Remaking the Republic Christopher James Bonner, 2020-03-20 Citizenship in the nineteenth century United States was an ever moving target The Constitution did not specify its exact meaning leaving lawmakers and other Americans to struggle over the fundamental questions of who could be a citizen how a person attained the status and the particular privileges citizenship afforded Indeed as late as 1862 U S Attorney General Edward Bates observed that citizenship was now as little understood in its details and elements and the question as open to argument and speculative criticism as it was at the founding of the Government Black people suffered under this ambiguity but also seized on it in efforts to transform their nominal freedom By claiming that they were citizens in their demands for specific rights they were Christopher James Bonner argues at the center of creating the very meaning of American citizenship In the decades before and after Bates's lament free African Americans used newspapers public gatherings and conventions to make arguments about who could be a citizen the protections citizenship entailed and the obligations it imposed They thus played a vital role in the long fraught process of determining who belonged in the nation and the terms of that belonging *Remaking the Republic* chronicles the various ways African Americans from a wide range of social positions throughout the North attempted to give meaning to American citizenship over the course of the nineteenth century Examining newspapers state and national conventions public protest meetings legal cases and fugitive slave rescues Bonner uncovers a spirited debate about rights and belonging among African Americans the stakes of which could determine their place in U S society and shape the terms of citizenship for all Americans

LULAC, Mexican Americans, and National Policy Craig A. Kaplowitz, 2005-03-28 Through the dedicated intervention of LULAC and other Mexican American activist groups the understanding of civil rights in America was vastly expanded in the late 1960s and early 1970s Mexican Americans gained federal remedies for discrimination based not simply on racial but also on cultural and linguistic disadvantages Generally considered one of the more conservative ethnic political organizations LULAC had traditionally espoused nonconfrontational tactics and had insisted on the identification of Mexican Americans as white But by 1966 the changing civil rights environment new federal policies that protected minority groups and rising militancy among Mexican American youth led LULAC to seek federal protections for Mexican Americans as a distinct minority In that year LULAC joined other Mexican American groups in staging a walkout during meetings with the Equal Employment Opportunity Commission in Albuquerque In this book Craig A Kaplowitz draws on primary sources at both national and local levels to understand the federal policy arena in which the identity issues and power politics of LULAC were played out At the national level he focuses on presidential policies and politics since civil rights has been preeminently a presidential issue He also examines the internal

tensions between LULAC members ethnic allegiances and their identity as American citizens which led to LULAC s attempt to be identified as white while paradoxically claiming policy benefits from the fact that Mexican Americans were treated as if they were non white This compelling study offers an important bridge between the history of social movements and the history of policy development It also provides new insight into an important group on America s multicultural stage
