Encountering Gorillas James L. Newman, 2013-07-05 Gorillas the largest of the apes inhabiting our planet have been a source of fear awe and inspiration to humans In this book James L. Newman brings a lifetime of study of Africa to his compelling story of the rich and varied interaction between gorillas and humans since earliest contact He illuminates the complex relationship over time through the interlinked themes of discovery exploitation understanding and continuing survival Tragically the number of free living gorillas facing habitat loss disease and poaching has declined dramatically over the course of the past century and the future of the few that remain is highly uncertain At the same time those in zoos and sanctuaries now lead much more secure lives than they did earlier Newman follows this transition highlighting the roles played by key individuals both humans and gorillas Among the former have been adventurers opportunists writers and scientists The latter include real gorillas such as Gargantua and Koko and fictional ones notably King Kong and Mighty Joe Young This thoughtful and engaging book helps us understand how our image of gorillas has been both distorted and clarified through culture and science for centuries and how we now control the destiny of these magnificent great apes

The Ape that Understood the Universe Steve Stewart-Williams, 2019-11-21 The Ape that Understood the Universe is the story of the strangest animal in the world the human animal It opens with a question How would an alien scientist view our species What would it make of our sex differences our sexual behavior our altruistic tendencies and our culture The book tackles these issues by drawing on two major schools of thought evolutionary psychology and cultural evolutionary theory The guiding assumption is that humans are animals and that like all animals we evolved to pass on our genes At some point however we also evolved the capacity for culture and from that moment culture began evolving in its own right This transformed us from a mere ape into an ape capable of reshaping the planet travelling to other worlds and understanding the vast universe of which we're but a tiny fleeting fragment Featuring a new foreword by Michael Shermer

Storytelling Apes Mary Sanders Pollock, 2015-05-04 The annals of field primatology are filled with stories about charismatic animals native to some of the most challenging and remote areas on earth There are for example the chimpanzees of Tanzania whose social and family interactions Jane Goodall has studied for decades the mountain gorillas of the Virungas chronicled first by George Schaller and then later more obsessively by Dian Fossey various species of monkeys Indian langurs Kenyan baboons and Brazilian spider monkeys studied by Sarah Hrdy Shirley Strum Robert Sapolsky Barbara Smuts and Karen Strier and finally the orangutans of the Bornean woodlands whom Birut Galdikas has observed passionately Humans are after all storytelling apes The narrative urge is encoded in our DNA along with large brains nimble

fingers and color vision traits we share with lemurs monkeys and apes In *Storytelling Apes* Mary Sanders Pollock traces the development and evolution of primatology field narratives while reflecting upon the development of the discipline and the changing conditions within natural primate habitat Like almost every other field primatologist who followed her Jane Goodall recognized the individuality of her study animals defying formal scientific protocols she named her chimpanzee subjects instead of numbering them thereby establishing a trend For Goodall Fossey Sapolsky and numerous other scientists whose works are discussed in *Storytelling Apes* free living primates became fully realized characters in romances tragedies comedies and never ending soap operas With this work Pollock shows readers with a humanist perspective that science writing can have remarkable literary value encourages scientists to share their passions with the general public and inspires the conservation community

an other Sharon Patricia Holland, 2023-07-03

In *an other* Sharon Patricia Holland offers a new theorization of the human animal divide by shifting focus from distinction toward relation in ways that acknowledge that humans are also animals Holland centers ethical commitments over ontological concerns to spotlight those moments when Black people ethically relate with animals Drawing on writers and thinkers ranging from Hortense Spillers Sara Ahmed Toni Morrison and C E Morgan to Jane Bennett Jacques Derrida and Donna Haraway Holland decenters the human in Black feminist thought to interrogate blackness insurgence flesh and femaleness She examines MOVE s incarnation as an animal liberation group uses sovereignty in Morrison s *A Mercy* to understand blackness indigeneity and the animal analyzes Charles Burnett s films as commentaries on the place of animals in Black life and shows how equestrian novels address Black and animal life in ways that rehearse the practices of the slavocracy By focusing on doing rather than being Holland demonstrates that Black life is not solely likened to animal life it is relational and world forming with animal lives

