Animate Earth Science Intuition And Gaia:

Animate Earth Stephan Harding,2006 Originally published United Kingdom Green Books Ltd 2006 Animate Earth Stephan Harding,2009 This book argues that we need to establish a relationship with the planet as a living entity in which we are indissolubly embedded and to which we are all accountable *Aesth/ethics in Environmental Change* Sigurd Bergmann,Irmgard Blindow,Konrad Ott,2013 Can aesthetics and ethics be integrated for the good of habitats places and spaces How can the arts widen our perception of nature and deepen environmental ethics Should the political meaning of a landscape be defined solely in terms of its economic and ecological values Questions like these are explored from the angles of arts environmental ethics ecology religious studies theology art history and philosophy The book prompts discussion about the aesthetic and spiritual dimension in the environmental humanities and it offers transdisciplinary insights into the challenge of sustainability and ongoing changes in society and the environment Series Studies in Religion and the Environment Studien zur Religion und Umwelt Vol 7 **Earthy Realism** Mary Midgley,2012-07-27 GAIA named after the ancient Greek mother goddess is the notion that the Earth and the life on it form an active self maintaining whole By its use of personification it attacks the view that the physical world is inert and lifeless It has a scientific side as shown by the new university departments of earth science which bring biology and geology together to study the continuity of the cycle It also has a visionary or spiritual aspect What the contributors to this book believe is needed is to bring these two angles together With global warming now an accepted fact the lessons of GAIA have never been more relevant and urgent The Barbarian Principle Jason M. Wirth,Patrick Burke,2013-09-04 Toward the end of his life Maurice Merleau Ponty made a striking retrieval of F W J Schelling s philosophy of nature The Barbarian Principle explores the relationship between these two thinkers on this topic opening up a dialogue with contemporary philosophical and ecological significance that will be of special interest to philosophers working in phenomenology and German idealism **Gaia in Turmoil** Eileen Crist,H. Bruce Rinker,2010 Essays link Gaian science to such global environmental quandaries as climate change and biodiversity destruction providing perspectives from science philosophy politics and technology **Life in the Hothouse** Melanie Lenart,2010-05-15 In this insightful compelling and highly readable work Melanie Lenart an award winning journalist and science writer who holds a PhD in Natural Resources and Global Change examines global warming with the trained eye of a professional scientist And she presents the science in a clear straightforward manner Why does the planet s warming produce stronger hurricanes rising seas and larger floods Simple says Lenart The Earth is just doing what comes naturally Just as humans produce sweat to cool off on a hot day the planet produces hurricanes floods wetlands and forests to cool itself off Life in the Hothouse incorporates Lenart s extensive knowledge of climate science including the latest research in climate change and the most current scientific theories including Gaia theory which holds that the Earth has some degree of climate control built in As Lenart points out scientists have been documenting stronger hurricanes and larger floods for many

years There is a good reason for this she notes Hurricanes help cool the ocean surface and clear the air of carbon dioxide the main greenhouse gas responsible for global warming From the perspective of Gaia theory these responses are helping to slow the ongoing global warming and Lenart expounds upon this in a clear and understandable fashion There is hope Lenart writes If we help sustain Earth's natural defense systems including wetlands and forests perhaps Mother Earth will no longer need to rely as much on the cooling effects of what we call natural disasters many of which carry a human fingerprint At a minimum she argues these systems can help us survive the heat

Empirical Nursing Bernie Garrett, 2018-10-26 This book presents a novel approach to understanding the science and art of nursing that underpins evidence based practice It explores the foundational philosophical principles of nursing in an accessible manner to enable readers to grasp the key arguments behind empirical nursing and why it is important for nurses to understand it

Grounding God Arianne Conty, 2023-12-01 Now that we have entered the Anthropocene the geological age in which humans have altered the natural world to such an extent that nature and culture can no longer be separated the modern dichotomies of mind versus body and culture versus nature have become implausible and need to be replaced In Grounding God Arianne Conty argues that it is in the field of religion where we can find a new ontology better suited for the Anthropocene Conty calls this new religious ontology the grounding of the sacred in that it seeks to deconstruct the binaries of modernity and provide in their place a revalorization of the immanent earth and the more than human beings that inhabit it Such a grounding of the sacred is a potent means to overcome the exploitation and desecration of the earth and its nonhuman beings and to provide in its stead an inclusive cosmopolitics that extends mind into matter and culture into nature Tracing such a grounding in the Christian Buddhist neopagan and animist traditions Conty seeks to elaborate an interdisciplinary ecosophy one that uses philosophy anthropology and religious studies to provide new values for the present age

After the Human Mark C. Taylor, 2025-02-18 The world is on fire and time for avoiding impending disaster is rapidly running out This catastrophe has deeply entrenched foundations a belief in human exceptionalism and human mastery over the Earth Accelerating technological changes ranging from genetic engineering synthetic biology and nanotechnology to biobots neuroprosthetics and artificial intelligence are creating new worlds in which human beings will either be radically transformed or become extinct After the Human is an ambitious and audacious grand synthesis that weaves together philosophy theology quantum mechanics relativity theory information theory ecology plant and animal cognition and artificial intelligence to forge a new philosophical vision for the future Mark C Taylor calls for replacing human exceptionalism with a theory of radical relationalism an account of the world in which everything is interrelated and codependent People in this telling are not isolated individuals separated from each other and set apart from the complex world they are destined to dominate but integral parts of a vital web where differences enrich each other and nourish the greater whole Ranging from the grounded worlds of dirt and soil to the most abstract realms of quantum ecology After the Human reveals the alternative intelligences

and transformative possibilities that provide hope for life beyond our perilous moment
