Air Mobility Operations Joint Publication 3 17:

Air Mobility Operations (Joint Publication 3-17) Chairman of the Joint Chiefs of Staff, 2012-10-01 This publication provides joint doctrine for planning, employing, and assessing air mobility operations across the range of military operations. Air mobility is a network of systems that combines airlift, airdrop, aeromedical evacuation, AE, air refueling, AR, and air mobility support assets, processes, and procedures into an integrated whole to support the transport of personnel and materiel. The Secretary of Defense, SecDef, directs the assignment of air mobility forces to the Commander, United States Transportation Command, CDRUSSTRANSCOM, and other combatant commanders, CCDRs. To deter threats against or to assist in the defense or pursuit of United States, US, national interests, the Department of Defense maintains forces, organizations, and processes necessary to conduct air mobility operations. The National Air Mobility System, NAMS, is a broad and comprehensive system that provides the President, SecDef, and CCDRs with rapid global mobility. The mobility air forces, MAF, are those forces assigned to combatant commands that provide rapid global mobility and conduct air mobility operations. The MAF's four core functions are airlift, AR, air mobility support, and AE. NAMS consists of forces that perform intertheater, intratheater, and organic mobility operations. US Transportation Command, USTRANSCOM, and the geographic combatant commands, GCCs, possess air mobility assets that are capable of performing both intertheater and intratheater operations. A unique aspect of these operations is their reliance on the Global Air Mobility Support System, GAMSS, and the worldwide command and control, C2, capabilities of the Air Mobility Command, 618th Tanker Airlift Control Center, 618th TACC. The GAMSS is comprised of a limited number of permanent en route support locations plus mobile forces that deploy under the global reach laydown strategy. This publication has been prepared under the direction of the Chairman of the Joint Chiefs of Staff. It sets forth joint doctrine to govern the activities and performance of the Armed Forces of the United States in joint operations and provides the doctrinal basis for interagency coordination and for US military involvement in multinational operations. It provides military guidance for the exercise of authority by combatant commanders and other joint force commanders, JFCs, and prescribes joint doctrine for operations, education, and training. It provides military guidance for use by the Armed Forces in preparing their appropriate plans. It is not the intent of this publication to restrict the authority of the JFC from organizing the force and executing the mission in a manner the JFC deems most appropriate to ensure unity of effort in the accomplishment of the overall objective. Joint doctrine established in this publication applies to the joint staff, commanders of combatant commands, subunified commands, joint task forces, subordinate components of these commands, and the Services. The guidance in this publication is authoritative as such; this doctrine will be followed except when in the judgment of the commander, exceptional circumstances dictate otherwise.

Air Mobility Operations U.S. Joint Force Command, 2014-07-25 Air mobility is the rapid movement of personnel, materiel, and forces to and from or within a theater by air. This includes both airlift and air refueling, AR. The air mobility network combines airlift, AR, aeromedical evacuation, AE, and

command's doctrine and procedures where applicable and consistent with US law regulations and doctrine **Air Force Journal of Logistics**, 2005 Air Power in UN Operations A. Walter Dorn, 2016-03-23 Air power for warfighting is a story that's been told many times Air power for peacekeeping and UN enforcement is a story that desperately needs to be told For the first time this volume covers the fascinating range of aerial peace functions In rich detail it describes aircraft transporting vital supplies to UN peacekeepers and massive amounts of humanitarian aid to war affected populations aircraft serving as the eyes in sky to keep watch for the world organization and combat aircraft enforcing the peace Rich poignant case studies illuminate the past and present use of UN air power pointing the way for the future This book impressively fills the large gap in the current literature on peace operations on the United Nations and on air power generally Air Force Doctrine Annex 3-17 Air Mobility Operations 5 April 2016 United States Government Us Air Force, 2017-05-04 Air Force Doctrine ANNEX 3 17 Air Mobility Operations 5 April 2016 Air mobility operations doctrine represents an accumulation of best practices and lessons learned from World War II to the most recent conflicts and humanitarian assistance disaster relief operations Air mobility operations support all of the geographic combatant commanders and functional combatant commanders The foundational components of air mobility operations airlift air refueling air mobility support and aeromedical evacuation work with other combat forces to achieve national and joint force commander objectives Joint doctrine defines air mobility as the rapid movement of personnel materiel and forces to and from or within a theater by air The Department of Defense DOD transportation mission involves many transportation communities and assets services and systems owned by contracted for or controlled by the DOD US Transportation Command serves as the manager of the transportation community and is supported by the Air Force's Air Mobility Command the Army's Surface Deployment and Distribution Command and the US Navy's Military Sealift Command Mobility air forces MAF provide rapid global mobility and conduct air mobility operations These forces deliver the global reach and global power necessary to achieve US national objectives The US military is called upon by national leaders to perform their functions around the globe either directly accomplishing national objectives or supporting other agencies All Services and US government agencies rely upon Air Force MAF to rapidly move personnel and resources Mobility forces are more than enablers and enhancers in that they quickly project forces and take the fight to the enemy As the United States moves into a realm of uncertain adversaries it is the capability of our mobility forces that will ensure the force projection necessary to protect US national interests To properly discuss air mobility operations the Air Force builds on the joint definition to include the support required to conduct air mobility operations

