

## Level B1 – Threshold: Speaking Mark Scheme – Assessor's copy

	<b>RANGE &amp; ACCURACY</b>	<b>FLUENCY &amp; COHERENCE</b>	<b>PRONUNCIATION</b>	<b>COMMUNICATION STRATEGIES</b>
<b>BAND 5 (13 – 15)</b>	A wide range of grammar, lexis and cohesive devices attempted to in completing the tasks although circumlocution may be necessary. Few errors in simple sentences. Errors when attempting more complex structures and lexis do not generally hinder communication.	Some hesitation while formulating language, but can effectively maintain flow of speech. Can link ideas into clear, coherent discourse although with noticeable jumpiness in especially in extended contributions.	Pronunciation is clearly intelligible in spite of evident foreign accent. Occasional mispronunciations put some strain on the listener but rarely impede communication	Initiates maintains and ends turns satisfactorily although not always smoothly. Uses basic repair strategies (clarification, circumlocution) where necessary. Uses appropriate register.
<b>BAND 4 (10 – 12)</b>	<i>Performance shares features of Bands 3 &amp; 5</i>			
<b>BAND 3 (7 – 9)</b>	Sufficient range of grammar, lexis and cohesive devices to adequately complete the tasks although circumlocution is common and avoidance strategies may be necessary. Errors, although they may be frequent even when using simple language, do not significantly hinder communication.	Keeps going comprehensibly in spite of frequent hesitation when formulating language and considerable jumpiness and reformulation during longer turns. Requires a patient listener.	Pronunciation is clearly intelligible, although mispronunciations and inability to produce certain sounds may sometimes impede communication of the message.	Attempts made to initiate maintain and end turns using basic language. Evidence of ability to use repair strategies (clarification, circumlocution) although not always applied.
<b>BAND 2 (4 – 6)</b>	<i>Performance shares features of Bands 1 &amp; 3</i>			
<b>BAND 1 (1 – 3)</b>	Range of grammar, lexis and cohesive devices insufficient to adequately complete the tasks. Repeated errors even in simple sentences significantly hinder communication.	Frequent hesitation and inability to link ideas coherently causes great strain on the listener.	Mispronunciations and inability to produce certain sounds significantly impedes communication of the message.	Generally, fails to initiate maintain and end turns satisfactorily. Does not use repair strategies (clarification, circumlocution).
<b>0</b>	Insufficient language for assessment

**Recent Progresses in Amebiasis** Anjan Debnath, Mario Alberto Rodriguez, Serge Ankri, 2019-10-14 Amebiasis a parasitic disease transmitted by the unicellular protozoan parasite *Entamoeba histolytica* is the cause of at least 100 000 deaths each year The disease is mostly prevalent in developing countries and is one of the three common causes of death from parasitic diseases The parasite has two stages in its life cycle in the host the infective cyst and the invasive trophozoite In the large intestine the parasite feeds on bacteria and on cellular debris No vaccine against amebiasis currently exists Although metronidazole is the drug of choice for treating amebiasis adverse effects in patients and potential resistance to metronidazole in other protozoa exist About nine out of 10 people who are infected with *E. histolytica* are asymptomatic and in those individuals who develop symptoms bloody diarrhea amebic colitis and liver abscess are the most common symptoms One possible explanation for this observation is the difference in the gut microbiota between individuals that may significantly influence the host's immune response in amebiasis and *E. histolytica*'s virulence Amebiasis is characterized by acute inflammation of the intestine with release of pro inflammatory cytokines reactive oxygen species and reactive nitrogen species from activated cells of the host's immune system In recent years significant advances on the cell biology of *Entamoeba* infection have been achieved through the development of new genetic tools to manipulate gene expression in the parasite and through the application of Omics tools In this Research Topic we welcome high quality original research articles as well as review opinion or method articles on amebiasis including but not limited to the regulation of gene expression cell biology and signaling adaptation and resistance to environmental stresses metabolism pathogenesis and immunity pathogenesis and microbiome drug discovery and drug resistance Loring and Rounds: A Trustee's Handbook, 2024 Edition Rounds, **Computer, Intelligent Computing and Education Technology** Hsiang-Chuan Liu, Wen-Pei Sung, Wenli Yao, 2014-03-26 This proceedings set contains selected Computer Information and Education Technology related

papers from the 2014 International Conference on Computer Intelligent Computing and Education Technology CICET 2014 held March 27 28 2014 in Hong Kong The proceedings aims to provide a platform for researchers engineers and academics as well as industry professionals from all over the world to present their research results and development activities in Computer Science Information Technology and Education Technology

