

Nursing Progress Note (Long Version)

This form is to be completed by a LPN, RN, BSN, or MSN when providing nursing services primarily in residential or inpatient substance use treatment programs, such as TSS, Detox, etc. Nurses with a RNC-S or an APRN with prescribing privileges should complete the Psychopharmacology Progress Note.

There are two different versions of the Nursing Progress Note – a short and long version. The short version is to provide adequate documentation for short length services such as injections, etc. while the long version has additional data fields that support the focus of the Psychopharmacology Progress Note including an interim history and mini mental status section.
