Books On Economics For Cameroon Advanced Level

Terry Cook, Clive Riches, Richard Taylor

Books On Economics For Cameroon Advanced Level:

The Oxford Handbook of the Economy of Cameroon Célestin Monga, 2022-10-10 Cameroon's suboptimal economic experience since independence 1960 sheds light on broader issues of Africa's development narrative and provides valuable economic and policy knowledge. While Cameroon's large informal economy is diverse and resilient and rooted in old business traditions, its formal economy has exhibited low productivity and employment growth for over 60 years. This has brought anger, disappointment, and violent conflict in several regions of the country. The Oxford Handbook of the Economy of Cameroon examines the reasons of Cameroon's unsatisfactory economic performance and draws lessons from successful development experience to help tackle these issues. The Handbook provides a critical assessment of the history, patterns, and strategies of economic development in Cameroon and outlines new approaches to economic enquiry for prosperity and social change. Through Cameroon's governance story, the handbook analyzes the evolving conceptions of economic policy, takes stock of intellectual progress, documents the challenges of implementation, and outlines the intellectual and policy agenda ahead. For a developing country, increases in per capita income arise from advances in technology, arise from closing the knowledge and technology gap with those at the frontier. And within any country, especially one like Cameroon, there is enormous scope for productivity improvement simply by closing the gap between best practices and average practices. Standards of living can therefore be improved through the implementation of pertinent learning strategies. In this Oxford Handbook of the Economy of Cameroon, an international team of leading development economists and researchers address the wide range of issues facing Cameroon and provide guiding principles on how best the country and other developing nations could move human capital and financial resources from low to high productivity sectors in a constantly changing global economy.

Great Books Written by Africans across the Academic Disciplines Emmanuel D. Babatunde, Abdul Karim Bangura, 2022-07-04 This volume is the first text to provide a comprehensive account of the great books across the academic disciplines written by Africans born in the continent and those who became naturalized citizens of African countries. These great books are those that have had a powerful, important, or affecting influence on the author of a chapter in this book as an individual and on society. The books included here are mostly of the storytelling type and thus not representative of most of the academic disciplines. This volume allows each contributor to write a chapter on a discipline showcasing five great books written by African authors. Each selection is appraised, and suggestions made by other experts in a discipline, while every chapter entails an introduction to the topic, a conceptual discussion of the discipline, a book-by-book review of the five books, and a conclusion and recommendations for research using the selected books.

The Political Economy of Heaven and Earth in Ghana Charles Prempeh, 2023-09-30 In March 2017 the president of Ghana Nana Addo Dankwa Akufo announced his intention to build a national cathedral to the people of Ghana The announcement elicited watertight counter arguments that morphed into two a priori re litigated assumptions First Ghana is a secular country and second religion and state formation are incompatible Informed by a frustrating paradox of an overwhelming religious presence and concurrent pervasive corruption in the country public conversation reached a cul de sac of conviction without compromising In The Political Economy of Heaven and Earth in Ghana Charles Prempeh deploys the national cathedral as an entry point to provide both interdisciplinary and autoethnographic understanding of religion and politics The book shows the capacity of religion when properly cultivated and curated as a worldview to answer the why questions of life will foster personal moral collective and ontological responsibility All this is needed to stem the tide against corruption commodity fetishism environmental degradation illegal mining galamsey

heritage destruction and religious exploitation Prempeh recuperates a historical fact about the mutual inclusivity between religion and politics politics helping to manage differences while religion provides a transcendental reason for unity to be forged for human flourishing Separating the two is therefore ahistorical and an obvious threat to the intangible virtues that answers why and how questions for public governance The Political Economy of Decentralization in Sub-Saharan Africa Bernard Dafflon, Thierry Madies, 2012-12-28 For two decades now experiences in decentralization and federalization have been in progress in many countries particularly in Sub Saharan Africa How can these processes be understood and improved Focusing on four Sub Saharan countries Burkina Faso Ghana Kenya and Senegal this volume applies an original approach to address such questions **Financial Structure and Economic Development**, 2000 A country's level of financial development and the legal environment in which financial intermediaries and markets operate critically influence economic development In countries whose financial sectors are more fully developed and whose legal systems protect the rights of outside investors economies grow faster industries dependent on external finance expand more quickly new firms are created more easily firms have more access to external financing and firms grow faster *Learning for Livelihoods in the Global South* Lesley Powell, Adam Cooper, Trent Brown, Simon McGrath, 2024-12-23 This edited volume explores how youth and informal sector workers in the Global South are pioneering learning and livelihoods that exist at the intersections of and beyond the boundaries of the state market and other formal institutions Underpinned by research undertaken in the Global South this book discusses how we might better theorise conceptualise and critique what skills and vocational education and training mean for young people with diverse livelihoods people who rely substantially on the informal and social economy Rather than envisioning education and skills as oriented towards profit making or increased productivity chapters offer fresh perspectives that move beyond the dominant neoliberal and human capital orthodoxies This book features chapters that are global in approach uses case studies from contexts as diverse as India South Africa West Africa and Colombia and focuses on how education can be used to empower people strengthen livelihoods and expand human agency skills personal growth and the capability for voice Issuing a clarion call it appeals for recognition of the ways in which learning working and living take place in the informal sector in the Global South arguing that this matters for the vast majority of the world's population This book will be of relevance to scholars academics and postgraduate students in vocational education and training skills development the informal sector international and comparative education international development and adult education