Airlift Capabilities for Future U.S. Counterinsurgency Operations Robert C. Owen, Karl P. Mueller, 2007 Current and probable future United States involvement in counterinsurgencies revives a long standing debate about whether these missions call for adding specialized aircraft training or other resources to the general military airlift fleet The authors examine the use of airlift in past and present counterinsurgency operations including the Foreign Internal Defense program

They conclude that general U S airlift forces can accomplish most counterinsurgency missions effectively with adjustments in employment doctrines and training However they also note that continued operations likely will require reinforcement of the general airlift fleet and perhaps acquisition of a small fleet element optimized for certain counterinsurgency missions

Military Strategy, Joint Operations, and Airpower Ryan Burke, Michael Fowler, Jahara Matisek, 2022 Military Strategy Joint Operations and Airpower introduces students to contemporary strategy and the operational level of war particularly as it relates to airpower Developed as foundational reading for all US Air Force Academy cadets this intermediate textbook is designed to close the gap between military theory and practice It covers strategic foundations operational design and joint service operations the air space and cyber capabilities that comprise modern airpower and contemporary challenges in the application of strategy In this second edition each chapter has been updated and revised and several sections have been expanded Part II Military Forces and the Joint Fight is now has separate chapters about each service in addition to a chapter on joint structure Similarly operational design is expanded from one to four chapters to provide a more thorough step by step guide through the process New chapters in this second edition include Integrating the Instruments of Power The Spectrum of Conflict and Range of Military Operations and The Nuclear Weapons Triad and Missile Defense This book s contributing authors and editors include both military practitioners and scholars of security studies political science and history In addition to being required reading for Air Force cadets and ROTC students the book will provide an essential overview of strategy and practice for anyone interested in modern airpower *Command and control for joint air operations*, 2003 This publication provides fundamental principles and doctrine for the command and control of joint air operations throughout the range of military operations This publication has been prepared under the direction of the Chairman of the Joint Chiefs of Staff It sets forth doctrine to govern the joint activities and performance of the Armed Forces of the United States in joint operations and provides the doctrinal basis for US military involvement in multinational and interagency operations It provides military guidance for the exercise of authority by combatant commanders and other joint force commanders JFCs and prescribes doctrine for joint operations and training It provides military guidance for use by the Armed Forces in preparing their appropriate plans It is not the intent of this publication to restrict the authority of the JFC from organizing the force and executing the mission in a manner the JFC deems most appropriate to ensure unity of effort in the accomplishment of the overall mission **The Air Force Law Review**, 2010 Army Airspace Command and Control in a Combat Zone, Air mobility the key to the United States national security strategy, 2000 Since airlift was first used as a tool of national security during the Berlin Airlift it has grown to deliver passengers cargo and fuel to operations worldwide in support of national security However Air Mobility Command is the single organization that performs for air mobility for the United States Cm%Currently the Air Force has structured Air Mobility Command for war yet this command performs operations during times when the US is at peace Air Mobility Command performs missions to support US military operations

in hostile environments as well as humanitarian operations in non hostile environments The number of operations requiring mobility air forces has been on the rise since the Cold War ended 10 years ago These steady state operations seem to over task mobility air forces This study centers on the question Can Air Mobility Command s force structure organized for two major theater wars fulfill that requirement and perform the steady state operations in today s strategic environment This study finds that Air Mobility Command s force structure cannot meet its requirements for two major theater wars and that the current force structure is inefficient in meeting the requirements for steady state operations First this thesis presents a primer to acclimate the reader to the complex environment and multifaceted requirements of mobility air forces Next this thesis examines Air Mobility Command s current force structure as determined by Department of Defense requirements for war Then this thesis also describes the various types of missions that Air Mobility Command performs on a steady state basis and evaluates the importance of these operations in fulfilling US National Security Strategy Finally this thesis recommends action that the Air Force and the Department of Defense should investigate in order to improve their air mobility capabilities in
