sustainability and funding challenges and concludes that while the impacts of regionalization efforts have not been fully realized there is cautious optimism for the future
