The Secret Miracle Daniel Alarcón, 2010-04-13 The world's best contemporary writers from Michael Chabon and Claire Messud to Jonathan Lethem and Amy Tan engage in a wide ranging insightful and oft surprising roundtable discussion on the art of writing fiction Drawing back the curtain on the mysterious process of writing novels *The Secret Miracle* brings together the foremost practitioners of the craft to discuss how they write Paul Auster Roddy Doyle Allegra Goodman Aleksandar Hemon Mario Vargas Llosa Susan Minot Rick Moody Haruki Murakami George Pelecanos Gary Shteyngart Daniel Alarcón and others take us step by step through the alchemy of writing fiction answering everything from nuts and bolts queries Do you outline to perennial questions posed by writers and readers alike What makes a character compelling From Stephen King's deadpan distinction between novels and short stories Novels are longer and have more s t in them to Colm Toibin's anti romanticized take on his characters They are just words to Jos Manuel Prieto's mature perspective on the anxieties of influence Influences are felt or weigh you down more when young every page contains insights found nowhere else With honesty humor and elegance *The Secret Miracle* gives both aspiring writers and lovers of literature a master class in the art of writing

Climate Fiction and Cultural Analysis Gregers Andersen, 2019-09-25 *Climate Fiction and Cultural Analysis* argues that the popularity of the term climate fiction has paradoxically exhausted the term's descriptive power and that it has developed into a black box containing all kinds of fictions which depict climatic events and has consequently lost its true significance Aware of the prospect of ecological collapse as well as our apparent inability to avert it

we face geophysical changes of drastic proportions that severely challenge our ability to imagine the consequences This book argues that this crisis of imagination can be partly relieved by climate fiction which may help us comprehend the potential impact of the crisis we are facing Strictly assigning climate fiction to fictions that incorporate the climatological paradigm of anthropogenic global warming into their plots this book sets out to salvage the term's speculative quality It argues that climate fiction should be regarded as no less than a vital supplement to climate science because climate fiction makes visible and conceivable future modes of existence within worlds not only deemed likely by science but which are scientifically anticipated Focusing primarily on English and German language fictions *Climate Fiction and Cultural Analysis* shows how Western climate fiction sketches various affective and cognitive relations to the world in its utilization of a small number of recurring imaginaries or imagination forms This book will be of great interest to students and scholars of ecocriticism the environmental humanities and literary and culture studies more generally
