*Inequalities of Aging* Elana D Buch, 2018-08-28 Winner 2020 Eileen Basker Memorial Prize given by the Society for Medical Anthropology The troubling dynamic of the American home care industry where increased independence for the elderly conflicts with the well being of caregivers Paid home care is one of the fastest growing occupations in the United States and millions of Americans rely on these workers to help them remain at home as they grow older However the industry is rife with contradictions The United States spends a fortune on medical care yet devotes comparatively few resources on improving wages thus placing home care providers in the ranks of the working poor As a result the work that enables some older Americans to live independently generates profound social inequalities *Inequalities of Aging* explores the ways in which these inequalities play out on the ground as workers who are disproportionately women of color and immigrants earn poverty level wages and often struggle to provide for themselves and their families The ethnographic narrative reveals how two of the nation's most pressing concerns rising social inequality and caring for an aging population intersect to transform the lives of older adults home care workers and the world around them The book takes readers inside the homes and offices of people connected to two Chicago area home care agencies serving low income and affluent older adults respectively Through intimate portrayals of daily life Elana D Buch illustrates how diverse histories care practices and social policies overlap and contribute to social inequality Illuminating the lived experience of both workers and their clients *Inequalities of Aging* shows the different ways in which the idea of independence both connects and shapes the lives of the elderly and the working poor
