Ethical and Political Approaches to Nonhuman Animal Issues Andrew Woodhall, Gabriel Garmendia da Trindade, 2017-08-28 This book offers ethical and political approaches to issues that nonhuman animals face The recent political turn in interspecies ethics from ethical to political approaches has arisen due to the apparent lack of success of the nonhuman animal movement and dissatisfaction with traditional approaches Current works largely present general positions rather than address specific issues and principally rely on mainstream approaches This book offers alternative positions such as cosmopolitan libertarian and left humanist thought as well as applying ethical and political thought to specific issues such as experimentation factory farming nonhuman political agency and intervention Presenting work by theorists and activists insights are offered from both ethics and politics that impact theory and practice and offer essential considerations for those engaging in interspecies ethics within the political turn era

Animals, Ethics, and Language Rebekah Humphreys, 2023-06-20 With an ever growing body of evidence on the links between different oppressions never have the debates in Critical Animal Studies surrounding intersectionality in relation to animal ethics been more important In particular the arguments related to anthropomorphic

attributes of mentality to other than humans promise to provide fruitful new ground for re assessing human animal relations This book maps the central debates surrounding anthropomorphism in relation to our descriptions of animals their lives animal mentality and meaningful communication in the nonhuman world Rebekah Humphreys synthesizes the work of critical animal theorists philosophers and cognitive ethologists and provides a critical account of how the debates concerning anthropomorphism play a key role in a proper understanding of animal ethics Research Handbook on Animal Law and Animal Rights Tomasz Pietrzykowski,Birgitta Wahlberg,2025-09-10 This Research Handbook examines contemporary animal law and its relationship to the philosophical and legal idea of animal rights Adopting an inter and multidisciplinary approach it explores the role of legal theory legal practice strategic litigation and advocacy in the global development of laws protecting animals Tomasz Pietrzykowski and Birgitta Wahlberg bring together expert contributing authors to discuss interspecies constitutionalizing and the evolution of animal law scholarship *The Oxford Handbook of Animal Organization Studies* Linda Tallberg,Lindsay Hamilton,2022 This interdisciplinary book lays out the contours of a new academic discipline Animal Organization Studies thus answering timely calls for more attention to nonhuman life in traditionally human centred fields in social science Animal Neopragmatism John Hadley,2019-08-16 This book affords a neopragmatic theory of animal ethics taking its lead from American Pragmatism to place language at the centre of philosophical analysis Following a method traceable to Dewey Wittgenstein and Rorty Hadley argues that many enduring puzzles about human interactions with animals can be dissolved by understanding why people use terms like dignity respect naturalness and inherent value Hadley shifts the debate about animal welfare and rights from its current focus upon contentious claims about value and animal mindedness to the vocabulary people use to express their concern for the suffering and lives of animals With its emphasis on public concern for animals animal neopragmatism is a uniquely progressive and democratic theory of animal ethics

Justice and food security in a changing climate Hanna Schübel,Ivo Wallimann-Helmer,2023-08-14 The UN s Sustainable Development Goals saw the global community agree to end hunger and malnutrition in all its forms by 2030 However the number of chronically undernourished people is increasing continuously Ongoing climate change and the action needed to adapt to it are very likely to aggravate this situation by limiting agricultural land and water resources and changing environmental conditions for food production Climate change and the actions it requires raise questions of justice especially regarding food security These key concerns of ethics and justice for food security due to climate change challenges are the focus of this book which brings together work by scholars from a wide range of disciplines and a multitude of perspectives These experts discuss the challenges to food security posed by mitigation geoengineering and adaptation measures that tackle the impacts of climate change Others address the consequences of a changing climate for agriculture and food production and how the Covid 19 pandemic has affected food security and animal welfare **Human/Animal Relationships in Transformation** Augusto Vitale,Simone Pollo,2022-02-11 The ethics of human animal relationships is a

growing field of academic research and a topic for public discussion and regulatory interventions from law makers governments and private institutions Human animal relationships are in transformation and understanding the nature of this process is crucial for all those who believe that the enlargement of moral and legal recognition to nonhuman animals is part of contemporary moral and political progress Understanding the nature of this process means analysing and critically discussing the philosophical scientific and legal concepts and arguments embedded in it This book contributes to the discussion by bringing together the ideas and reflections of leading experts from different disciplinary backgrounds and with a range of scientific perspectives This book both provides an up to date examination of the transformation of human animal relationships and presents ideas to foster this process

