Albrecht Altdorfer And The Origins Of Landscape Revised And Expanded Second Edition:

Albrecht Altdorfer and the Origins of Landscape Christopher S. Wood, 2013-07-15 In the early sixteenth century Albrecht Altdorfer promoted landscape from its traditional role as background to its new place as the focal point of a picture His paintings drawings and etchings appeared almost without warning and mysteriously disappeared from view just as suddenly In Albrecht Altdorfer and the Origins of Landscape Christopher S Wood shows how Altdorfer transformed what had been the mere setting for sacred and historical figures into a principal venue for stylish draftsmanship and idiosyncratic painterly effects At the same time his landscapes offered a densely textured interpretation of that quintessentially German locus the forest interior This revised and expanded second edition contains a new introduction revised bibliography and fifteen **Play Among Books** Miro Roman, Alice ch3n81,2021-12-06 How does coding change the way we additional illustrations think about architecture This question opens up an important research perspective In this book Miro Roman and his AI Alice ch3n81 develop a playful scenario in which they propose coding as the new literacy of information They convey knowledge in the form of a project model that links the fields of architecture and information through two interwoven narrative strands in an infinite flow of real books Focusing on the intersection of information technology and architectural formulation the authors create an evolving intellectual reflection on digital architecture and computer science Scenery in Postwar Film and Photography Henrik Gustafsson, 2019-05-24 This book offers a rare and innovative consideration of an enduring tendency in postwar art to explore places devoid of human agents in the wake of violent encounters To see the scenery together with the crime elicits a double interrogation not merely of a physical site but also of its formation as an aesthetic artefact and ultimately of our own acts of looking and imagining Closely engaging with a vast array of works made by artists filmmakers and photographers each who has forged a distinct vantage point on the aftermath of crime and conflict the study selectively maps the afterlife of landscape in search of the political and ethical agency of the image By way of a thoroughly interdisciplinary approach Crime Scenery in Postwar Film and Photography brings landscape studies into close dialogue with contemporary theory by paying sustained attention to how the gesture of retracing past events facilitates new configurations of the present and future Native American Landscapes Cheryl Claassen, 2024-01-12 This collection of essays focuses on what Cheryl Claassen terms the multi vocal landscape the idea that different groups and genders look upon the same natural features but perceive different meanings and potential in what they are seeing Through ten chapters various contributors showcase the ways in which native peoples see and interact with the natural world At the heart of this book is the idea that Europeans associated nature with the feminine and saw the natural world as a passive frontier to be dominated Native Americans however looked at landscape differently They saw nature as a place in which to engage in complex negotiations between spirits and humans This approach to nature cemented a relationship to the land based more on a partnership rather than subjugation These essays deepen our understanding of the interaction between native people

and the land While other books focus on the gendered gaze of European men upon the landscape this collection emphasizes that native men and native women looked upon natural formations and constructed landscapes differently from one another a difference in perception that is important for archaeologists and anthropologists to understand While there have been advances toward admitting this more complex view in the rest of the world Native American Landscapes is the first to focus on how native men and women viewed the world around them Native American Landscapes is organized by region taking readers across the country from the rock shelters of the Cumberland Plateau in the east to the Mojave Desert and the Mexican Gulf Coast then north to what is now British Columbia and farther west to Hawaii Readers of this collection through a study of creation myths vision quests fertility shrines and other ritualized uses of landscape will learn more about the land and about humans perception of our natural surroundings which forms the bedrock of our present relationship with the natural world CHERYL CLAASSEN is professor of anthropology at Appalachian State University She is the author or editor of six books on Native American prehistory including Feasting with Shellfish in the Southern Ohio Valley Shells Rituals and Beliefs in Archaic North America and Women in Prehistory North America and Mesoamerica Solitudo .2018-05-23 This book explores the spatial material and affective dimensions of solitude in the late medieval and early modern periods a hitherto largely neglected topic Its focus is on the dynamic qualities of space and place which are here understood as being shaped structured and imbued with meaning through both social and discursive solitary practices such as reading writing studying meditating and praying Individual chapters investigate the imageries and imaginaries of outdoor and indoor spaces and places associated with solitude and its practices and examine the ways in which the space of solitude was conceived of imagined and represented in the arts and in literature from about 1300 to about 1800 Contributors include Oskar B tschmann Carla Benzan Mette Birkedal Bruun Dominic E Delarue Karl A E Enenkel Christine G ttler Agn s Guiderdoni Christiane J Hessler Walter S Melion Rapha le Preisinger Bernd Roling Paul Smith Marie Theres Stauffer Arnold A Witte and Lucas Cranach Jennifer Nelson, 2024-06-05 A revealing new account of the life and work of this early Steffen Zierholz modern German printmaker This captivating biography brings Lucas Cranach the Elder into the spotlight for the twenty first century The illuminating narrative unveils an artist whose vision transcended personal brilliance as he sought to elevate a nascent nation and foster a sense of community with his work Perhaps Cranach's most remarkable achievement lay in forging a robust Lutheran community endowed with a resounding message of salvation Using prints the prevailing medium of mass communication and multiple versions of paintings he developed an intricate symbolism that resonated with the populace in early modern Germany Jennifer Nelson also explores his extensive repertoire of female nudes and shows how these seductive artworks not only tantalized his patrons but constructed for them a deep history of Germany's notional connections with ancient Greece and Rome The Body of the Artisan Pamela H. Smith, 2024-05-31 Since the time of Aristotle the making of knowledge and the making of objects have generally been considered separate enterprises Yet during

the late sixteenth and early seventeenth centuries the two became linked through a new philosophy known as science In The Body of the Artisan Pamela H Smith demonstrates how much early modern science owed to an unlikely source artists and artisans From goldsmiths to locksmiths and from carpenters to painters artists and artisans were much sought after by the new scientists for their intimate hands on knowledge of natural materials and the ability to manipulate them Drawing on a fascinating array of new evidence from northern Europe including artisans objects and their writings Smith shows how artisans saw all knowledge as rooted in matter and nature With nearly two hundred images The Body of the Artisan provides astonishingly vivid examples of this Renaissance synergy among art craft and science and recovers a forgotten episode of the Scientific Revolution an episode that forever altered the way we see the natural world The Renaissance Print, 1470-1550 David Landau, Peter W. Parshall, 1994-01-01 Through an examination of material and institutional circumstances through the study of work shop practices and of technical and aesthetic experimentation this book seeks to give an account of the ways in The Cumulative Book Index which Renaissance prints were realized distributed acquired and handled by their public ,1995 A world list of books in the English language The Art of Visual Exegesis Vernon K.
