Active Living Cognitive Functioning And Aging Aging Exercise And Cognition:

Active Living, Cognitive Functioning, and Aging Leonard W. Poon, Wojtek J. Chodzko-Zajko, Phillip D. Tomporowski, 2006 The first title in a new series this is an essential resource designed to introduce key issues and to raise consciousness among researchers students and policy makers of the importance of an active lifestyle for the mind as a person ages Aging, Exercise, and Cognition Series Package Wojtek Chodzko-Zajko, Leonard Poon, Waneen Spirduso, 2009-10-08 Human Kinetics Aging Exercise and Cognition series presents advanced research and key issues for understanding and researching the links between exercise aging and cognition The three volumes in this series are essential references for cognitive gerontologists medical and health science researchers exercise science researchers and professionals and public health administrators interested in scientific evidence demonstrating the beneficial effects of regular physical activity on cognitive functioning and general health during aging In Active Living Cognitive Functioning and Aging internationally known experts present state of the art findings related to exercise and cognitive functioning of older adults The book s review of research on pertinent issues in measurement and physiological mechanisms will raise consciousness among researchers practitioners policy makers and the public about the beneficial effects of an active lifestyle on the mind during the aging process Exercise and Its Mediating Effects on Cognition shows that although many factors contribute to a healthy mind an active lifestyle provides positive contributions to the cognitive functioning of the aging brain The text examines how physical activity can indirectly affect cognitive function by influencing mediators such as sleep quality nutrition disease states anxiety and depression that affect physical and mental resources for cognition This volume also identifies and studies key sources of individual variations in exercise and cognitive processes Enhancing Cognitive Functioning and Brain Plasticity offers a synergistic view of the complex role of exercise physical activity and intellectual stimulation in the cognitive and brain functioning of older adults The text examines exercise and nonexercise interventions shown to influence cognition and brain plasticity in elderly humans and older animals and it explains how state of the art neuroimaging measures are used in the study of individual differences in cognition and brain functioning *Exercise and Its Mediating Effects on Cognition* Waneen Wyrick Spirduso, Leonard W. Poon, Wojtek J. Chodzko-Zajko, 2007 This title seeks to expand on reader s understanding by examining whether and how physical activity could indirectly affect cognitive function by influencing mediators that provide physical and mental resources for cognition *The Oxford Handbook of Prevention in Counseling Psychology* Elizabeth Vera, 2012-10-18 The Oxford Handbook of Prevention in Counseling Psychology presents a lifespan approach to prevention that emphasizes strengths of individuals and communities integrates multicultural and social justice perspectives and includes best practices in the prevention of a variety of psychological problems in particular populations *Journal of Sport & Exercise Psychology*, 2008 *Positive Psychology and the Body: the Somatopsychic Side to Flourishing* Kate Hefferon, 2013-07-16 As positive psychology continues to make leaps and bounds in terms of scientific

advancement the focus on the importance of the body within optimal functioning is still lagging Positive Psychology and the Body provides a critical reflection on this omission highlighting the mounting corpus of scientific research completed on the physical mechanisms which assist either momentary experiences of pleasure or longer lasting feelings of meaning and self development Indispensable reading for students of well being positive psychology and sports psychology the book spans topics such as physical activity genetics interpersonal touch positive sexual behaviours nutrition and many more Those studying and researching coaching health clinical psychology and counselling psychology will also find the book valuable reading With contributions from Angela Clow and Michael Pluess Finally an author has addressed the white elephant in the room the human body Arguably one of the most important aspects of the self the body has long been overlooked by positive psychologists as a serious point of study This book has it all from sex to genetics to illness Hefferon brings an expert review of research clear advice and fresh thinking Dr Robert Biswas Diener Managing Director Positive Acorn LLC With this fine textbook Positive Psychology expands its scope considerably to include new and important perspectives from the very foundation of any psyche the body Indeed we may argue that as much as any organ the psyche is part of the body if certainly still very strangely so Kate Hefferon with her colleagues are to be strongly applauded for making new understandings of the mind body unity so accessible to students and everyone else interested in this fascinating topic Hans Henrik Knoop Aarhus University Denmark and President European Network for Positive Psychology In a field positive psychology overcrowded with simplistic treatments of happiness and the good life Kate Hefferon has put together a truly original book By linking principles of positive psychology with the body Hefferon brings to light the need for a more holistic approach to the good life one that honors the reality that we carry out this project called life tethered to this world through our bodies Anybody interested in a more grounded positive psychology should read this book Corey L M Keyes Professor of Sociology Emory University USA In showing the relevance of positive psychology to sexuality nutrition health and physical activity Kate Hefferon pushes the boundaries of positive psychology into new territory Packed with ideas that we can apply in our own lives students and others interested in positive psychology will find this book an excellent introduction Well worth the time to read Stephen Joseph author of What Doesn't Kill Us The New Psychology of Posttraumatic Growth

Aging and Diversity
Lisa Wagner, Chandra M Mehrotra, Man Guo, 2025-09-22 Aging and diversity intersect in important ways as individuals from different backgrounds experience aging through distinct lenses shaped by traditions values and beliefs As the older population in the United States is becoming more diverse it is important to understand the characteristics the potential and the needs of this population In this new and fully revised edition of *Aging and Diversity* Lisa S Wagner Chandra Mehrotra and Man Guo address key topics in diversity and aging discussing how the aging experience is affected by not only race and ethnicity but also gender religious affiliation socioeconomic status rural urban community location and sexual orientation and gender identity Taking this broad view of human diversity allows the authors to convey some of the rich complexities facing

aging populations complexities that provide both challenges to meet the needs of a diverse population of elders and opportunities to learn how to live in a pluralistic society Wagner Mehrotra and Guo present up to date knowledge and scholarship about aging and diversity in a way that engages readers in active learning placing ongoing emphasis on developing readers knowledge and skills fostering higher order thinking and encouraging exploration of personal values and attitudes Best Practice Approaches to the Study of Cognitive Functioning and Physical Activity/Sports Antonio

Singleton, 2023-05-05 Language fundamentally defines and distinguishes us as humans as members of society and as individuals As we go through life our relationship with language and with learning shifts and changes but it remains significant This book is an up to date resource for graduate students and researchers in second language L2 acquisition who are interested in language learning across the lifespan The main goal is to survey and evaluate what is known about the linguistic cognition affect associations that occur in L2 learning from birth through senescence passing through the stages of childhood adolescence adulthood and third age the extent to which L2 acquisition may be seen as contributing to healthy and active aging the impact of the development of personalized technology enhanced communicative L2 environments and how these phenomena are to be approached scientifically and methodologically The effects of certain specific variables such as gender socio economic background and bilingualism are also analyzed as we argue that chronological age does not determine the positioning of L2 learners across the lifespan age is part of a complex web of social distinctions such as psychological and individual factors that intersect in the construction of a learner s relative status and opportunities
