

Go to the library to find out about the circulatory system. Then fill in the blanks below using words from the box.

1. The circulatory system carries things throughout the human body. It carries food and air to every cell in the body.
2. The three most important parts of the system are the heart, blood, and blood vessels. The heart pumps blood through the blood vessels. The blood carries food and a gas called oxygen in one direction. It takes food, cell wastes, and the gas carbon dioxide in another direction.
3. Blood is a liquid. The liquid part of blood is called plasma. It has some solid parts called red blood cells, white blood cells, and platelets.
4. The heart is a pumping organ with four hollow chambers. The heart pumps blood to the body through arteries. Blood comes back to the heart through veins.
5. Red blood cells carry oxygen to the body. The chemical hemoglobin makes the blood look red.
6. White blood cells are needed to fight disease. They help kill bacteria.
7. The circulatory system is well-named because the blood goes in a "circle" that starts in the pumping blood, moves through the whole body, and comes back to the heart again.
