*Transnational Fiduciary Law* Seth Davis, Thilo Kuntz, Gregory Shaffer, 2024-02-08 Fiduciary law is important transnationally particularly in the context of global capitalism Fiduciary law s characteristic regard for others offers a response to the pursuit of unconstrained self interest in business and government relations potentially implicating the exercise of both private and public power Stakeholders have invoked it not only to address traditional private law matters but also to enjoin transnational corporations to respect human rights to combat public corruption and to constrain national governments to respect the rights of Indigenous Peoples This book focuses on the processes through which conceptualizations of fiduciary relationships and fiduciary norms may or may not settle transnationally or become unsettled as actors invoke fiduciary norms to address problems in different domains including across borders It identifies complications and challenges of any transnational convergence of fiduciary norms that fiduciary theorists often elide This book is also available as Open Access on Cambridge Core

Platform as a Rule Maker Jian Jia, 2021 Digital platforms are not only match making intermediaries but also establish internal rules that govern all users in their ecosystems To better understand the governing role of platforms we study two Airbnb pro guest rules that pertain to guest and host cancellations using data on Airbnb and VRBO listings in 10 US cities We demonstrate that such pro guest rules can drive demand and supply to and from the platform as a function of the local platform competition between Airbnb and VRBO Our results suggest that platform competition sometimes dampens a platform wide pro guest rule and sometimes reinforces it often with

heterogeneous effects on different hosts This implies that platform competition does not necessarily mitigate a platform's incentive to treat the two sides asymmetrically and any public policy in platform competition must consider its implication on all sides
