Historic Scotland The Ancient Monuments Of Orkney:

The Ancient Monuments of Orkney Anna Ritchie, James Neil Graham Ritchie, 1988 **The Ancient Monuments of Orkney** Patrick Ashmore, 1999 **Twelfth Report with an Inventory of the Ancient Monuments of Orkney & Shetland** Royal Commission on the Ancient and Historical Monuments and Constructions of Scotland, 1946 *Ancient Monuments in Orkney* Hugh Marwick, 1952 Monuments of Orkney C. R. Wickham-Jones, 2014-02-24 Orkney based archaeologist Caroline Wickham Jones explores more than 60 of Orkney's monuments in concise and accessible terms set in context by a brief history of the islands *Orkney* Caroline Wickham-Jones, 2013-05-13 Orkney lies only 20 miles north of mainland Scotland yet for many centuries its culture was more Scandinavian than Scottish Strong westerly winds account for the scarcity of trees on Orkney and also for the tradition of well constructed stone structures As a result the islands boast a large number of exceptionally well preserved remains which help us to form a detailed picture of Orcadian life through the ages Sites and remains to be explored include settlements from the Stone Age stone circles and burials from the Bronze Age Iron Age brochs Viking castles the magnificent cathedral of St Magnus in Kirkwall Renaissance palaces a Martello tower from the Napoleonic Wars and numerous remains from the Second World War In this updated edition of her best selling book Caroline Wickham Jones who has worked extensively on Orcadian sites for many years introduces the history of the islands and provides a detailed survey of the principal places and sites of historic interest *Neolithic Scotland* Gordon Noble, 2006-06-19 This is an account of the Neolithic period in Scotland from its earliest traces around 4000 BC to the transformation of Neolithic society in the Early Bronze Age fifteen hundred years later Gordon Noble interprets Scottish material in the context of debates and issues in European archaeology comparing sites and practices identified in Scotland to those found elsewhere in Britain and beyond He considers the nature and effects of memory sea and land travel ritualisation island identities mortuary practice symbolism and environmental impact He synthesises excavations and research conducted over the last century and more bringing together the evidence for understanding what happened in Scotland during this long period His long term and regionally based analysis suggests new directions for the interpretation of the Neolithic more generally After outlining the chronology of the Neolithic in Europe Dr Noble considers its origins in Scotland He investigates why the Earlier Neolithic in Scotland is characterised by regionally distinct monumental traditions and asks if these reflect different conceptions of the world He uses a long term perspective to explain the nature of monumental landscapes in the Later Neolithic and considers whether Neolithic society as a whole might have been created and maintained through interactions at places where large scale monuments were built He ends by considering how the Neolithic was transformed in the Early Bronze Age through the manipulation of the material remains of the past Neolithic Scotland provides a comprehensive approachable and up to date account of the Scottish Neolithic Such a book has not been available for many years It will be widely welcomed **Walford's Guide to Reference Material: Social and historical sciences,**

Excavations at Milla Skerra Sandwick, Unst Olivia Lelong, 2019-03-31 During the late 1st millennium BC into the early 1st millennium AD the small island of Unst in the far north of the Shetland and British Isles was home to well established and connected farming and fishing communities The Iron Age settlement at Milla Skerra was occupied for at least 500 years before it was covered with storm blown sand and abandoned Although part of it had been lost to the sea excavation revealed many details of the life of the settlement and how it was reused over many generations From the middle of the 1st millennium BC people were constructing stone walled yards and filling them with hearth waste and midden material Later inhabitants built a house on top with a paved floor and successive hearths and more domestic rubbish accumulated inside it Outside were new yards and workshops for crafts and metalworking which were remodelled several times The buildings fell into disrepair and became a dumping ground for domestic waste until the 2nd or 3rd century AD when sand buried the settlement Within a few generations a man was buried beside the ruins along with some striking objects Thousands of artefacts and environmental remains from Milla Skerra reveal the everyday practices and seasonal rhythms of the people that lived in this windswept and remote island settlement and their connections to both land and sea

Between the Wind and the Water Caroline Wickham-Jones, 2014-04-30 The archaeological sites of Orkney give us an unparalleled glimpse into prehistory Inscribed as the Heart of Neolithic Orkney World Heritage Site in 1999 four great monuments the village of Skara Brae the Ring of Brodgar the Stones of Stenness and the burial mound of Maeshowe are also at the center of the archipelago's story This book looks at what makes these monuments so special Caroline Wickham Jones explores the Neolithic world in which they were built how they came to be a focus through the ages and what they mean today Picts saints Vikings antiquarians and tourists populate Orkney's past a history which is channeled through these dances of stones This new second edition replaces the highly successful and widely used first edition which sold over 1 000 copies The text has been fully updated to take account of recent discoveries and research including the now world famous site Ness of Brodgar In addition there are over thirty new images including stunning photographs of Orkney's archaeology and landscape

