- When you are satisfied with a combination of continents to move, click the map "Map of the world continents"

3. Study world's super map of Pangaea

- How will do the continents fit together?

They fit pretty well, but I don't think that this is what Pangaea looked like and there are gaps on the map

- Is it possible to fit together

Yes, this is a perfect fit because all of the continents fit pretty well and it is a perfect fit because most of the gaps are from other things

- How does this fit the continents get from where they were to where they are today. Think of some evidence that the continents could have moved the way they did

Yes, they could have moved the way they did because all the pieces look like they fit together. This is possible because the continents could have moved because of the water pushing it this way

- Compare Pangaea's present super map of Pangaea to your observations and theories - with another map, and talk about each one
