Combinatorial Optimization and Applications Teodor Gabriel Crainic, Michel Gendreau, Antonio Frangioni, 2024-06-27
Combinatorial Optimization represents a major component of Operations Research Mathematical Programming and in a broader sense the development of digital intelligence and society It covers in particular such important areas as network design location routing and scheduling with major applications in transportation logistics health systems production communications and energy Starting from the exceptional contribution Professor Bernard Gendron made to combinatorial optimization and its applications in multiple areas the book presents a state of the art view on the field through a combination of surveys expository articles and focused methodological and applied research The authors hail from various Operations Research areas and institutions around the world Having collaborated closely with Professor Gendron they drew on his foundational work to showcase a variety of models and algorithms that draw a living picture of the multifaceted world of applied combinatorial optimization

Biostimulants: Exploring Sources and Applications Naleeni Ramawat, Vijay Bhardwaj, 2022-05-24 This edited book is a comprehensive compilation highlighting sources of biostimulants their production influence on plant growth and development and regulatory status of plant biostimulants for better understanding and opening new vistas for future research Biostimulants the biological formulations are known to meliorate the plants growth and vigour improve nutritional efficiency along with maintaining their well being mainly via providing protection against a wide range of infections Both horticultural as well as agricultural crops involve the utilization of the biostimulants Fulvic and humic acids nitrogen containing compounds protein hydrolysates favourable bacteria and fungi and extracts of seaweed are the chief active components of these The major driving force for these materials is the organic farming industry and demand for sustainable crop production This book will be of great interest to researchers teachers climate change scientists capacity builders and policy makers Moreover this book does the work of a supplementary reading for students in various fields such as agriculture soil science ecology environmental science and forestry at undergraduate as well as graduate level This will be a gainful read for national and international agricultural scientists and the policy makers Elaborates on biostimulants induced influence of plant growth and development Covers all aspects of biostimulants sources and its role in plant life in detail Discusses evidence based approach in biostimulants sources and its useful applications in plants

Thin-Films for Machining Difficult-to-Cut Materials Ch Sateesh Kumar, Filipe Daniel Fernandes, 2023-05-11 This book presents a balanced blend of fundamental research such as principles and characteristics of machining of difficult to cut materials and coating techniques and in depth practical information on coatings techniques and classifications the effect of coating parameters on machining responses and finite element analysis of the machining performance of coated tools In addition to the benefits of the thin film deposition on the cutting tools the limitations of the coating deposition techniques and the coating properties are also discussed Features Associates the application of coating technology for improving machining characteristics of

difficult to cut materials Elaborates effect of coating architecture on the output machining parameters Explores the performance of coated cutting tools Discusses advanced coating systems and their application Includes industrial case studies and practical implementations where coatings were applied for the machining of difficult to cut materials This book is aimed at researchers and graduate students in thin films coatings machining materials engineering and manufacturing

Healthcare Administration: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources, 2014-08-31 As information systems become ever more pervasive in an increasing number of fields and professions workers in healthcare and medicine must take into consideration new advances in technologies and infrastructure that will better enable them to treat their patients and serve their communities Healthcare Administration Concepts Methodologies Tools and Applications brings together recent research and case studies in the medical field to explore topics such as hospital management delivery of patient care and telemedicine among others With a focus on some of the most groundbreaking new developments as well as future trends and critical concerns this three volume reference source will be a significant tool for medical practitioners hospital managers IT administrators and others actively engaged in the healthcare field [Nursing Interventions & Clinical Skills E-Book](#) Anne G. Perry, Patricia A. Potter, Wendy R.

Ostendorf, 2019-01-08 Master nursing skills with this guide from the respected Perry Potter Ostendorf author team The concise coverage in Nursing Interventions Clinical Skills 7th Edition makes it easy to learn the skills most commonly used in everyday nursing practice Clear step by step instructions cover more than 160 basic intermediate and advanced skills from measuring body temperature to insertion of a peripheral intravenous device using evidence based concepts to improve patient safety and outcomes A streamlined visual approach makes the book easy to read and an Evolve companion website enhances learning with review questions and handy checklists for each clinical skill Coverage of more than 160 skills and interventions addresses the basic intermediate and advanced skills you ll use every day in practice Safe Patient Care Alerts highlight risks or other key information to know in performing skills so you can plan ahead at each step of nursing care Unique Using Evidence in Nursing Practice chapter provides the information needed to use evidence based care to solve clinical problems Coverage of evidence based nursing techniques includes the concept of care bundles structured practices that improve patient safety and outcomes in addition to the coverage of teach back Delegation Collaboration guidelines help you make decisions in whether to delegate a skill to unlicensed assistive personnel and indicates what key information must be shared Teach Back step shows how to evaluate the success of patient teaching so you can see whether the patient understands a task or topic or if additional teaching may be needed Recording guidelines describe what should be reported and documented after performing skills with Hand off Reporting sections listing important patient care information to include in the handoff Special Considerations indicate the additional risks or accommodations you may face when caring for pediatric or geriatric patients as well as patients in home care settings A consistent format for nursing skills makes it easier

to perform skills organized by Assessment Planning Implementation and Evaluation Media resources include skills performance checklists on the Evolve companion website and related lessons videos and interactive exercises on Nursing Skills Online NEW 2017 Infusion Nurses Society standards are included on administering IVs and on other changes in evidence based practice NEW Disaster Preparedness chapter focuses on caring for patients after biological chemical or radiation exposure NEW SBAR samples show how to quickly and effectively communicate a patient's condition in terms of Situation Background Assessment and Recommendation NEW Practice Reflections sections include a clinical scenario and questions helping you reflect on clinical and simulation experiences NEW Three Master Debriefs help you develop a better understanding of the big picture by synthesizing skill performance with overall patient care **Optimization Methods in**

