The Economic Diplomacy of Ostpolitik Werner D. Lippert, 2010-12-01 Despite the consensus that economic diplomacy played a crucial role in ending the Cold War very little research has been done on the economic diplomacy during the crucial decades of the 1970s and 1980s This book fills the gap by exploring the complex interweaving of East West political and economic diplomacies in the pursuit of détente The focus on German chancellor Willy Brandt s Ostpolitik reveals how its success was rooted in the usage of energy trade and high tech exchanges with the Soviet Union His policies and visions are contrasted with those of U S President Richard Nixon and the Realpolitik of Henry Kissinger The ultimate failure to coordinate these rivaling détente policies and the resulting divide on how to deal with the Soviet Union left NATO with an energy dilemma between American and European partners one that has resurfaced in the 21st century with Russia s politicization of energy trade This book is essential for anyone interested in

A Grand Strategy for America Robert J. Art, 2013-02-15 The United States today is the most powerful nation in the world perhaps even stronger than Rome was during its heyday It is likely to remain the world's preeminent power for at least several decades to come What behavior is appropriate for such a powerful state To answer this question Robert J Art concentrates on grand strategy the deployment of military power in both peace and war to support foreign policy goals He first defines America's contemporary national interests and the specific threats they face then identifies seven grand strategies that the United States might contemplate examining each in relation to America's interests The seven are dominion forcibly trying to remake the world in America's own image global collective security attempting to keep the peace everywhere regional collective security confining peacekeeping efforts to Europe cooperative security seeking to reduce the occurrence of war by limiting other states' offensive capabilities isolationism withdrawing from all military involvement beyond U.S. borders containment holding the line against aggressor states and selective engagement choosing to prevent or to become involved only in those conflicts that pose a threat to the country's long-term interests Art makes a strong case for selective engagement as the most desirable strategy for contemporary America It is the one that seeks to forestall dangers not simply react to them that is politically viable at home and abroad and that protects all U.S. interests both essential and desirable Art concludes that selective engagement is not a strategy for all times but it is the best grand strategy for these times

Compound Containment Dong Jung Kim, 2022-03-07 When does a reigning great power of the international system supplement military containment of a challenging power by restricting its economic exchanges with that state Scholars of great power politics have traditionally focused on examining a reigning power's military containment of a challenging power In direct contrast Compound Containment demonstrates that these conventional studies are flawed without a sound understanding of the multilayered aspects of containment strategy in great power politics Since economic capacity and military power are intimately linked to one another countering a challenging power requires addressing both economic and military dimensions Nonetheless this nexus of security and economy in a reigning power's response to a challenging power cannot be explained by traditional theories that dominate research in international security Author Dong Jung Kim fills a gap in the scholarship on great power competition by investigating when a reigning power will make its military containment of a challenging power compound by simultaneously employing restrictive economic measures Its main theoretical claims are corroborated by an analysis of key historical cases of reigning power challenging power competition This book also offers policy prescriptions for the United States by examining whether the United States is in a position to complement military containment of China with restrictive economic measures