The Undercover Economist Tim Harford, 2012 Harford ranges from Africa Asia Europe and of course the United States to reveal how supermarkets airlines health care providers and coffee chains to name just a few are vacuuming money from our wallets *Developing a Sustainable Economy in Cameroon* Aloysius Ajab Amin, 2008 Developing a Sustainable Economy in Cameroon is an ambitious effort as the authors try to set a blue print for Cameroon's economy In the 1980s facing economic crisis and as dictated by the structural adjustment programme Cameroon sharply cut public investment

expenditures before later cutting government consumption which were followed by privatisation liquidation of public companies and reduction in the size of the public sector All these measures are believed to have had devastating effects on the economy Given the performance of the economy so far the authors suggest that much more effort with a strong commitment of the main stakeholders is required to guarantee sustainable economic development in Cameroon Truly very few countries in Africa possess such enormous human and natural resources as Cameroon does This volume brings out the challenges Cameroon faces in its quest for development as well as for designing appropriate strategies for addressing those development challenges

Resources in Education ,1994 **The Lever of Riches** Joel Mokyr,1992-04-09 In a world of supercomputers genetic engineering and fiber optics technological creativity is ever more the key to economic success But why are some nations more creative than others and why do some highly innovative societies such as ancient China or Britain in the industrial revolution pass into stagnation Beginning with a fascinating concise history of technological progress Mokyr sets the background for his analysis by tracing the major inventions and innovations that have transformed society since ancient Greece and Rome What emerges from this survey is often surprising the classical world for instance was largely barren of new technology the relatively backward society of medieval Europe bristled with inventions and the period between the Reformation and the Industrial Revolution was one of slow and unspectacular progress in technology despite the tumultuous developments associated with the Voyages of Discovery and the Scientific Revolution What were the causes of technological creativity Mokyr distinguishes between the relationship of inventors and their physical environment which determined their willingness to challenge nature and the social environment which determined the openness to new ideas He discusses a long list of such factors showing how they interact to help or hinder a nation s creativity and then illustrates them by a number of

detailed comparative studies examining the differences between Europe and China between classical antiquity and medieval Europe and between Britain and the rest of Europe during the industrial revolution He examines such aspects as the role of the state the Chinese gave up a millennium wide lead in shipping to the Europeans for example when an Emperor banned large ocean going vessels the impact of science as well as religion politics and even nutrition He questions the importance of such commonly cited factors as the spill over benefits of war the abundance of natural resources life expectancy and labor costs Today an ever greater number of industrial economies are competing in the global market locked in a struggle that revolves around technological ingenuity The Lever of Riches with its keen analysis derived from a sweeping survey of creativity throughout history offers telling insights into the question of how Western economies can maintain and developing nations can unlock their creative potential

Primary Commodities and Economic Development Stephan Pfaffenzeller, 2016-08-12 Our post industrialised global economy has achieved spectacular success and pushed back poverty to an extent previously thought impossible This success is ultimately based on the continued supply of both renewable and non renewable resources Will this supply of primary commodities remain sufficient to support global economic growth Why are the gains for countries specialising on commodity production often so limited Can commodity dependent countries diversify into other economic activities Primary Commodities and Economic Development addresses the changing position of primary commodities in the world economy and investigates their importance for commodity exporting

under developed countries The book commences with a review of the theoretical foundations for inter dependence between commodity specialisation and economic underdevelopment Having related the role of commodity exports and the commodity terms of trade to growth models relevant to developing economies the discussion shifts to an in depth review of the statistical properties of the commodity terms of trade The review of commodity price trends at the global level is then rounded off with a series of country case studies showing the concrete threats and opportunities surrounding commodity specialization This book will be of essential reading for those with an interest in development economics and international economics as well as for scholars of natural resource and agricultural economics

Growing Up Global Institute of Medicine, National Research Council, Division of Behavioral and Social Sciences and Education, Board on Children, Youth, and Families, Committee on Population, Panel on Transitions to Adulthood in Developing Countries, 2005-06-25 The challenges for young people making the transition to adulthood are greater today than ever before Globalization with its power to reach across national boundaries and into the smallest communities carries with it the transformative power of new markets and new technology At the same time globalization brings with it new ideas and lifestyles that can conflict with traditional norms and values And while the economic benefits are potentially enormous the actual course of globalization has not been without its critics who charge that to date the gains have been very unevenly distributed generating a new set of problems associated with rising inequality and social polarization Regardless of how the globalization debate is resolved it is clear that as broad global forces transform the world in which the next generation will live and work the choices that today's young people make or others make on their behalf will facilitate or constrain their success as adults Traditional expectations regarding future employment prospects and life experiences are no longer valid Growing Up Global examines how the transition to adulthood is changing in developing countries and what the implications of these changes might be for those responsible for designing youth policies and programs in particular those affecting adolescent reproductive health The report sets forth a framework that identifies criteria for successful transitions in the context of contemporary global changes for five key adult roles adult worker citizen and community participant spouse parent and household manager