The Evolution of Gerald Durrell Mary Sanders Pollock, 2024-06-27

In *The Evolution of Gerald Durrell A Naturalist s Critical Biography* Mary Sanders Pollock revisits the life and work of Gerald Durrell one of the most significant environmentalist figures of the 20th century This new biography tracks Durrell s evolution

from a free range childhood on Corfu through his time in Africa South America and the islands of the Pacific and Indian Oceans Durrell's early work is described in his numerous travel narratives but his conservation activities culminated in the stationary ark a conservation zoo on the Isle of Jersey which still plays an important role in global wildlife conservation efforts This biography situates Durrell's writing collecting and conservation practices within the frameworks of animal studies conservation biology and postcolonial history Familiarizing readers with the broad range of his cultural impact from The Corfu Trilogy to his BBC television specials Pollock shows how Durrell's approach offers models for how life on earth is to thrive and survive scientists must make greater efforts to touch hearts and minds and cultural workers must communicate more about science and the perilous existence of other species

Sex and Gender Hilary M. Lips, 2020-04-10 Are sex and gender really two different things How malleable is gender identity Do both gender and sex have to be conceptualized as binaries as having two distinct but complementary categories Should we emphasize gender differences or is that the wrong question When should we call a gender difference small Are women really nonaggressive or does that label stem from stereotyping How does subtle or modern sexism work on its targets Scholarship on these and other gender related questions has exploded in recent years Hilary Lips synthesizes that research for students in an accessible and readable way Concepts on sex and gender are presented with the social context in which they were developed As in previous editions Lips takes a multicultural approach discussing the gender experiences of people from a wide range of races cultures socioeconomic statuses and gender and sexual identities She emphasizes empirical research but takes a critical approach to that research

Beasts Jeffrey Moussaieff Masson, 2014-03-13 Orcas or killer whales are one of the planet's supreme predators Alongside humans they have the most complex brains to be found in nature But while one of these two species has killed 200 million members of its own kind in the twentieth century alone the other has killed none This is where Jeffrey Masson's fascinating new book begins there is something different about humans Masson has shown us that animals can teach us much about our own emotions about love dogs contentment cats and grief elephants But they have much to teach us about the negative emotions such as anger and aggression as well and in unexpected ways In *Beasts* he demonstrates that the violence we perceive in the wild is mostly a matter of projection We link the basest human behaviour to animals to beasts and claim the high ground for our species We are least human we think when we succumb to our primitive animal instincts In fact nothing could be further from the truth Animal predators kill to survive but there is nothing in the annals of animal aggression remotely equivalent to the violence mankind has inflicted upon itself Humans and humans in our modern industrialised world in particular are the most violent species in existence We lack what all other animals have a check on aggression that serves the species rather than destroys it And it is here that animals have something vitally important to teach us about ourselves

The Emotional Lives of Animals & Children William Crain, 2014-10-17 In 2008 Bill Crain a professor of psychology at The City College of New York and his wife Ellen a pediatrician opened Safe Haven Farm Sanctuary in Poughquag New York

The sanctuary provides a permanent home to over 70 animals rescued from slaughter and abusive situations including goats sheep chickens turkeys ducks partridges and a mini horse It also has afforded Bill a tremendous opportunity to observe animals in all manner of emotional states and how their behavior casts light on the emotions of human children In *The Emotional Lives of Animals and Children* Crain honors the work of John Bowlby a psychoanalyst who began his major writings in the 1950s Bowlby drew on biologists observations of animals to provide a compelling account of children s attachment to their caretakers Today the study of attachment is extremely popular Crain writes but one would hardly know that the initial inspiration came from observations of non human animals Moreover there has been little effort to extend Bowlby s work to see how the study of animals illuminates other aspects of child development Crain suggests that the reluctance to follow Bowlby s lead reflects the Western worldview that considers humans as different from and superior to other species To think about children in the same category as animals seems to demean children But Crain discovered that the farm animals emotional behaviors can help us understand those of human children *The Emotional Lives of Animals and Children* is divided into two parts Part one discusses six emotional behaviors that are shared by animals and children fear play freedom care spirituality and resilience Part two addresses the broader social theme of our Western culture s disparagement of animals Initially children do not set themselves apart from nature but experience it with an instinctive empathy However they are eventually taught by our society to detach themselves and to devalue animals Crain writes As people attempt to move beyond society s dominant views of animals they can also draw on a neglected idea that goes back to ancient times This is the view that there is a special wisdom in the child s ways of knowing This view is found in the ancient Chinese Taoist statement wise souls are children About Safe Haven Farm Sanctuary Safe Haven Farm Sanctuary is located in Poughquag New York about an hour and a half outside of New York City Its focus is on the rescue of abused and neglected farm animals In doing so it hopes to raise awareness of the plight of animals raised for food and the benefits of a vegan diet for animals human health and the environment Wherever possible the sanctuary tries to implement environmentally sound practices such as solar heating and the use of reclaimed wood
