Analysis: These boys were influenced by American pop culture and peer pressure that was prominent in their circle of professor children.

2.Quote: "and now eighteen-year-olds who had mastered the swagger of American rap videos were undergoing secret initiations that sometimes left one or two of them Dead"

"A boy would leer at a girl who turned out to be the girlfriend of the Capone of the Black Axe, and that boy, as he walked to a kiosk later to buy a cigarette, would be stabbed in the thigh. He would turn out to be a Buccaneer, and so one of his fellow-Buccaneers would go to a beer parlor and shoot the nearest Black Axe in the leg, and then the next day another Buccaneer would be shot dead in the refectory"

Analysis: American rap is known for inducing violence against oppositions as a way of establishing dominance. The need to be cool seemed to be the main motivation behind the young boys joining cults which often led to their death.

Transparency in Assessment - Exploring the Influence of Explicit Assessment Criteria Anders Jönsson, Frans Prins, 2019-04-03 In many schools and higher education institutions it has become common practice to share assessment criteria with students Sometimes it is required for accountability purposes at other times criteria are used as a means to communicate expectations to students However the idea that explicit assessment criteria should be shared with students has been contested On the one hand research has shown that explicit criteria may positively affect student performance reduce their anxiety as well as support students use of self regulated learning strategies On the other hand there are fears that explicit criteria may have a restraining influence on students learning as well as limiting their autonomy and creativity There are also indications of students becoming more performance oriented as opposed to learning oriented when being provided with explicit assessment criteria Taken together it is not fully understood under which circumstances it is productive for student learning to share explicit assessment criteria and under which circumstances it is not In particular empirical research on the proposed negative effects of sharing criteria with learners is limited and most fears voiced in the literature are based on individual experiences and anecdotal evidence In this book we therefore bring different perspectives on transparency in assessment together in order to further our understanding of how students are influenced by the use of explicit assessment criteria A deeper understanding of the influence of explicit assessment criteria on students understanding of criteria motivation and learning is equally imperative for future research and educational practice both of which need to go beyond individual opinions and convictions
