**Children Learn - Book 4** Shirley Allen, Peter Gordon, 2017-02-21 The comprehensive guide to the most influential theorists and their ideas on how children with special educational needs learn and develop **Beneath the Mask** Robert N. Sollod, Christopher F. Monte, 2008-01-22 *Beneath the Mask* presents classic theories of human nature much as each theorist might if the theorist were to teach his or her ideas to people encountering them for the first time Through a theorist by theorist approach this Eighth Edition continues to explore the ideas of personality theorists developmentally incorporating the personal origins of ideas to illuminate links between the psychology of each theorist and that theorist's own psychology of persons *Beneath the Mask* presents the sequence of thinking for more than 20 theorists and demonstrates how the thinking

that led to major theories is nested in the life experience of the theorists within the context of the surrounding culture. The authors emphasize each theorist's life history as the basis for the ideas that constitute his or her theories, making them easier to understand as pictures of human nature. John P. Wilson has revised the text in a manner that preserves and improves upon the best features of the late Robert N. Sollod and Christopher Monte's work.

**Behavior Analysis and Learning** W. David Pierce, Carl D. Cheney, 2013-04-15. Behavior Analysis and Learning, Fourth Edition, is an essential textbook covering the basic principles in the field of behavior analysis and learned behaviors as pioneered by B. F. Skinner. The textbook provides an advanced introduction to operant conditioning from a very consistent Skinnerian perspective. It covers a range of principles from basic respondent conditioning through applied behavior analysis into cultural design. Elaborating on Darwinian components and biological connections with behavior, the book treats the topic from a consistent worldview of selectionism. The functional relations between the organism and the environment are described, and their application in accounting for old behavior and generating new behavior is illustrated. Expanding on concepts of past editions, the fourth edition provides updated coverage of recent literature and the latest findings. There is increased inclusion of biological and neuroscience material as well as more data correlating behavior with neurological and genetic factors. The material presented in this book provides the reader with the best available foundation in behavior science and is a valuable resource for advanced undergraduate and graduate students in psychology or other behavior-based disciplines. In addition, a website of supplemental resources for instructors and students makes this new edition even more accessible and student friendly.

Problem Solving in Mathematics Instruction and Teacher Professional Development Patricio Felmer, Peter Liljedahl, Boris Koichu, 2019-11-22. Recent research in problem solving has shifted its focus to actual classroom implementation, and what is really going on during problem solving when it is used regularly in classroom. This book seeks to stay on top of that trend by approaching diverse aspects of current problem solving research, covering three broad themes. Firstly, it explores the role of teachers in problem solving classrooms and their professional development, moving onto secondly, the role of students when solving problems, with particular consideration of factors like group work, discussion, role of students in discussions, and the effect of students' engagement on their self-perception and their view of mathematics. Finally, the book considers the question of problem solving in mathematics instruction as it overlaps with problem design, problem solving situations, and actual classroom implementation. The volume brings together diverse contributors from a variety of countries and with wide and varied experiences, combining the voices of leading and developing researchers. The book will be of interest to any reader keeping on the frontiers of research in problem solving, more specifically researchers and graduate students in mathematics.