Animals and Religion Dave Aftandilian, Barbara R. Ambros, Aaron S. Gross, 2024-02-06 What do animals other than human animals have to do with religion How do our religious ideas about animals affect the lives of real animals in the world How can we deepen our understanding of both animals and religion by considering them together Animals and Religion explores how animals have crucially shaped how we understand ourselves the other living beings around us and our relationships with them Through incisive analyses of religious examples from around the world the original contributions to this volume demonstrate how animals have played key roles in every known religious tradition whether as sacred beings symbols objects of concern fellow creatures or religious teachers And through our religious imagination ethics and practices we have deeply impacted animal lives whether by domesticating sacrificing dominating eating refraining from eating blessing rescuing releasing commemorating or contemplating them Drawing primarily on perspectives from religious studies and Christian theology augmented by cutting edge work in anthropology biology philosophy and psychology Animals and Religion offers the reader a richer understanding of who animals are and who we humans are Do animals have emotions Do they think or use language Are they persons How we answer questions like these affects diverse aspects of religion that shape not only how we relate to other animals but also how we perceive and misperceive each other along axes of gender race and disability Accessibly written and thoughtfully argued Animals and Religion will interest anyone who wants to learn more about animals religion and what it means to be a human animal

Food Justice in US and Global Contexts Ian Werkheiser, Zachary Piso, 2017-07-01 This book offers fresh perspectives on issues of food justice The chapters emerged from a series of annual workshops on food justice held at Michigan State University between 2013 and 2015 which brought together a wide variety of interested people to learn from and work with each other Food justice can be studied from such diverse perspectives as philosophy anthropology economics gender and sexuality studies geography history literary criticism philosophy and sociology as well as the human dimensions of agricultural and environmental sciences As such interdisciplinary workshops are a much needed vehicle to improve our understanding of the subject which is at the center of a vibrant and growing discourse not only among academics from a wide range of disciplines but also among policy makers and community activists The book includes their perspectives offering

a wide range of approaches to and conceptions of food justice in a variety of contexts This invaluable work requires readers to cross boundaries and be open to new ideas based on different assumptions Animals and Business Ethics Natalie Thomas,2022-04-24 This book engages with some of the most pressing ethical issues that arise from the use of animals in various business practices providing interdisciplinary approaches to improving the nonhuman and human lives in animal related industries The chapters in this volume provide conceptual theoretical and practical analyses of these issues that will shape the future direction of business ethics to more fully reflect the impacts and implications of animal based businesses on society its members and nature The authors in this volume engage with topics including animal suffering and emotions the commodification of animals vegetarian and vegan businesses and diets technological innovations such as gene editing and lab cultured meat as well as captivity corporate disclosure of animal welfare policies and the possibility of humane jobs as well as the consideration of animals as stakeholders **Animal Lives Matter** Raymond Wacks,2024-02-13 **Animal Lives Matter** provides a comprehensive analysis of the legal philosophical and ethical aspects of animal rights It argues that the subject extends beyond the matter of our obligations towards animals to include our wider responsibilities for protecting the environment Drawing on numerous moral political legal religious and philosophical theories including utilitarianism deontology rights theory social contractarianism and the capabilities approach the author meticulously examines the questions of sentience speciesism personhood and human exceptionalism Lucid nuanced and academically rigorous this important book will be an essential resource for scholars of law politics philosophy ethics as well as policy makers and the general reader **An Ape Ethic and the Question of Personhood** Gregory F. Tague,2020-03-05 Gregory F Tague s **An Ape Ethic and the Question of Personhood** argues that great apes are moral individuals because they engage in a land ethic as ecosystem engineers to generate ecologically sustainable biomes for themselves and other species Tague shows that we need to recognize apes as eco engineers in order to save them and their habitats and that in so doing we will ultimately save earth s biosphere The book draws on extensive empirical research from the ecology and behavior of great apes and synthesizes past and current understanding of the similarities in cognition social behavior and culture found in apes Importantly this book proposes that differences between humans and apes provide the foundation for the call to recognize forest personhood in the great apes While all ape species are alike in terms of cognition intelligence and behaviors there is a vital contrast unlike humans great apes are efficient ecological engineers Therefore simian forest sovereignty is critical to conservation efforts in controlling global warming and apes should be granted dominion over their tropical forests Weaving together philosophy biology socioecology and elements from eco psychology this book provides a glimmer of hope for future acknowledgment of the inherent ethic that ape species embody in their eco centered existence on this planet Corporate Sustainability and Responsibility in Tourism Dagmar Lund-Durlacher,Valentina Dinica,Dirk Reiser,Matthias S. Fifka,2019-05-03 This book offers essential insights into how the world s second largest industry tourism is responding to

challenges involved in expanding the corporate social responsibility CSR concept to corporate sustainability and responsibility referred to as CSR 2.0. It analyzes the typical setup of tourism with various types of commercial agents: corporations, small and medium sized enterprises, public private partnerships, social enterprises and local cooperatives. In addition, the book examines a broad range of voluntary initiatives, the effectiveness of these efforts and how contextual and wider policy features shape these relationships. The book is divided into three parts, the first of which elaborates on strategic drivers and rationales for CSR. In turn, the second part introduces readers to design approaches for CSR programs and envisaged impacts, while part three focuses on implementation, certification, reporting and possible outcomes. Each part offers a mixture of theoretical perspectives, synthesis, analyses and case studies. The respective chapters tackle a broad spectrum of tourism sub-sectors, e.g. the cruise industry, aviation, gastronomy, nature based tourism and urban destinations.

