**HC 401 - The Role of Regional Schools Commissioners** Great Britain. Parliament. House of Commons. Education Committee, 2016 Regional Schools Commissioners RSCs were introduced as a pragmatic response to the need to ensure appropriate oversight of a growing number of academies There is a clear need for an intermediate structure between Whitehall and individual schools and RSCs are beginning to provide this However the schools landscape and the role of the RSCs is continuing to evolve and the RSCs now form part of an increasingly complicated system of oversight accountability and inspection A more fundamental reassessment of accountability and oversight for all schools will be required in the future to provide coherence In the meantime the relationships that RSCs build with other components of this system including local authorities Ofsted teaching schools and parents and local communities are crucial to securing impact on school improvement An emphasis on working with and through these key partners will help ensure that RSCs have the capacity to cope with planned expansion of their role However the role of RSCs remains unclear to many and this must be addressed for effective relationships to be formed The Palgrave Handbook of Language and Crisis Communication in Sub-Saharan Africa Ernest Jakaza, Hugh Mangeya, Isaac Mhute, 2024-06-17 This handbook provides a detailed and sustained examination of the scope purpose and practical application of crisis and disaster management communication in this critical region of the African continent sub Saharan Africa SSA The volume lays the foundation that enables a nuanced appreciation of two significant issues The first pertains to SSA's vulnerability to both natural and man made phenomena Secondly it argues that communication plays a critical role in so far as the identification social construction raising awareness preparation mitigation and eradication of crises and disasters in the region Communication plays a critical role in potentially reducing the impacts of crises and disasters before their occurrence This handbook is a key resource for academics students and practitioners in areas such as political communication media communication language and communication brand communication social digital media communication and crisis communication among others *Chemical Engineering Progress* ,1991 *Municipal Journal, Public Works Engineer Contractor's Guide* ,1970-05 *Contract Journal* ,1961 **Chemistry and Industry Review** ,1945 **The Surveyor & Municipal & County Engineer** ,1954 **Air Transport - A Tourism Perspective** Anne Graham, Frederic Dobruszkes, 2019-02-18 Air Transport A Tourism Perspective provides rigorous insights into the current complexities synergies and conflicts within air transportation and tourism presenting a balanced comprehensive contemporary and global analysis that thoroughly examines the links between theory and practice The book offers readers a multi sector global perspective on the practical implications of the link between air transport and tourism By using a novel approach it systematically explores the successive stages of a tourist's trip investigating reasons for flying the airport experience airline industry structures competition and regulation and air transportation and destination interrelationships In addition the book explores current and salient debates on such issues as the influence of traveling to

**Digital Activism in Zimbabwe** Tenford Chitanana, 2024-10-21 This book investigates the role of the internet and social media in political processes in non western and non democratic contexts Using Zimbabwe as a case study the book demonstrates how activists and ordinary people deploy social media particularly Facebook to subvert an enduring hegemonic state However the book also highlights how authoritarian regimes are in turn learning and adapting to the information age challenging the impact of digital activism Studies of digital activism in the Global South are often centred around democracy but this book paints a more complex picture examining the role and effect of digital activism in challenging state hegemony in authoritarian contexts The book notes that while communication technologies help mediate activism they are also simultaneously constrained by pre existing and emergent challenges tied to the social and political context and the inherent limitations of those technologies The book investigates the tactics used by digital activists the contextual factors and restrictive political environment they operate in including the role of pro government activists and ultimately the impact of digital activism given these constraints From the case of Zimbabwe the book builds out a broader theoretical analysis of the evolution of third world protest in the digital age examining the limitations of activists actions and the ideological deficit in online activism to ferment a virulent counter hegemony
