Oceanic Archives, Indigenous Epistemologies, and Transpacific American Studies Kendall L. Johnson, Yuan Shu, Otto Heim, 2019 The field of transnational American studies is going through a paradigm shift from the transatlantic to the transpacific This volume demonstrates a critical method of engaging the Asian Pacific the chapters present alternative narratives that negotiate American dominance and exceptionalism by analyzing the experiences of Asians and Pacific Islanders from the vast region including those from the Philippines Vietnam Indonesia Hawaii Guam and other archipelagos Contributors make use of materials from oceanic archives retrieving what has seemingly been lost forgotten or downplayed inside and outside state bound archives state legal preoccupations and state prioritized projects The result is the recovery of indigenous epistemologies which enables scholars to go beyond US based sources and legitimates third world knowledge production and dissemination Surprising findings and unexpected perspectives abound in this work Minnan traders from southern China are identified as the agents who connected the Indian Ocean with the Pacific making the Manila Galleon trade in the sixteenth century the first completely global commercial enterprise The Chamorro poetry of Guam gives a view of America from beyond its national borders and articulates the cultural pride of the Chamorro against US colonialism and imperialism The continuing distortion of indigenous claims to the sovereignty of Hawaii is analyzed through a reading of the most widely circulated English translation of the creation myth Kumulipo There is also a critique of the Korean involvement in the American War in Vietnam which was informed and shaped by Korean economy and politics in a global context By investigating the transpacific as moments of military cultural and geopolitical contentions this timely collection charts the reach and possibilities of the latest developments in the most dynamic form of transnational American studies

Transpacific Studies Janet Alison Hoskins, Viet Thanh Nguyen, 2014-08-31 The Pacific has long been a space of conquest exploration fantasy and resistance Pacific Islanders had established civilizations and cultures of travel well before European explorers arrived initiating centuries of upheaval and transformation The twentieth century with its various wars fought in and over the Pacific is only the most recent era to witness military strife and economic competition While Asia Pacific and Pacific Rim were late twentieth century terms that dealt with the importance of the Pacific to the economic political and cultural arrangements that span Asia and the Americas a new term has arisen the transpacific In the twenty first century U S efforts to dominate the ocean are symbolized not only in the Pacific pivot of American policy but also the development of a Transpacific Partnership This partnership brings together a dozen countries not including China in a trade pact whose aim is to cement U S influence That pact signals how the transpacific up to now an academic term has reached mass consciousness Recognizing the increasing importance of the transpacific as a word and concept this anthology proposes a framework for

transpacific studies that examines the flows of culture capital ideas and labor across the Pacific These flows involve Asia the Americas and the Pacific Islands The introduction to the anthology by its editors Janet Hoskins and Viet Thanh Nguyen consider the advantages and limitations of models found in Asian studies American studies and Asian American studies for dealing with these flows The editors argue that transpacific studies can draw from all three in order to provide a critical model for considering the geopolitical struggle over the Pacific with its attendant possibilities for inequality and exploitation Transpacific studies also sheds light on the cultural and political movements artistic works and ideas that have arisen to contest state corporate and military ambitions In sum the transpacific as a concept illuminates how flows across the Pacific can be harnessed for purposes of both domination and resistance The anthology s contributors include geographers Brenda S A Yeoh Weiqiang Lin sociologists Yen Le Espiritu Hung Cam Thai literary critics John Carlos Rowe J Francisco Benitez Yunte Huang Viet Thanh Nguyen and anthropologists Xiang Biao Heonik Kwon Nancy Lutkehaus Janet Hoskins as well as a historian Laurie J Sears and a film scholar Akira Lippit Together these contributors demonstrate how a transpacific model can be deployed across multiple disciplines and from varied locations with scholars working from the United States Singapore Japan and England Topics include the Cold War the Chinese state U S imperialism diasporic and refugee cultures and economies national cinemas transpacific art and the view of the transpacific from Asia These varied topics are a result of the anthology s purpose in bringing scholars into conversation and illuminating how location influences the perception of the transpacific But regardless of the individual view what the essays gathered here collectively demonstrate is the energy excitement and insight that can be generated from within a transpacific framework

