Computational Mechanics '86 Genki Yagawa, Satya N. Atluri, 1986-07-25 It is often said that these days there are too

many conferences on general areas of computational mechanics mechanics and numerical methods vJhile this may be true the his tory of scientific conferences is itself quite short According to Abraham Pais in Subtle is the Lord Oxford University Press 1982 p 80 the first international scientific conference ever held was the Karlsruhe Congress of Chemists 3 5 September 1860 in Karlsruhe Germany There were 127 chemists in attendance and the participants came from Austria Belgium France Germany Great Britain Italy Mexico Poland Russia Spain Sweden and Switzerland At the top of the agenda of the points to be discussed at this conference was the question Shall a difference be made between the expressions molecule and atom Pais goes on to note The conference did not at once succeed in bringing chemists closer together It is possible that the older men were offended by the impetuous behavior and imposing manner of the younger scientists see references cited in Pais book It may be observed that history in general repeats itself However at ICCM 86 in Tokyo roughly 500 participants from both the West and the East were in attendance there were only scholarly exchanges the young tried to learn from the more experienced and a spirit of international academic cooperation prevailed **Materials Evaluation** ,1981 **The Latest and Best of TESS** ,1991 *Nuclear Science Abstracts* ,1976-05
