Learning Goal(s) Covered	C [OLG1]	P4.1 [OLG5]	P4.2 [OLG5]
--------------------------	----------	-------------	-------------

Let's look at situations that can be modelled using the sine or cosine curve.

There are many different types of application for sinusoidal functions but all will have a periodic nature. There are different ways information can be presented to us:

- (1) With a Graph
- (2) Through the Collection of Data
- (3) By Giving us an Equation (Already Created)
- (4) Through an Anecdotal Story or Situation (a "word problem")

## (1) Examining Applications from a Graph

**Example 1:** Find a sinusoidal equation that could represent the graph below:

**Example 2:** Two students are riding their bikes. A pebble is stuck in the tire of each bike. The two graphs show the heights of the pebbles above the ground in terms of time. What information about the bikes can you gather from the graphs of these functions?

	Bike A	Bike B
Initial Height of Pebble		
Diameter		
Period		
Height of the Axle		
Speed		

With the information found above, create a sinusoidal equation to present the height of a pebble in the tire of Bike A and Bike B.
