**Capacity Building for Maritime Security** Christian Bueger, Timothy Edmunds, Robert McCabe, 2020-10-09 This book studies recent attempts to restructure maritime security sectors through capacity building. It innovates both theoretically and empirically. It proposes a new framework for understanding maritime capacity building drawing on work in peacebuilding and security sector reform. The framework is then applied across empirical case studies from the Western Indian Ocean (WIO) region written by scholars from the Global South. The WIO region is a paradigmatic case to study maritime security and capacity building in action. Countries in the region face the full gamut of maritime security challenges while their indigenous capacities to deal with these are often weak. In consequence, the region functions as an engine of innovation for maritime capacity building more widely. The lessons and best practices from the region have importance consequences for addressing maritime security across the globe. Oceanic Strategy Vidhan Pathak, Raghvendra Kumar, 2024-12-03 This book introduces the concept of oceanic strategy expanding beyond traditional maritime and naval perspectives to include political, economic, socio-cultural, and ecological dimensions. It highlights the Indian Ocean Region as a critical arena for global power competition where the abundance of resources, strategic significance, and emerging interests have made it a new frontier for opportunity, growth, and conflict. By incorporating aspects like oceanic security, resource exploration, the blue economy, and hydrography, the book presents a broader view of strategic thought and the role of oceanic spaces in national and global geopolitics. Focusing on key players such as India, China, the US, and other traditional and emerging powers, the book analyses the reorientation of national interests and the intensifying struggle for dominance in the Indian Ocean. It argues that control over this region is crucial for attaining influence in 21st-century geopolitics. The work also addresses non-traditional security threats like piracy and transnational crime, situating the Indian Ocean at the heart of modern geopolitical discourse. This book is an essential resource for students and scholars of international relations, strategic studies, and political science, offering critical insights into the evolving power dynamics shaping the future of the Indian Ocean Region. **Military Construction, Veterans Affairs, and Related Agencies**

SPARKS,2021-06-16 The blue economy comprising coastal and marine resources offers vast benefits for sub Saharan Africa of the 53 countries and territories in the region 32 are coastal states there are 13 million sq km of maritime zones more than 90% of the region s exports and imports come by sea and the African Union hails the blue economy as the new frontier of African renaissance Despite their importance the region s coastal and marine resources have been neither fully appreciated nor fully utilized They are only now being recognized as being key to Africa s potential prosperity As the region grows it has in general not taken adequate safeguards to protect these valuable resources That is partly because some of the problems pollution for example are regional and know no borders All too often short term gains are made at the expense of the long term overfishing for example This book provides for the first time a study of the constraints and opportunities the blue economy offers for sub Saharan Africa It includes an introduction and overview sectoral analyses including tourism fisheries mineral resources culture shipping and maritime safety country case studies and analyses of regional and international efforts towards better coastal zone and marine management      The Economics of Defense Industry Thomas-Durell Young,2023-10-17 This book on the economics of defence industry assesses a series of historical and contemporary case studies that consistently demonstrate the need for governments to recognise and thereafter factor the financial needs of a

narrow industrial sector that is capital intensive technologically advanced and that requires a highly skilled labour force Since the end of the cold war Western governments have systematically reduced financial support to their domestic defence industry and have seemingly ignored planning and funding industrial mobilisation In all cases government policy has been to encourage industries to consolidate capacity to become financially viable in a sector that has seen diminished demand The 2022 Russian invasion of Ukraine has caused Western governments to reassess their previous assumptions Efforts to increase industrial capacity have been met with the iron laws of economics whereby businesses need to show return on investments The chapters in this volume posit that efforts to rationalise industrial capacity and innovation to meet short term financial efficiencies inevitably results in limited expensive and long delays in increased production in times of international crisis This book serves as an essential guide for academics researchers and students interested in defence economics industrial economics international relations and industrial policy The chapters in this book were originally published in various issues of Defense Security Analysis
