Biomaterials for Biomedical Applications Anuj Tripathi, Jose Savio Melo, 2017-01-24 This book highlights recent advances in the field of biomaterials design and the state of the art in biomaterials applications for biomedicine Addressing key aspects of biomaterials the book explores technological advances at multi scale levels macro micro and nano which are used in applications related to cell and tissue regeneration The book also discusses the future scope of bio integrated systems The contents are supplemented by illustrated examples and schematics of molecular and cellular interactions with biomaterials scaffolds are included to promote a better understanding of the complex biological mechanisms involved in material to biomolecule interactions The book also covers factors that govern cell growth differentiation and regeneration in connection with the treatment and recovery of native biological systems Tissue engineering drug screening and delivery and electrolyte complexes for biomedical applications are also covered in detail This book offers a comprehensive reference guide for multi disciplinary communities working in the area of biomaterials and will benefit researchers and graduate students alike

Compendium of Phytopathogenic Microbes in Agro-Ecology Natarajan Amaresan, Krishna Kumar, 2025-04-22 This book offers an in depth exploration of phytopathogenic fungi within the context of agroecology providing essential insights for understanding and managing these critical organisms Each chapter begins with a comprehensive information panel that introduces the pathogen detailing its taxonomy the diseases it causes its pathogenic mechanisms economic significance and strategies for identification and control By equipping researchers with this knowledge the book empowers them to manipulate these fungi to meet their specific needs Key concepts covered include the taxonomy and life cycles of various fungi the economic impact of fungal diseases on crop yield and innovative control measures The book s expert contributors provide a thorough analysis of each pathogen making it an indispensable resource for anyone involved in plant health and disease management This volume is the first in a three part series that will cover a total of 104 plant pathogens including bacteria viruses viroids and nematodes highlighting their economic importance in agriculture This book is an invaluable resource for postgraduate students research scholars post doctoral fellows and educators in fields such as Plant Microbiology Plant Pathology Entomology Virology and Nematology It is a must read for those seeking to deepen their understanding of plant pathogens and their impact on agriculture

Welfare, Deservingness and the Logic of Poverty Joe

Whelan, 2021-03-17 Who deserves to get what and what should they have to do in order to get it These are questions that societies have grappled with since antiquity and they continue to echo today This book explores questions of social deservingness by tracking how it has been treated across the centuries from ancient Greece to the present day taking in many notable thinkers along the way In doing so it focuses in particular on what different thinkers have had to say on and about poor relief and social welfare Modern welfare systems are also examined to show how particular logics of poverty while they may be ancient in origin continue to inform our notions of who deserves to get what today This book will be of interest to those studying or working in the areas of social welfare social policy and sociology

New Forms of Carbon Aneeya Kumar Samantara, Satyajit Ratha, 2024-07-19 This new book provides a detailed overview of some of the fundamental aspects of nanocarbons and their allotropic forms their preparation techniques and their applications in several fields of interest New forms of carbon have the potential to revolutionize many aspects of research including drug delivery catalysis energy conversion and storage high strength physics structural engineering and more This volume covers the recent literature on carbon with emphasis on the emerging carbon based materials developed to date studies of their properties and possible prototypes fabricated for practical applications It covers myriad carbon based nanomaterials of distinctive features and their application in various fields

Treatment Decision after Anterior Cruciate Ligament Injury, and Evaluation of Measurement Properties of a Patient Reported Outcome Measure Hanna Tigerstrand Grevnerts, 2019-11-04 Background After an ACL injury treatment aims to restore knee function Evaluation of treatment progress is important and adequate measurement methods are necessary The International Knee Documentation Committee Subjective Knee Form IKDC SKF is a common patient reported outcome measure PROM used after ACL injury It evaluates symptoms function and physical activity The IKDC SKF had not been translated to Swedish language for use in Swedish clinical and research settings The measurement properties of the IKDC SKF had been tested but no assessment of methodological quality of the studies investigating it nor compiling of results was published Sooner or later after an ACL injury a treatment decision must be made Treatment options are either ACL reconstruction ACLR plus rehabilitation or rehabilitation alone There are guidelines stating that a decision for ACLR should be made if the patient has high activity demands and or knee instability It is unclear which factors orthopaedic surgeons and physiotherapists prioritise when recommending ACLR It is also unclear when the decision for treatment is taken on what grounds and how treatment decision correlates to patients reported symptoms and function Aims The overall aim of this thesis was to evaluate the measurement properties of a patient reported measure for evaluation of function after ACL injury and treatment and to overview the treatment decision process after an ACL injury Methods A systematic review was conducted to assess the measurement properties of the IKDC SKF The IKDC SKF was translated from English to Swedish and the Swedish version was tested for reliability validity responsiveness and interpretability A survey study was conducted where 98 orthopaedic surgeons and 391

