Synergist ,1971 Workers at War Joshua H. Howard,2004 This book focuses on the lives struggles and contrasting perspectives of the 60 000 workers military administrators and technical staff employed in the largest most strategic industry of the Nationalist government the armaments industry based in the wartime capital Chongqing The author argues that China s arsenal workers participated in three interlocked conflicts between 1937 and 1953 a war of national liberation a civil war and a class war The work adds to the scholarship on the Chinese revolution which has previously focused primarily on rural China showing how workers alienation from the military officers directing the arsenals eroded the legitimacy of the Nationalist regime and how the Communists mobilized working class support in Chongqing Moreover in emphasizing the urban working class and nationalist components of the 1949 revolution the author demonstrates the multiple sources of workers identities and thus challenges previous studies that have exclusively stressed workers particularistic or regional identities *Living on the Spectrum* Elizabeth Fein,2020-07-07 Honorable Mention 2020 Stirling Prize for Best Published Work in Psychological Anthropology given by the Society for Psychological Anthropology Honorable Mention New Millennium Book Award given by the Society for Medical Anthropology How youth on the autism spectrum negotiate the contested meanings of neurodiversity Autism is a deeply contested condition To some it is a devastating invader harming children and

isolating them To others it is an asset and a distinctive aspect of an individual s identity How do young people on the spectrum make sense of this conflict in the context of their own developing identity While most of the research on Asperger s and related autism conditions has been conducted with individuals or in settings in which people on the spectrum are in the minority this book draws on two years of ethnographic work in communities that bring people with Asperger s and related conditions together It can thus begin to explore a form of autistic culture through attending to how those on the spectrum make sense of their conditions through shared social practices Elizabeth Fein brings her many years of experience in both clinical psychology and psychological anthropology to analyze the connection between neuropsychological difference and culture She argues that current medical models which espouse a limited definition are ill equipped to deal with the challenges of discussing autism related conditions Consequently youths on the autism spectrum reach beyond medicine for their stories of difference and disorder drawing instead on shared mythologies from popular culture and speculative fiction to conceptualize their experience of changing personhood In moving and persuasive prose *Living on the Spectrum* illustrates that young people use these stories to pioneer more inclusive understandings of what makes us who we are *Report* Wisconsin. Fenno,1998-02-01 This is a book about the politics of representative democracy written from the perspective of the politicians who make it work Typically political scientists study campaigns from the perspective of the voter and for the purpose of explaining election outcomes But campaigns also need to be studied from the perspective of the candidate for the purpose of understanding representation Richard F Fenno Jr traveled with ten U S senators as they campaigned in their home states using what he calls the drop in drop out tag along hang around method of research to present a developmental picture of their activities His focus here is on three such activities pursuing a career campaigning for office and building constituency connections Taken together the three constitute the political underpinnings of representative democracy Fenno describes the achievement the testing and the maintenance of

representational relationships He examines challengers and incumbents winners and losers and motivations strategies and behaviors and he reports on differences similarities and patterns among them In studying the candidates varied careers campaigns and connections in stages and sequences and in depth and in allowing us to hear them reflect on these experiences Fenno has been able to offer rare insights into campaigns and elections insights very different from conventional ones that concentrate on the behavior of voters In its focus on the process of representative democracy Senators on the Campaign Trail offers a rich rounded developmental view of some high level individuals who work at the business of representation For scholars the book suggests some qualitative confirmation and added stimulation in forging generalizations about politicians For citizens the book argues for replacing the conventional blanket condemnation of our politicians so prevalent today with more discriminating judgments about what they do and why and to what purpose they do it
