The [American College of Surgeons National Surgical Quality Improvement Program \(ACS NSQIP®\) Surgical Risk Calculator](#) was developed in 2013 as a decision support tool to "provide accurate, patient-specific risk information to guide both surgeon decision making and informed consent."¹⁻³ Since the introduction of the ACS NSQIP Surgical Risk Calculator, several studies have been published validating its use for a range of surgical procedures.⁴⁻⁷ Little has been published, however, about how this important tool may also be used for surgical education in addition to quality improvement in clinical practice.

This article describes our experience with incorporating the ACS NSQIP Surgical Risk Calculator (see Figure 1) into weekly morbidity and mortality (M&M) conferences at the department of surgery, New York Presbyterian Hospital Weill Cornell Medicine, NY.