Crossroads in American Studies Frederike Offizier, Marc Priewe, Ariane Schröder, 2016 Written by a group of U S and European scholars *Crossroads in American Studies* fittingly represents new areas of American studies that are changing the discipline The extensive collection of articles provides both a general overview and many interesting expansions in the areas of transnational and biocultural studies Amongst others the transpacific hemispheric cosmopolitan gerontocentric and affective approaches to the Americas complicate and enrich our understanding of the field Focusing on these crossroads the contributions assembled in this volume are in honor of the wide influence and diverse interests of Rudiger Kunow who has served as Professor of American Studies at the University of Potsdam and as President of the German Association of American Studies

Developing Transnational American Studies Nadja Gernalzick, Heike C. Spickermann, 2019 Transnational American Studies have been developed by international and internationally minded scholars to address the need for border crossing awareness knowledge and consciousness of difference In a decisive change from the comparativist pattern of investigation between two or more assumed units the transnational approach intends a further opening of cultural systems With their transnational turn the focus of American Studies has become relocated to increasingly international and global concerns of knowledge production and cultural transfer as well as to multi and transnational discourses 0This volume combines Transnational American Studies

from diverse angles in the four general areas Repositioning the American South Life Literature Ecocriticism Life Writing and Medicine and Critical Studies of the Nation Written by scholars disciplinarily and institutionally linked to American Studies departments mainly the themes are however not restricted to American Studies as a nationally bound field but extend and pertain to transnational and global discourses and their conceptual composition and processing **Special Issue on**

Takezawa,Gary Y. Okihiro,2016-09-30 Trans Pacific Japanese American Studies is a unique collection of essays derived from a series of dialogues held in Tokyo Kyoto and Los Angeles on the issues of racializations gender communities and the positionalities of scholars involved in Japanese American studies The book brings together some of the most renowned scholars of the discipline in Japan and North America It seeks to overcome past constraints of dialogues between Japan and U S based scholars by providing opportunities for candid extended conversations among its contributors While each contribution focuses on the field of Japanese American studies approaches to the subject vary ranging from national and village archives community newspapers personal letters visual art and personal interviews Research papers are divided into six sections Racializations Communities Intersections Borderlands Reorientations and Teaching Papers by one or two Japan based scholar s are paired with a U S based scholar reflecting the book s intention to promote dialogue and mutuality across national formations The collection is also notable for featuring underrepresented communities in Japanese American studies such as Okinawan war brides Koreans women and multiracials Essays on subject positions raise fundamental questions Is it possible to engage in a truly equal dialogue when English is the language used in the conversation and in a field where English language texts predominate How can scholars foster a mutual respect when U S centrism prevails in the subject matter and in the field s scholarly hierarchy Understanding foundational questions that are now frequently unstated assumptions will help to disrupt hierarchies in scholarship and work toward more equal engagements across national divides Although the study of Japanese Americans has reached a stage of maturity contributors to this volume recognize important historical and contemporary neglects in that historiography and literature Japanese America and its scholarly representations they declare are much too deep rich and varied to contain in a singular narrative or subject position **Approaching**

Transpacific Visions Yasuko Hassall Kobayashi, Shinnosuke Takahashi, 2021 This book argues that transpacific

history cannot be comprehended without including vertical connections namely those between the southern hemisphere and the northern hemisphere It explores such connections by uncovering small histories of ordinary people s attempts at v
nements which they undertake by means of uneven unlevel and multidirectional mobilities In this way this book goes beyond the usual notion of transpacific history as a matter of Northern Hemisphere centric connections between the United States and Asian countries and enables us to imagine a transpacific space as a more dynamic and multi faceted world of human mobilities and connections In this book both eminent and burgeoning historians uncover the stories of little known myriad encounters in various parts of the Asia Pacific region By exploring cases whose actors include soldiers missionaries colonial administrators journalists essayists and artists the book highlights the significance of vertical perspectives in understanding complex histories of the region

The US-Japan Security Community Hidekazu Sakai, 2018-08-14 Drawing on the work of Karl W Deutsch this book argues that the United States and Japan have formed their own security community based on a sense of collective identity In so doing it provides a new theoretical outlook on co operation between the United States and Japan offering a fresh understanding of their bilateral relationship as one that goes beyond a mere military alliance or free trade partnership Taking an empirical approach Sakai analyzes three key case studies the Persian Gulf War of 1990 1 the terrorist attacks of September 11 2001 and the Tohoku Earthquake and Tsunami of 2011 He examines how the United States and Japan interacted with one another in their discourses and behaviors in these three instances and thus demonstrates the existence of a collective identity between the two nations