**Neuronal Stochastic Variability: Influences on Spiking Dynamics and Network Activity** Mark D. McDonnell, Joshua H. Goldwyn, Benjamin Lindner, 2016-07-18 Stochastic fluctuations are intrinsic to and unavoidable at every stage of neural dynamics For example ion channels undergo random conformational changes neurotransmitter release at synapses is discrete and probabilistic and neural networks are embedded in spontaneous background activity The mathematical and computational tool sets contributing to our understanding of stochastic neural dynamics have expanded rapidly in recent years New theories have emerged detailing the dynamics and computational power of the balanced state in recurrent networks At the cellular level novel stochastic extensions to the classical Hodgkin Huxley model have enlarged our understanding of neuronal dynamics and action potential initiation Analytical methods have been developed that allow for the calculation of the firing statistics of simplified phenomenological integrate and fire models taking into account adaptation currents or temporal correlations of the noise This Research Topic is focused on identified physiological internal noise sources and mechanisms By internal we mean variability that is generated by intrinsic biophysical processes This includes noise at a range of scales from ion channels to synapses to neurons to networks The contributions in this Research Topic introduce innovative mathematical analysis and or computational methods that relate to empirical measures of neural activity and illuminate the functional role of intrinsic noise in the brain

**Fighting the Great War at Sea** Norman Friedman, 2014-10-22 The overriding image of the First World War is the bloody stalemate of the Western Front but although much of the action did occur on land the overall shape of the war \_ even the inevitability of British participation \_ arose out of its maritime character It was essentially a struggle about access to worldwide resources most clearly seen in the desperate German attempts to deal with the American industrial threat which ultimately levered the United States into the war and thus a consequence of British sea control

This radical new book concentrates on the way in which each side tried to use or deny the sea to the other and in so doing it describes rapid wartime changes not only in ship and weapon technology but also in the way naval warfare was envisaged and fought Combat produced many surprises some like the impact of the mine and torpedo are familiar but this book also brings to light many previously unexplored subjects like creative new tactical practices and improved command and control

The contrast between expectation and reality had enormous consequences not only for the course of the war but also for the way navies developed afterwards This book melds strategic technical and tactical aspects to reveal the First World War from a fresh perspective but also demonstrates how its perceived lessons dominated the way navies prepared for the Second

**Attorneys in the Baseball Hall of Fame** Louis H. Schiff, Robert M. Jarvis, 2025-07-25 There is no greater honor for

anyone in baseball than being elected to the Baseball Hall of Fame in Cooperstown New York Since its creation in 1936 the Hall has inducted 346 individuals Of this number only 11 have been lawyers This book celebrates this unique group which consists of three players Hughie Jennings Jim O Rourke and Monte Ward two managers Miller Huggins and Tony La Russa three executives Larry MacPhail Walter O Malley and Branch Rickey and three commissioners Happy Chandler Bowie Kuhn and Kenesaw Mountain Landis Each inductee is the subject of a detailed essay that recounts their legal education admission to the bar and legal career Written by either a law professor or a law librarian the essays are the product of extensive research and are supplemented by an exhaustive set of notes

*Why Good People Do Bad Environmental Things* Elizabeth R. DeSombre, 2018-03-02 No one sets out to intentionally cause environmental problems All things being equal we are happy to protect environmental resources in fact we tend to prefer our air cleaner and our species protected But despite not wanting to create environmental problems we all do so regularly in the course of living our everyday lives Why do we behave in ways that cause environmental harm It is often easy and inexpensive to behave in ways with bad environmental consequences but more difficult and costly to take environmentally friendly actions The incentives we face some created by the nature of environmental resources some by social and political structures often do not make environmentally beneficial behavior the most likely choice Furthermore our behavior is conditioned by habits and social norms that fail to take environmental protection into consideration In this book Elizabeth R DeSombre integrates research from political science sociology psychology and economics to understand why bad environmental behavior makes perfect sense As she notes there is little evidence that having more information about environmental problems or the way an individual s actions contribute to them changes behavior in meaningful ways and lack of information is rarely the underlying cause that connects behavior to harm In some cases such knowledge may even backfire as people come to see themselves as powerless to address huge global problems and respond by pushing these issues out of their minds The fact that causing environmental problems is never anyone s primary goal means that people are happy to stop causing them if the alternative behavior still accomplishes their underlying goals If we can figure out why those problems are caused when no one intends to cause them we can develop strategies that work to shift behavior in a positive direction Over the course of this book DeSombre considers the role of structure incentives information habit and norms on behavior in order to formulate lessons about how these factors lead to environmentally problematic behavior and what understanding their effects can tell us about ways to change behavior To prevent or address environmental problems we have to understand why even good people do bad environmental things