physiotherapists rated 21 predefined factors based on importance to the decision for ACLR. Orthopaedic surgeons and physiotherapists rated how important they considered their own, their counterparts' and patients' wishes for treatment decision making. In a prospective cohort study, patients with an ACL injury were followed from within 6 weeks up to 12 months after injury. Data regarding treatment chosen, when and why, were described and compared to patient-reported pre-injury activity level, instability and function. Results: The English and Swedish version of the IKDC SF had good measurement properties and interpretability. Swedish orthopaedic surgeons and physiotherapists considered young age, high activity demands, knee-demanding occupation and knee instability despite adequate rehabilitation indications to recommend ACLR. An early decision for ACLR was primarily based on high activity demands. A later decision was mainly due to instability and high activity demands. A decision taken later than five months after injury was based mainly on instability. A decision for non-operative treatment taken and maintained during the first 12 months after injury was mainly due to sufficient function or no instability problems and patients were older than other groups. Conclusions: The patient-reported outcome measurement IKDC SF was suitable for evaluation and assessment in patients with ACL injury. ACLR as treatment after an ACL injury was recommended for young patients and/or those with high activity demands, i.e. knee-demanding occupation and/or instability despite adequate rehabilitation. An early decision for ACLR was more often based on high activity demands, while later decisions were more often based upon perceived instability. Non-operative treatment decisions were often based upon lack of instability problems or sufficient knee function. Self-reported instability and function during the first three months after ACL injury were no different in patients who chose ACLR treatment or who chose non-operative treatment. Bakgrund: Efter en främre korsbandsskada syftar behandlingen att återställa knäns funktion. Utvärdering av framstegen och av vikt och adekvata metoder för detta är nödvändigt. International Knee Documentation Committee Subjective Knee Form (IKDC SF) är ett patientskattningsformulär som används över hela världen vid främre korsbandsskador. Det utvärderar symptom, funktion och fysisk aktivitet. Det har inte funnits tillgängligt på svenska tidigare och det har heller inte funnits någon sammanställning av formulärens egenskaper. Efter en främre korsbandsskada måste för eller senare beslut om behandling fattas om patienten ska genomgå en rekonstruktionsoperation för främre korsbandet med efterföljande rehabilitering eller enbart rehabilitering. Det finns riktlinjer som ger gällande att en korsbandsrekonstruktion kan vara ett adekvat alternativ när patienten har höga aktivitetskrav eller lider av instabilitet i knäleden. Det är dock ej fastställt vilka faktorer ortopedläkare och fysioterapeuter anser viktiga för att rekommendera rekonstruktionsoperation. Det är inte heller klargjort när efter skada och på vilka grunder faktiska behandlingsbeslut fattas och hur orsaken till beslutet hänger samman med patientens självrapporterade symptom och funktion. Syfte: Det övergripande syftet med avhandlingen var att utvärdera egenskaper för ett patientskattningsformulär som utvärderar funktion efter en främre korsbandsskada samt att verblicka beslutsprocessen för behandling efter en främre korsbandsskada. Metod: En systematisk genomgång utfördes av studier som utvärderat egenskaper för IKDC SF. Studierna

FPGA-based Implementation of Signal Processing Systems Roger Woods, John McAllister, Gaye Lightbody, Ying Yi, 2017-05-01 An important working resource for engineers and researchers involved in the design development and implementation of signal processing systems The last decade has seen a rapid expansion of the use of field programmable gate arrays FPGAs for a wide range of applications beyond traditional digital signal processing DSP systems Written by a team of experts working at the leading edge of FPGA research and development this second edition of FPGA based Implementation of Signal Processing Systems has been extensively updated and revised to reflect the latest iterations of FPGA theory applications and technology Written from a system level perspective it features expert discussions of contemporary methods and tools used in the design optimization and implementation of DSP systems using programmable FPGA hardware And it provides a wealth of practical insights along

with illustrative case studies and timely real world examples of critical concern to engineers working in the design and development of DSP systems for radio telecommunications audio visual and security applications as well as bioinformatics Big Data applications and more Inside you will find up to date coverage of FPGA solutions for Big Data Applications especially as they apply to huge data sets The use of ARM processors in FPGAs and the transfer of FPGAs towards heterogeneous computing platforms The evolution of High Level Synthesis tools including new sections on Xilinx s HLS Vivado tool flow and Altera s OpenCL approach Developments in Graphical Processing Units GPUs which are rapidly replacing more traditional DSP systems FPGA based Implementation of Signal Processing Systems 2nd Edition is an indispensable guide for engineers and researchers involved in the design and development of both traditional and cutting edge data and signal processing systems Senior level electrical and computer engineering graduates studying signal processing or digital signal processing also will find this volume of great interest

Data-Driven Systems and Intelligent Applications Mangesh M. Ghonge, N. Krishna Chaitanya, Pradeep N, Harish Garg, Alessandro Bruno, 2024-10-09 This book comprehensively discusses basic data driven intelligent systems the methods for processing the data and cloud computing with artificial intelligence It presents fundamental and advanced techniques used for handling large user data and for the data stored in the cloud It further covers data driven decision making for smart logistics and manufacturing systems network security and privacy issues in cloud computing This book Discusses intelligent systems and cloud computing with the help of artificial intelligence and machine learning Showcases the importance of machine learning and deep learning in data driven and cloud based applications to improve their capabilities and intelligence Presents the latest developments in data driven and cloud applications with respect to their design and architecture Covers artificial intelligence methods along with their experimental result analysis through data processing tools Presents the advent of machine learning deep learning and reinforcement technique for cloud computing to provide cost effective and efficient services The text will be useful for senior undergraduate graduate students and academic researchers in diverse fields including electrical engineering electronics and communications engineering computer engineering manufacturing engineering and production engineering
