Lele,Uma Lele,Manmohan Agarwal,Brian C. Baldwin,Sambuddha Goswami,2021 This book assesses the prospects for achieving the sustainable development goals and the role of international organizations in achieving them in light of recent economic medical and environmental developments **Growth and Productivity in Agriculture and Agribusiness** ,2011 The report assesses the World Bank Group s support for growth and productivity in the agriculture sector Enhancing agricultural growth and productivity is essential to meeting the worldwide demand for food and to reducing poverty particularly in the poorest developing countries Between 1998 and 2008 the period covered by this evaluation the World Bank Group WBG provided 23 7 billion in financing for agriculture and agribusiness in 108 countries roughly 8 percent of total WBG financing spanning areas from irrigation and marketing to research and extension However this was a time of declining focus on agricultural growth and productivity by both countries and donors The cost of inadequate attention to agriculture especially in agriculture based economies came into focus with the food crisis of 2007 08 The crisis added momentum to an emerging renewal of attention and stepped up financing to agriculture and agribusiness at the World Bank and International Finance Corporation IFC as well as at several multilateral and bilateral agencies World Bank financing rose two and a half times from 2008 to 2009 though that increase in lending seems to have been accompanied by a decline in analytical work which this review finds valuable for results This evaluation seeks to provide lessons from successes and failures to help improve the development impact of the renewed attention to the sector Ratings against the World Bank s stated objectives and IFC s market based benchmarks for agriculture and agribusiness projects have been equal to or above portfolio averages in East Asia Latin America and the transition economies in Europe with notable successes over a long period in China and India But performance of WBG interventions has been well below average in Sub Saharan Africa where IFC has had little engagement in agribusiness Inconsistent client commitment and weak capacity have limited the effectiveness of WBG support in agriculture based economies particularly in Sub Saharan Africa and constraints on staffing and internal coordination within the WBG have also hurt outcomes Financial sustainability has been constrained by insufficient government funding and the difficulty of maintaining agricultural services and infrastructure The WBG has a unique opportunity to match the increases in the financing for agriculture with sharper focus on improving agricultural growth and productivity in agriculture based economies notably in Sub Saharan Africa Greater effort will be needed to

connect sectoral interventions and achieve synergies from public and private sector interventions to build capacity and knowledge exchange to take stock of experience in rain fed agriculture to ensure attention to financial sustainability and to cross cutting issues of gender environmental and social impacts and climate and to better integrate WBG support at the global and regional levels with that at the country level *Towards Sustainable Livelihoods and Ecosystems in Mountain Regions* Vishwambhar Prasad Sati, 2013-12-21 Sustainable livelihoods and ecosystems are far reaching and burning issues in the wake of high growth of population low production and per ha yield of crops and depletion of biodiversity resources Mountainous regions of the world are facing the menace of poverty food insecurity and malnutrition Further tremendous growth in population and slow pace of development have together forced most of the population to live below poverty line Traditionally depending upon cultivating subsistence crops for food requirement the people living in mountainous region are unable to produce sufficient food grains to run their livelihood smoothly The Himalayas is one of the world's biodiversity hotspots and has an abundance of natural resources land water and forest life sustaining factors The geo environmental conditions climate and landscape further enhance the possibility of sustainable livelihoods through eco tourism harnessing water resources and utilizing forests and their products sustainably Diversifying agricultural practices through cultivating cash and cereal crops and enhancing livelihood options through extensive use of timber and non timber based forestry products can help to eradicate poverty and provide food security This book consists of an introduction and nine chapters covering geo environmental setting socio economy and population profile sustainable livelihoods diversification and enhancement livelihood analysis development of tourism and hydroelectricity case studies mountain ecosystems sustainable mountain development and also presents a conclusion OECD Food and Agricultural Reviews Agricultural Policies in Viet Nam 2015 OECD, 2015-09-30 This review assesses the performance of Vietnamese agriculture over the last two decades evaluates Vietnamese agricultural policy reforms discusses the policy framework for sustainable investment in agriculture and provides recommendations to address key challenges in the future
