Centering the Margins of Anthropology's History Regna Darnell, 2021-05 The series Histories of Anthropology Annual presents diverse perspectives on the discipline's history within a global context with a goal of increasing the awareness and use of historical approaches in teaching learning and conducting anthropology The series includes critical comparative analytical and narrative studies involving all aspects and subfields of anthropology Volume 14 Centering the Margins of Anthropology's History focuses on the conscious recognition of margins and suggests it is time to bring the margins to the center both in terms of a changing theoretical openness and a supporting body of scholarship if not to problematize the very dichotomy of center and margins itself The essays explore two major themes of anthropology's margins First anthropologists and historians have long sought out marginalized and forgotten ancestors arguing for their present day relevance and offering explanations for the lack of attention to their contributions to theory analysis methods and findings Second anthropologists and their historians have explored a range of genres to present their results in provocative and open ended formats This volume closes with an experimental essay that offers a dynamic multifaceted perspective that captures one of the dominant if sometimes marginalized voices in history of anthropology

Law's Regulatory Relevance? Mark Findlay, 2017-09-29 Focusing on the information economy free trade exploitation and confronting terrorist violence Mark Findlay critiques law's regulatory commodification Conventional legal regulatory modes such as theft and intellectual property are being challenged by waves of property access and use which demand the rethinking of property rights and their relationships with the law Law's Regulatory Relevance theorises how the law should reposition itself in order to help rather than hinder new pathways of market power by confronting the dominant neo liberal economic model that values property through scarcity With in depth analysis of empirical case studies the author explores how law is returning to its communal utility in strengthening social ties which will in turn restore property as social relations rather than market commodities In a world of contested narratives about property valuing law needs to ground its inherent regulatory relevance in the ordering of social change This book is an essential read for students of law and regulation wanting to explore the contemporary dissent against neo liberal market economies and the issues of communitarian governance and social resistance It will also appeal to policy makers interested in law's failing regulatory capacity particularly through criminalising attacks on conventional property rights by offering insights into why law's regulatory relevance is at a cross roads

The Routledge History of Death since 1800 Peter N. Stearns, 2020-10-13 The Routledge History of Death Since 1800 looks at how death has been treated and dealt with in modern history the history of the past 250 years in a global context through a mix of definite often quantifiable changes and a complex qualitative assessment of the subject The book is divided into three parts with the first considering major trends in death history and identifying widespread patterns of change and continuity in the material and cultural features of death since 1800 The second part turns to specifically regional experiences and the third offers more specialized chapters on key topics in the modern history of death Historical findings and debates feed directly into a current and prospective assessment of death as many societies transition into patterns of ageing that will further alter the death experience and challenge modern reactions Thus a final chapter probes this topic by way of introducing the links between historical experience and current trajectories ensuring that the book gives the reader a framework for assessing the ongoing process as well as an understanding of the past Global in focus and linking death to a variety of major developments in modern global history the volume is ideal for all those interested in the multifaceted history of how death is dealt with in different societies over time and who want access to the rich and growing historiography on the subject Chapter 1 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license
