Reorganizing Government Alejandro Camacho, Robert Glicksman, 2019-08-27 A pioneering model for constructing and

assessing government authority and achieving policy goals more effectively Regulation is frequently less successful than it could be largely because the allocation of authority to regulatory institutions and the relationships between them are misunderstood As a result attempts to create new regulatory programs or mend under performing ones are often poorly designed Reorganizing Government explains how past approaches have failed to appreciate the full diversity of alternative approaches to organizing governmental authority The authors illustrate the often neglected dimensional and functional aspects of inter jurisdictional relations through in depth explorations of several diverse case studies involving securities and banking regulation food safety pollution control resource conservation and terrorism prevention This volume advances an analytical framework of governmental authority structured along three dimensions centralization overlap and coordination Camacho and Glicksman demonstrate how differentiating among these dimensions better illuminates the policy tradeoffs of organizational alternatives and reduces the risk of regulatory failure The book also explains how differentiating allocations of authority based on governmental function can lead to more effective regulation and governance The authors illustrate the practical value of this framework for future reorganization efforts through the lens of climate change an emerging and vital global policy challenge and propose an adaptive governance infrastructure that could allow policy makers to embed the creation evaluation and adjustment of the organization of regulatory institutions into the democratic process itself

in Wharton's work For example how do Wharton's narratives represent the organic profusion of external nature Does the current scholarly fascination with the environmental humanities reveal previously unexamined or overlooked facets of Wharton's craft I propose that what is most striking about her narrative practice is how she utilizes adapts and translates pastoral tropes conventions and concerns to twentieth century American actualities It is no accident that Wharton portrays characters returning to or exploring various natural localities such as private gardens public parks chic mountain resorts monumental ruins or country estate follies Such encounters and adventures prompt us to imagine new relationships with various geographies and the lifeforms that can be found there The book addresses a knowledge gap in Wharton and the environmental humanities especially recent debates in ecocriticism The excavation of Wharton's words and the background of her narratives with an eye to offering an ecocritical reading of her work is what the book focuses on Human Development Across the Life Span Fergus P. Hughes, Lloyd D. Noppe, 1985 A thorough comprehensive topical introduction to human development In rejecting classic age and stage treatments of human development these authors take an approach that better shows the continuity of the developmental process They emphasize the interdisciplinary nature of the field by integrating pertinent ideas from such diverse sources as sociology biology and cultural anthropology This edition embraces more discussion of infancy greater coverage of the adult and a more thorough look at the role of women in a person's growth and development than the previous edition **Materializing Queer Desire** Elisa Glick, 2010-03-30 How did the queer subject come to occupy such a central and in many respects contradictory place in the modern world of the early twentieth century What role has capitalism played in the development of modern gay and lesbian identities Materializing Queer Desire focuses on the figure of the dandy to explore how and why gay and lesbian subjects became heroes of modern life Elisa Glick argues that the gay subject emerged out of the specifically modern capitalist contradiction between the public world of production and industry and the private world of consumption and pleasure Boldly bringing modernism into dialogue with Marxist and queer theory Glick offers an innovative materialist account of modern queer consciousness that challenges tendencies to oppose private eroticism and the systems of value that govern public interests In the process she illuminates the connections between aesthetic sexual and social formations in modern life between modernity's disruptive queer desires and their unfolding in an increasingly rationalized society **Bookseller and the Stationery Trades' Journal**, 1969

Burdened Agency Travis Pickell, 2024-08-15 Travis Pickell explores the paradoxes of choice in modern dying and the ways Christian theology can aid in navigating the relationship between moral agency and dignity at the end of life Burdened Agency addresses the problem of death and dying through Christian theology and ethics In previous centuries death was something that simply happened to us To choose how or when one died was the exception not the rule However due to advances in modern medicine individuals are increasingly required to make concrete choices about the nature and timing of death Modernity with its emphasis on individualism complicates this further because we are increasingly bereft of cultural

and religious guidance regarding death This gives rise to the phenomenon of burdened agency the predicament of having to make such difficult choices with so little to help us This engaging book offers a historical and philosophical account of the origins of our situation of burdened agency as well as a Christian solution to the problems that it raises Looking to theologians such as Karl Rahner Karl Barth and Stanley Hauerwas Pickell devises a radically countercultural approach to death and dying rooted in Christian theological commitments and enacted in the practices of baptism Eucharist and prayer