The Routledge Handbook of Semiosis and the Brain Adolfo M. García, Agustín Ibáñez, 2022-11-14. This Handbook introduces neurosemiotics, a pluralistic framework to reconsider semiosis as an emergent phenomenon at the interface of biology and culture. Across individual and interpersonal settings, meaning is influenced by external and internal processes bridging phenomenological and biological dimensions. Yet each of these dyads has been segregated into discipline specific topics with attempts to chart their intersections proving preliminary at best. Bringing together perspectives from world leading experts, this volume seeks to overcome these disciplinary divides between the social and the natural sciences at both the empirical and theoretical levels. Its various chapters chart the foundations of neurosemiotics, characterize linguistic and interpersonal dynamics as shaped by neurocognitive, bodily, situational and societal factors and examine other daily neurosemiotic occurrences driven by faces, music, tools and even visceral signals. This comprehensive volume is a state of the art resource for students and researchers interested in how humans and other animals construe experience in such fields as cognitive neuroscience, biosemiotics, philosophy of mind, neuropsychology, neurolinguistics and evolutionary biology.

The Humean Mind Angela Coventry, Alexander Sager, 2018-10-26. David Hume (1711-1776) is widely acknowledged as one of the most important philosophers in the English language, with his work continuing to exert major influence on philosophy today. His empiricism, naturalism and psychology of the mind and the passions shape many positions and approaches in the sciences and social sciences. *The Humean Mind* seeks to provide a comprehensive survey of his work, not only placing it in its historical context but also exploring its contemporary significance. Comprising 38 chapters by a team of international contributors, the Handbook is divided into four sections: Intellectual context; Hume's thought; Hume's reception; Hume's legacy. This handbook includes coverage of all major aspects of Hume's thought, with essays spanning the full scope of Hume's philosophy. Topics explored include Hume's reception in the eighteenth and nineteenth centuries; Hume's legacy in the twentieth and twenty-first centuries; Hume's history, including an essay on Hume as historian, as well as essays on the relevance of history to Hume's philosophy and his politics, and an updated treatment of Hume's Legal Philosophy. Also included are essays on race, gender

and animal ethics Essential reading for students and researchers in philosophy Hume's work is central to epistemology metaphysics philosophy of mind philosophy of science ethics legal philosophy and philosophy of religion *Semiotic Agency* Alexei Sharov, Morten Tønnessen, 2022-02-08 This book invites readers to embark on a journey into the world of agency encompassing humans other organisms cells intracellular molecular agents colonies populations ecological systems and artificial autonomous systems We combine mechanistic and non mechanistic approaches in the analysis of the function and evolution of organisms their subagents and multi organism systems and in this way offer a theoretical platform for integrating biosemiotics with both natural science and the humanities social sciences Agents are autonomous systems that incorporate knowledge on how to make sense of their environment and use it to achieve their goals The functions of all agents are supported by mechanisms at the lowest level however the explanatory power of mechanistic analysis is not sufficient for complex agents Non mechanistic methods rely on the goal directedness of agents whose dynamics follow self stabilized dynamic attractors The properties of attractors depend on stable or slowly changing factors and such dependencies can be interpreted as sign relations if they are adaptive in nature Agents can replace or redirect mechanisms on demand in order to preserve their functions for performing higher level semiotic functions mechanisms are thus only means We assume that mechanism and semiosis are not mutually exclusive and that simple agents can interpret signs mechanistically This assumption allows us to extend semiotic analysis to all agents including ribosomes in cells computers and robots This book challenges established traditions in natural science and the humanities social sciences semiotics no longer appears as restricted to humans and rational thinking and biology is no longer limited to rely exclusively on mechanistic reasoning

The Routledge Handbook of Love in Philosophy Adrienne M. Martin, 2019-01-15 The Routledge Handbook of Love in Philosophy collects 39 original chapters from prominent philosophers on the nature meaning value and predicaments of love presented in a unique framework that highlights the rich variety of methods and traditions used to engage with these subjects This volume is structured around important realms of human life and activity each of which receives its own section I Family and Friendship II Romance and Sex III Politics and Society IV Animals Nature and the Environment V Art Faith and Meaning VI Rationality and Morality VII Traditions Historical and Contemporary This last section includes chapters treating love as a subject in both Western and non Western philosophical traditions The contributions all appearing in print here for the first time are written to be accessible and compelling to non philosophers and philosophers alike and the volume as a whole encourages professional philosophers teachers students and lay readers to rethink standard constructions of philosophical canons **An Ethics Beyond** Kevin Richard Kaiser, 2019-07-22 This study examines the fiction of contemporary American author George Saunders in terms of how it presents situations applicable to the chief notions of posthumanist ethics and how these conceptions concern nonhuman animals which are prevalent in his writing Posthumanist ethics can help us understand what is at play in Saunders's fiction Meanwhile his texts can help us understand what is at

stake in posthumanist ethics This interdisciplinary project may be beneficial both to conceiving new notions of ethics that are more inclusive and more implicitly to understanding the relevance of Saunders s fiction to the current American sociocultural climate
