Human Heredity
Section 11-3SKILL ACTIVITY
Interpreting diagrams**Applied Genetics**

A. Duchenne muscular dystrophy is a deadly disorder in which the muscles grow progressively weaker. The disease is caused by a recessive gene on the X chromosome. The pedigree chart below illustrates the inheritance of this gene. Use the chart to answer the questions that follow.

1. Is Duchenne muscular dystrophy more likely to occur in males or in females? Explain your answer.

Males because they only have 1 X chromosome that needs the recessive allele

2. Individual H is a female with this disorder. Explain how she inherited this disease.

Her father gave her his X chromosome with the recessive allele & her mom was a carrier.

3. Individual K has this disorder, yet his father did not. Explain how this is genetically possible.

Individual K got his X chromosome from his mom, not his dad.

4. Individual G does not have the disease, yet his mother was a carrier and his father had the disease. Explain how this is possible.

Individual G got the Y chromosome from his dad and the X without the disease from his mom.

Bioethics in a Small World Felix Thiele, R.E. Ashcroft, 2005-12-29 The world seems ever smaller and ever quicker environmental public health industrial and cultural processes operate ever more on a global rather than a local scale Does this process sometimes known as globalisation draw us closer together or drive us further apart from a moral point of view In recent years bioethics has addressed many of the issues that arise in the context of globalisation solidarity conflict and autonomy human rights liberty and toleration the political and economic context of health care and inequalities in health environmental and public health change At the same time bioethics has often been merely an agent of obscure political forces and has been challenged for its emphasis on autonomy over considerations of justice This study brings together scientists from the fields of medicine law and philosophy The texts are the results of a conference the Europäische Akademie held in 2003 The group developed its thesis in open discussions of foundational and applied problems of bioethics from an interdisciplinary and international perspective
