Modern Classroom Assessment Bruce B. Frey, 2013-09-13 Modern Classroom Assessment offers an applied student centered guide to the major research based approaches to assessment in today's modern classroom. Rather than simply list basic assessment formats with a few examples as many textbooks do, award winning professor and scholar Bruce Frey's book fully explores all five key approaches for teacher designed assessment: Traditional Paper and Pencil, Performance Based, Assessment, Formative Assessment, Universal Test Design, and Authentic Assessment, while making abstract concepts and guidelines clear with hundreds of real world illustrations and examples of what actual teachers do. Offering a variety of engaging learning tools and realistic stories from the classroom, this text will give any reader a strong foundation for designing modern assessments in their own classrooms.

**Assessing sanitary mixtures in East African cities** Sammy C. Letema, 2023-09-04 It has been common for both scientists and policy makers to view sanitary provision as a dichotomy between a centralised and a decentralised approach. Moreover, sustainability assessment has also been characterized by a dualistic approach between the techno-centric and the eco-centric. Such views are often simplistic and not in tandem with the existing multiple sanitary options and service providers in East African cities which defy such classification. This book provides the theoretical and empirical basis for a third way of classifying and assessing the multiple technical and institutional options to sanitary provision. This novel assessment approach called modernised mixtures is used in this book as a tool for conceptualising, assessing and improving sanitary provision in East African cities. The assessment is based on four social and technical dimensions and three sustainability criteria. This inclusive approach in assessing sanitary mixtures benefits decision making among imperfect options.