Grave Goods Anwen Cooper, Duncan Garrow, Catriona Gibson, Melanie Giles, Neil Wilkin, 2021-12-22 Britain is internationally renowned for the high quality and exquisite crafting of

its later prehistoric grave goods c 4000 BC to AD 43 Many of prehistoric Britain's most impressive artefacts have come from graves Interred with both inhumations and cremations they provide some of the most durable and well preserved insights into personal identity and the prehistoric life course yet they also speak of the care shown to the dead by the living and of people's relationships with things Objects matter This book's title is an intentional play on words These are objects in burials but they are also goods material culture that must be taken seriously Within it we outline the results of the first long term large scale investigation into grave goods during this period which enables a new level of understanding of mortuary practice and material culture throughout this major period of technological innovation and social transformation Analysis is structured at a series of different scales ranging from macro scale patterning across Britain to regional explorations of continuity and change to site specific histories of practice to micro scale analysis of specific graves and the individual objects and people within them We bring these different scales of analysis together in the first ever book focusing specifically on objects and death in later prehistoric Britain Focusing on six key case study regions the book innovatively synthesises antiquarian reports research projects and developer funded excavations At the same time it also engages with and develops a number of recent theoretical trends within archaeology including personhood object biography and materiality ensuring that it will be of relevance right across the discipline Its subject matter will also resonate with those working in anthropology sociology museology and other areas where death burial and the role of material culture in people's lives are key contemporary issues

Landscapes Revealed Amanda Brend, Nick Card, Jane Downes, Mark Edmonds, James Moore, 2020-09-30 Winner Current Archaeology 2023 Book of the Year 2023 This volume brings together several years of work devoted to the wider landscape of the Heart of Neolithic Orkney World Heritage Site It documents the results of a program of geophysical and related survey across an area of c 285 hectares between Skara Brae on the west Orkney coast and Maeshowe by the Loch of Stenness The project has made it possible to talk for the first time about the landscape context of some of the most remarkable and renowned prehistoric monuments in Western Europe The aims are to synthesize the data from different forms of survey and to document the changing character and development of this landscape over time The results are genuinely remarkable are presented in a manner which makes the material of interest and value to a relatively wide readership with an array of images which fully document and interpret the evidence Survey work at a landscape scale tends to deal with palimpsests Here descriptive sections are set within a thematic structure designed to explore the changing use and significance of different areas over time The results shed important new light on the character and extent of known prehistoric sites and ceremonial monuments But they also document the afterlives of

these and other places and their relation to the lived landscapes of the historic and more recent past In tracing the changing configuration of the World Heritage Area we can begin appreciate this landscape as an artifact of several millennia of dwelling working land attending to wider worlds and to the past itself *Scotland: Archaeology and Early History* J N Graham Ritchie,2019-08-07 No detailed description available for Scotland *Orkney* Anna Ritchie,1996 The most complete and authoritative look at Scottish history and its rich archaeological heritage Each book in the series tells the story of a particular area of Scotland from its earliest days of settlement to up to date information on modern society *British and Irish Archaeology* ,1994 ***The Gentleman's Magazine, and Historical Chronicle, for the Year ...*** ,1864

Experimental Archaeology and Neolithic Architecture John Hill,2024-03-04 Our understanding of the construction processes involved with British Neolithic architecture needs further investigation The people were preliterate and there is no archaeological evidence of written or pictorial information regarding construction So how could they build complex monuments like Stonehenge without a plan This book argues that the Neolithic builders used rudimentary techniques to plan before building their monuments circa 4000 2500 BC essentially using ropes to set out the physical design of any structure they intended to build whilst finger reckoning numeracy dictated how their measured ropes were folded to position the monument s features Finally they used the sun s shadow at midday to achieve orientation To support this premise the book offers both the results of the author s rope experiments and instructions for repeating them Importantly this form of experimental archaeology delivers a unique approach for understanding the nature of complex Neolithic architecture Essentially the book explains the mental processes involved between design and construction *The Topographical, Statistical, and Historical Gazetteer of Scotland: I-Z* ,1842