Mathematical Modeling of Technological Processes Alena Vagaská, Miroslav Gombár, Anton Panda, 2023-07-20 This book focuses on selected methods of applied mathematics that are aimed at mathematical optimization with an emphasis on their application in engineering practice It delves into the current mathematical modeling of processes and systems with a specific focus on the optimization modeling of technological processes The authors discuss suitable linear convex and nonlinear optimization methods for solving problems in engineering practice Real world examples and data are used to numerically illustrate the implementation of these methods utilizing the popular MATLAB software system and its extension to convex optimization The book covers a wide range of topics including mathematical modeling linear programming convex programming and nonlinear programming all with an engineering optimization perspective It serves as a comprehensive guide for engineers researchers and students interested in the practical application of optimization methods in engineering

Advanced Materials in Engineering Applications NVR Naidu,G M Madhu,Nagaraju Kottam,G N Anil Kumar,2024-11-18 The formability features of sheets made of the alloy Al 8011 are examined experimentally and the results are compared with the numerical ones in this research Through an axisymmetric finite element simulation of the Erichsen cupping test formability characteristics were evaluated The Erichsen cupping test was used to examine the effects of several factors including friction at the punch sheet contact and sheet thickness The nonlinear finite element method is used to calculate the dome height stress and strain values for the aluminum sheet and the results are then compared to the numerical ones The findings demonstrated that the Al 8011 alloy's form ability greatly rises with increasing sheet thickness The formability is significantly impacted by the lubricant The application of the finite element technique to forecast the formability of Al 8011 alloy

Polymers for Agri-Food Applications Tomy J. Gutiérrez,2019-08-02 This book presents an exhaustive analysis of the trends in the development and use of natural and synthetic polymer systems aimed at sustainable agricultural production The polymers have allowed the development of controlled and released systems of agrochemicals such as pesticides fertilizers and phytohormones through micro and nanoencapsulated systems which protect and stimulate the growth of crops at low costs and without damage to the environment Hydrogel systems from natural and synthetic polymers have also had their place in the agricultural industry

since they allow to maintain the humidity conditions of the crops for their correct development in drought times Mulch films made of polymers have also become important in the control of weeds and pests in crops as well as the use of edible coatings applied to fruits and vegetables during post harvest which reduce the losses of these perishable foods Currently the systems indicated as well as others are already used on a large scale However research studies in this area have been limited compared to other polymer applications This book collects useful information for researchers students and technologies related to the polymer technology and agri food production In this book world renowned researchers have participated including associate editors of important journals as well as researchers working in the area of research and development R D of leading agri food industries in the manufacture of agricultural inputs

Higher Education, Meritocracy and Inequality in China Ye Liu, 2016-10-08 This book investigates the changing opportunities in higher education for different social groups during China's transition from the socialist regime to a market economy The first part of the book provides a historical and comparative analysis of the development of the idea of meritocracy since its early origins in China and in more recent western thought The second part then explores higher education reforms in China the part played by supposedly meritocratic forms of selection and the implications of these for social mobility Based on original empirical data Ye Liu sheds light on the socio economic gender and geographical inequalities behind the meritocratic facade of the Gaokao Liu argues that the Chinese philosophical belief in education based meritocracy had a modern makeover in the Gaokao and that this ideology induces working class and rural students to believe in upward social mobility through higher education When the Gaokao broke the promise of status improvement for rural students they turned to the Chinese Communist Party and sought political connections by actively applying for its membership This book reveals a bleak picture of visible and invisible inequality in terms of access to and participation in higher education in contemporary China Written in an accessible style it offers a valuable resource for researchers and non specialist readers alike

Forty Years in the South Seas Anne Ford, Ben Shaw, Dylan Gaffney, 2024-05-09 This edited volume of invited chapters honours the four decades of fundamental research by archaeologist Glenn Summerhayes into the human prehistory of the islands of the western Pacific especially New Guinea and its offshore islands This area helped to shape and direct many ancient dispersal events associated with Homo sapiens initially from Africa more than 50 000 years ago through the lower latitudes of Asia into Australia New Guinea the Bismarck Archipelago and possibly the Solomon Islands Around 3000 years ago coastal regions of northern and eastern New Guinea and the islands of Melanesia beyond played a major role in the Oceanic migrations of Austronesian speaking peoples from southern China and Southeast Asia migrations that have recently attained new levels of genetic complexity through the analysis of ancient DNA from human remains For the first time humans of both Southeast Asian and New Guinea Bismarck genetic origin reached the islands of Remote Oceania beyond the Solomons Many of the chapters in this book deal with archaeological aspects of this Austronesian maritime expansion which never seriously impacted the populations of the New

Guinea Highlands especially as revealed through the analysis of Lapita pottery and associated artefacts Other chapters offer archaeological perspectives on trade and exchange and on related topics that extend into the ethnographic era The research of Glenn Summerhayes stands centrally amongst all these offerings ranging from the discovery of some of the oldest traces of Pleistocene human settlement in Papua New Guinea to documentation of the remarkable phenomenon of Lapita expansion through Melanesia into western Polynesia around 3000 years ago This volume is a fitting celebration of a remarkable career in western Pacific archaeology and population history Emeritus Professor Peter Bellwood The Australian National University
